Chautauqua Presents Lieurance's Little Symphony

Thurlow Lieurance, Noted American Composer and Authority on Indian Music, Creates and Coaches an Organization Unique in the World of Good Music

Thurlow Lieurance, the noted American composer, is sending a company of his own creating and coaching to the Ellison-White Chautauquas this year. They will appear here on the closing day, presenting a full concert at night. Lieurance's Little Symphony is an all-string combination, four violins, two 'cellos and a pianist, offering representative sketches from standard symphonies and leading operas, together with a wide repertoire of Mr. Lieurance's own compositions, including "By the Waters of Minnetonka." The organization is one of real artists who have caught the spirit of their noted organizer, implicity believing that nothing short of the best in music can completely satisfy the craving of the real American musical soul.

Tamburica a Unique Instrument

Jugo-Slav Orchestra at Chautauqua Feature Their Own Native Sweet-Toned Instrument

Probably no native instrument brought to America in recent years has attracted wider attention than the tamburica. It embodies some of the best features of the mandolin, banjo and guitar, but is distinctive from each of these in many respects. The range of music is almost limitless. In volume the music produced by the six players comprising the Jugo-Slav Tamburica Orchestra is equal to that of an orchestra of eight or nine players using other string instruments.

Throughout Eastern, Southern and Middle Western states the concerts of the Jugo-Slav Orchestra have been acclaimed as musical events of unusual interest and value. Their Chautauqua tour of the Coast under Ellison-White direction will unquestionably add to the splendid reputation already gained. They will give a full afternoon concert on the fourth day and a prelude in the evening.

HOME DECORATION

Interesting Lecture at Chautauqua by Hunt Cook of Chicago Art Institute.

"No community can rise above the level of its home life and that home life is largely the product of home surroundings," says Hunt Cook of the Chicago Art Institute, who lectures at Chautauqua on the third afternoon.

Mr. Cook is an authority on interior decoration and he will talk at Chautauqua on "Art In the Home." He builds a model room on the Chautauqua stage and shows the right and wrong way of arrangement.

Mr. Cook urges simplicity and the elimination of all unnecessary furniture. "The trouble with our homes is that we clutter them up," he says.

LIGHTS A CANDLE IN STREAM OF WATER

Burnell Ford Does Strange Things With Electricity.

Burnell Ford, prominent inventor and electrical scientist, presents a lecture-entertainment for Chautauqua patrons on the first night which will be of unusual interest. Among his interesting experiments will be the production of an electric storm upon the platform, 250,000 volts of electricity being discharged into the air; the

operation of a submarine chaser by wireless; welding of metal by electrical current passing through the human body; setting off explosives by wireless; lighting of a candle by means of a stream of water, and many other intensely interesting experiments.

Returns From Bolshevik-Land

Anzac Tom Skeyhill Brings First-Hand Story of Russia's Condition Under Bolshevist Rule

Theodore Roosevelt said of Tom Skeyhill, "I would rather be on the platform with Tom Skeyhill than any man I know." The story of this young Australian soldier-poet's war experiences and his subsequent picture architect career on the American platform, are truly remarkable. His story of Gallipoli and the Dardanelles was one of the best attractions of the past decade.

Now he has just returned from a winter spent in Russia with an authoritative story of conditions as they exist in the land of Lenin and Trotsky. His is a fact lecture. He brings to you the story of Russia first-hand.

Sam Lewis, Distinguished Welsh Tenor, One of Country's Popular Ballad Singers

With Talented Assisting Musical Stars, Mr. Lewis Scheduled for Two Concerts Sixth Day of Chautauqua

Sam Lewis, the well known Welsh tenor, is one of the leading musical artists to be presented during the coming Chautauqua. He is appearing this season at the head of his own concert organization. Mr. Lewis first achieved distinction through his rare ability as a ballad singer, but he is now as well known for his achievements in the concert and oratorio field. He is one of the most pleasing tenor voices of the younger generation of singers, of splendid volume and glorious in its rich tones. Assisting artists are Amber Hopkins, reader, Albert Ament, violinist, and Florence Bogert, pianist and accompanist.

Tiny Infants Become Robust.

Parents whose children are about small size should take heart for recent figures show that tiny infants frequently grow up quite robust and of normal proportions.

Another Reason for Smiling.

"It requires," across school, "sixty-five muscles of the face to make a frown and only thirty-three to make a smile." Conserve your energy.—Boston Transcript.

Do They Get a Bonus?

In many of the large cities of China there are establishments where beggars voluntarily commit themselves to have their eyes taken out and their bodies broken in order to excite public sympathy.—Brooklyn Eagle.

Different.

In England, while husband can obtain a judicial separation from his wife for habitual drunkenness, the same privilege is not extended to wives of men who are addicted to drink.

Your Efficiency Depends on Your Eyes

Good work needs good eyesight, because, as a chain is no stronger than its weakest link, so a man is no stronger than his weakest faculty. And now, when the quality of a man's work will play such an important part in the determination of his income, you owe it to yourself to keep your faculties alert, keen—fit for the competition of industry

DON'T WONDER WHETHER OR NOT YOUR EYES ARE EFFICIENT. Have them examined — and KNOW!

U. S. Government statistics prove that over 80% of the men examined for the army had defective vision. This should indicate that possibly your eyesight is not so efficient as it should be. Have your Eyes Examined—and KNOW—as every Live American should.
