...SCHNER NEW HEAD OF GAME COMMISSION

PORTLAND, Ore., July 9.—I. N. ...ner was elected chairman of the state game commission at the ... of its meeting this morning. The commission's first act was to ...down a proposed change in the ...season on deer.

...C. Winslow of Salem asked ...the season be changed from September 10-November 1 to August 20-November 1.

He said that the legislature had practically approved such a change.

Ben Dorris of Eugene and James Maloney of Pendleton both objected. Maloney held that the deer are shedding their horns at the earlier date and are too easy to get.

The commission also objected to a change on grounds that all literature for the year is already out.

...xpensive Method of Reducing Dangerous Swollen Veins at Home

...'s Recent Discovery Also Heals ...Burns, Boils, Carbuncles, Abscesses and Open Sores in a Few Days

...world progresses. Today all ...that took weeks to cure can ...ended in a few days. If you ...varicose veins or bunches you ...start this today to bring them ...to normal size, and if you are ...you will do so.

...get an original bottle of ...'s Emerald Oil at any dispensary ...pharmacist and apply it night and ...to the enlarged veins. It is ...powerful and penetrating, and ...a little is required.

...a few days' treatment the ...will begin to grow smaller and ...regular use will soon reduce to ...

Moone's Emerald Oil besides being one of the most powerful antiseptics, capable of destroying the most pernicious germs and the poisons caused by them, is also a marvelous healing agent.

One application, for instance, stops the itching of eczema, and a few applications causes the eruptions to dry up, scale off and completely disappear. It is equally effective in barber's itch, salt rheum, redness and inflammatory skin trouble.

People who want to reduce varicose veins, wens or goitre, or get rid of eczema, ulcers, boils, abscesses or piles in a few days should not hesitate to get a bottle at once. It is so powerful that a small bottle lasts a long time. Nathan Fullerton, The Rexall Store, Roseburg, can supply you.

Retail Salesmen Wanted

A Splendid Opportunity for the Right Men

The J. C. Penney Company—a nation-wide institution—needs capable salesmen; young men between the ages of 25 and 35 years who have had thorough experience in one or more of our lines, and can give us the highest references.

Our company, which started in 1902 with one store, now operates 371 retail stores in 29 states. We sell dry goods, shoes, notions, clothing and furnishings for men, women and children. We do a strictly cash business. Our sales in 1922 were $49,035,729. We opened 115 stores in 1920, 59 stores in 1922, and will open 104 stores this Summer and Fall, making a total of 475 stores in 33 states in operation this year.

By industry, study and determination your progress will be rapid in our organization. Under our experienced managers you are trained to become a manager. When you have qualified

You are Promoted *to be* Manager of a Store

in which you own a one-third interest, to be paid for out of the profits of the business.

Experience has taught us that some of the greatest successes come from the ranks of average men. What we need are young, healthy and capable salesmen who have had thorough experience in a small or medium-size department store, or are experienced in general store work in special lines. The investment of money is not necessary for your success with us. The financial backing of our company is ample. Briefly, this is our proposition—tested and proven over a period of 21 years:

You come to us first as a salesman in one of our stores. During the period of proving your ability you learn the greater possibilities of co-operative effort. Your progress depends upon your ability and effort. As our new stores are opened, managers are selected from our sales force.

When you make a success of the management, you are sold a one-third interest in a new store and become its manager. You may afterward acquire a partnership in other stores which are the outgrowth of the one in which you first received a financial interest. If you do not possess the capital to purchase a one-third interest in a new store, the money is loaned you by the J. C. Penney Company, and you repay it from subsequent profits of the store.

For further information and personal interview

See MR. E. A. ROSS at Hotel Umpqua, Roseburg, Ore. Wednesday, July 11th

If you are unable to see him, write for our booklet, "Your Opportunity," which fully explains our plan. Give your age and number of years' experience in our lines of merchandise in your first letter. All correspondence strictly confidential.

DEVELOPMENT OF ALASKA URGENT

Territory One of Nation's Greatest Problems of the Future

RED TAPE DETERRENT

Many People Leaving Country Because of Failure to Get Action From Washington Without Long Delays

By GEORGE B. POLMER
(International News Service Staff Correspondent.)

ABOARD THE U. S. TRANSPORT HENDERSON, En Route to Alaska with President Harding, July 10.—President Harding believes that the "Alaskan problem"—what is to be done with this vast territory being dormant and stagnant because of years of governmental neglect—is destined to become one of the paramount problems confronting the American government for the next fifty years.

Obviously, he believes, the present policy of letting things drift cannot be long continued, else Alaska will again be abandoned to the natives from whom it was wrested.

Fifteen thousand American settlers have left Alaska in the last ten or twelve years—due largely, according to officials, to the difficulties which the government placed in the way of their making a living, and to the lack of governmental support.

Red tape, the centralizities of authority in Washington, lack of roads, and the inability of pioneers to "get action" from Washington, 5,000 miles away, are the principal causes assigned by Alaskans for the decline in population and the dwindling of commerce and industry.

Country Is Neglected

The history of Alaskan administration since it was acquired from Russia by purchase in 1867 is one of neglect. That much is frankly admitted by officials of this and other administrations. The only reason has been lack of public interest and unwillingness of congress to appropriate enough money for pioneer work.

The total area of Alaska is 590,884 square miles—about one-fifth as large as the United States proper. In those nearly 600,000 square miles, are mineral, food and timber wealth that is incalculable. All it needs is development.

Only a small part of Alaska actually has been surveyed under the rectangular system used in throwing public land open to homestead entry. Out of the 375,165,760 acres comprising the territory only 1,000,000 acres have been gone over and surveyed by the general land office.

Population Dwindles

The population of Alaska presents an interesting problem. For years after America acquired the territory there was a steady increase in population. Ten years ago, as a result of long neglect, the population began to dwindle. Its permanent population is now fixed at about 55,000, of whom only one-half are whites. The other half are Indians and Eskimos.

Along with the decrease in population came a corresponding loss in commerce and trade. In 1917 the total commerce of Alaska was $64,000,000. In 1921 only a year later, it dwindled to $27,000,000, and last year there was only a slight recovery, although the figures are not yet available.

Alaska's greatest resource is its mineral wealth. No one knows—the experts can only guess at how much gold, silver, copper, zinc, antimony, tungsten there is concealed in the towering mountains that march in serried ranks across the face of the territory. Tremendous quantities of coal and lignite have been expertly estimated.

Oil there seems to be in abundance, and the prediction is now frequently heard that it will not be many years before American motorists will have to depend upon Alaska to furnish their fuel.

The principal commodity furnished by Alaska, aside from minerals, is fish. Salmon, herring, cleam, shrimp and other sea foods are taken from the waters in immense quantities, resulting in a great canning industry. Last year there were shipped from Alaska perhaps more than $24,000,000 in fish products.

Not Always Icy

The popular conception of Alaska is that it is a great, cold, forbidding place. As a matter of fact, there are many months in the year when straw hats are worn, and in the southern valleys crops are grown just as in the American middle west.

The principal difficulty to agricultural development is not the climate, although that is a big factor, but clearing the ground. There are few roads, and the difficulties of transporting machinery are enormous.

The forests of Alaska have been described as the most magnificent in the world today. The value of the timber runs into many millions of dollars, and it has scarcely been touched owing to difficulties of transportation. There never an area of more than 20,000,000 acres, and estimates of the merchantable timber standing along the coast of the territory have run around 75,000,000,000 board feet.

It is estimated that with careful management, these forests can be made to permanently support a pulp and paper manufacturing industry, with an output equal to one-third of the present consumption of pulp products in the United States.

There is one U. S. railroad in Alaska. It was completed a few months ago by the government after nearly ten years of work.

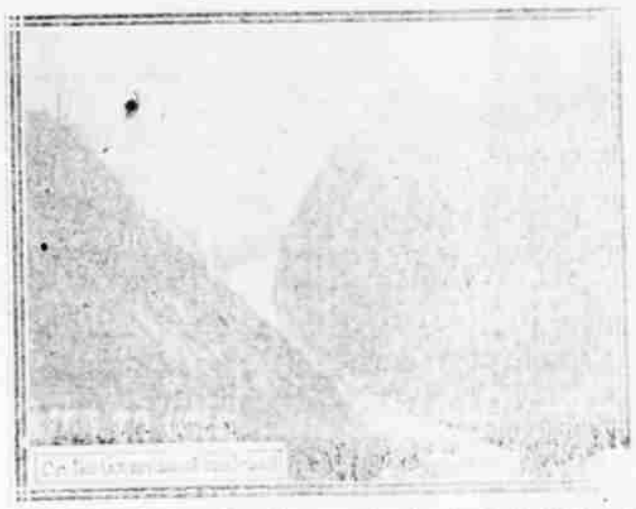
Congress authorized its building in 1914 and appropriated $35,000,000 for the job. The route was chosen and officially approved by President Wilson in 1915.

It begins at Seward, at the head of Resurrection bay, runs over the Kenai mountains, across the Matanuska valley and up the Tanana river to Fairbanks, 467 miles away.

Including branch lines, there are now 543 miles of railway operating—carrying passengers, freight, express and mail. The Alaskan railroad has created a hotel at Curry, the half-way point of the system, for the benefit of tourists, and it is expected that the Presidential party will stay there one night.

The road has not been a financial success, showing a deficit of approximately $2,000,000 a year. Its existence, however, is absolutely necessary.

SCENE ALONG ALASKAN RAILROAD



A magnificent view along the government railroad in Alaska. This exceptionally beautiful scenic route through which the railroad runs abounds in such views as this, in which sheer walls of rock rise perpendicularly from mountain streams.

IMPROPER STACKING MAY CAUSE HAY LOSS

The wild and tame hay crop of the county has been subjected to an unusual amount of rain this year. This moisture would do very little or no harm if the crop was in condition to receive it. This, however, was not the case in the average field or meadow. Many farmers have done what they could to prevent any loss. It was impossible to prevent some damage owing to the lack of competent available labor.

Owing to the heavy crop and lack of labor much more hay will be stacked in the field than is ordinarily the case. Should any more loss of quality in the crop be brought about it will cause heavily those the miserable poor stacks put up by the average farmer.

S. W. Comer, the county agent, states that the practice of stack building seems to have been best, and this has come about largely through the usual practice of putting all grain and hay crops into more and covered stacks. However, the large crop which has been produced this season is testing the ingenuity of the men who have to be stacked in the field, and the farmers have done well in taking advantage of the situation in this community and a crop should be built so that it would shed rain the rule that would hold upon the field as well as any other farm and quality should be the best quality possible to offset the loss attributed.

DAILY WEATHER REPORT

U. S. Weather Bureau, post office Roseburg, Ore., 24 hours ending 5 p. m. July 9, 1923.

Precipitation to 5 p. m. and total since first of month	[illegible]
Highest temperature yesterday	[illegible]
Lowest temperature last night	[illegible]
Precipitation last 24 hours	[illegible]
Total precip. since first of month	[illegible]
Normal precip. for this month	[illegible]
Total precip. from sept. 1, 1922, to date	[illegible]
Average precip. from Sept. 1, 1922	[illegible]
Total deficiency from Sept. 1, 1922	[illegible]
Snow precip. for 24 hours ending 5 p. m. today	[illegible]

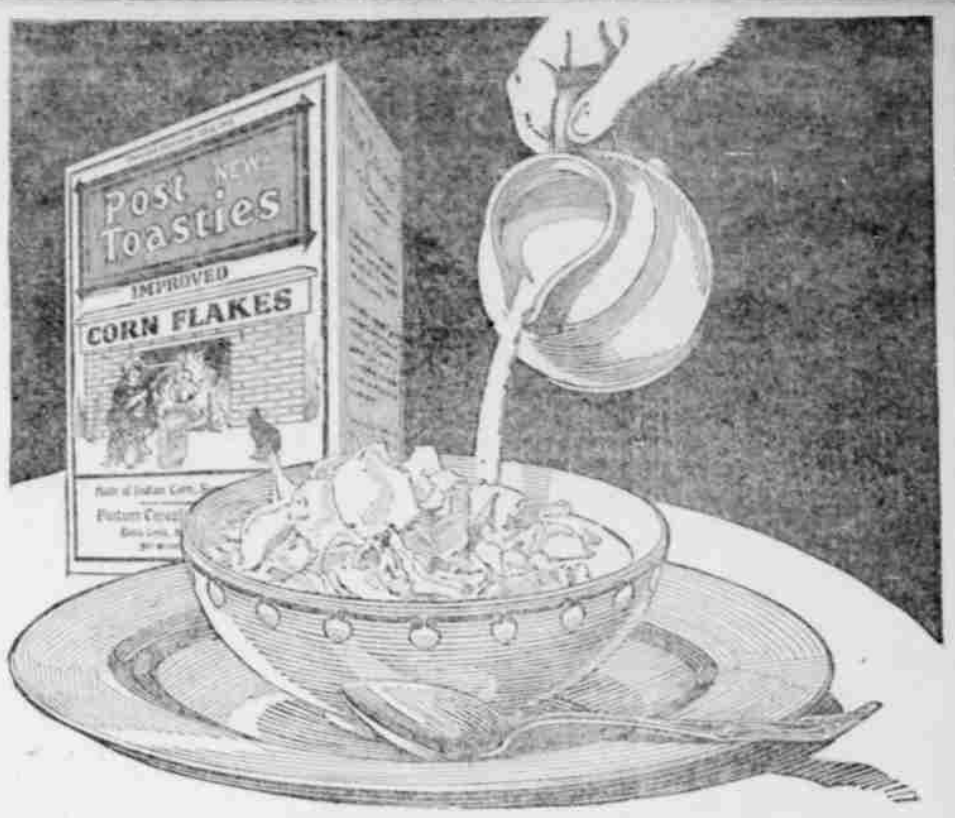
This weather and Wednesday.

WILLIAM BELL, Observer.



Crisp in the cream—

Golden, crisp Post Toasties, with cold rich milk or cream, give zest and snap to the morning, noon or evening meal these hot midsummer days.

Their tasty "toasted" flavor and appetizing crispness are *improved*—not lost—when cream or milk is added.

Crisp in the package and crisp in the cream, these golden-brown flakes of choice toasted corn are made to please appetite—and are always ready to eat.

From the first bowlful to the last serving out of the triple-sealed, *wax-wrapped* package, Post Toasties retain their delicate crispness and distinctive oven-freshness.

The Yellow and Red package is the guide to Post Toasties goodness.

Worth asking for by name—

Post Toasties
Improved Corn Flakes

ADVICE TO THE LOVELORN

by MRS. ELLSBURY

(Address all communications to Mrs. Ellsbury, care of News Review.)

Dear Mrs. Ellsbury:—I am a girl of 18 and am going with a boy the same age. He is a splendid, clean boy, and I think a good deal of him. He is so sensitive, that he is afraid to be the laughing stock of the town. I think one reason that I am about the only acquaintance he has. Aside from that I can think I have no fault to find with him.

WORRIED MARY.

Worried Mary:—This is a rather common fault among boys of his age, although some are a great deal worse than others. I think you can be assured that he will outgrow it. All worthwhile boys do.

Dear Mrs. Ellsbury:—I am a girl 17, and I am with another girl that is just my age. I know, although it sounds conceited, that I am better looking than she is, and that I dress as well and yet the boys all seem to like her better. I try to act just like she does but it does not do any good. If we both meet a new boy he always asks her to dance first, and always tries to make dates with her, never with me, or hardly ever anyway. Of course I have a few friends and relatives, but not as many as she has. What is the cause?

LULU.

Lulu:—I think perhaps the whole trouble is that you try to act like she does. My best advice to you is, be yourself. Never try to act like anyone else. Your girl friend probably has a very attractive personality, one that attracts friends readily. You have just as much attraction in your own way. I am sure as she has in hers. Don't do the same things she does, or appear as mother. Just be natural and have a good time in your own way.

Electric irons for $5 and up. Telephone 122. Hudson Electric Store. We deliver.

MOVIES

Liberty Theatre

Memories of years ago, when Charles Ray made such a sensational hit as a dramatic actor that he was instantly accepted by everyone, will be revived at the Liberty Theatre when his latest United Artists production, "The Girl I Loved," will be presented. In this picture the popular star has returned to the field of light comedy with exceptional power. It will be shown for the last time today.

"The Girl I Loved," adequately possesses added value from the fact that it is the personal love story of James Whitcomb Riley, the poet, as he wished it to be when with the title upon which the play is based. The story belongs to the poet, as he chose what is now to be a memorable song during his young manhood, and the film is filled with romance and beauty.

Anthes Theatre

It is not every motion picture director who, when called upon to make some outdoor film, finds it necessary to spend an entire year on the actual performance of a similar film. Some director, for his production, the importance of utilizing impressions of Harry Carey which have actually proved a sure, in such an enterprise.

The medley which is Tomorrow night's product and director of "Desert Gold" has to follow, which comes to the Anthes Theatre tonight, tomorrow night and Monday, "was to be found in the desert of the southwest." Not a real desert, but a real desert. Certain Arizona A. Tiffen expanse of sagebrush of the south, which was selected for the actual shots for the Tarkington-Zane Grey story by Tiffen. Its great scenic value, by photographs in which are shown the sand and sagebrush, full of the picturesque in the Hollywood.

The scenes are clear, every detail of the "desert." In which the villainous first mate is incarcerated after the mutiny, was procured from the Dartmouth Historical society, and were the original chains in which were brought back the prisoners in the famous mutiny aboard the schooner, "The Bounty," that sailed the seven seas in the long ago. Now, after all these years, through the medium of "Down to the Sea in Ships" and with the aid of Capitol 7000, the notable mutiny is preserved as a bit of historical record on the motion picture film.
