A NEW WATER SUPPLY PROBABLE

Water Superintendent H C Gilman is enthusiastic in the belief that he has solved the question of a sufficient and wholesome water supply for La Grande at a very small cost.

Several weeks ago his attention was called to several large springs on a tract of land owned by Mr. Folk about two miles from the city reservoir. When the present water system was constructed the springs or what is known as the Crendall place just south of the city were examined and not a few contented that that was the proper source to be utilized, but little if anything was known relative to the springs on the Folk place, they being back in the mountains

Mr. Gilman has accompanied several of our citizens to the springs and all were surprised to find the quantity of water. In order that the matter could be developed, Mr. Gilman persuaded Mr. J M Church to secure an option on the land owned by Mr. Folk 160 acres, which he held at $3000, to hold the same in trust for the city, which he did. In the early spring these springs will be developed and if they furnish as much water as all who have visited them seem to think, there is no question but what the city will take immediate steps to secure this water. The question of an increased supply of pure water has been under consideration for several years, but as yet it is an unsolved problem and it is to be sincerely hoped that Mr Gilman has found it, which he is confident he has. The cost including the land wilt not exceed $15,000, and possibly can be piped into the present reservoir for $10,000 or $12,000, a trifling sum in either event if the supply is there.
