Cut This Out and Take It With You.

A man often forgets the exact name of the article he wishes to purchase, and as a last resort takes something else instead. That is always disappointing and unsatisfactory. The safe way is to cut this out and take it with you so as to make sure of getting Chamberlain's Tablets. You will find nothing quite so satisfactory for constipation and indigestion.

CODLING MOTH BUSY—SPRAY

Codling moths, hastened by the hot days of early June, are emerging in large numbers in various districts of Oregon, and are busy depositing eggs for the next worm crop, reports A. L. Lovett, entomologist of the O. A. C. experiment station. The eggs will begin hatching in 10 days from time of laying, and to control the worm brood the 30-day spray should be put on three days ahead of their arrival. In the Willamette district this calls for the application starting Monday, June 7. This spray is made of one pound dry lead arsenate to 50 gallons of water. If scab is present lime-sulfur solution, summer strength, may be used instead of the water with one pound dry lead arsenate. The solution is applied to young fruit and foliage so completely that the first meal of the young worm will prove to be his last.
