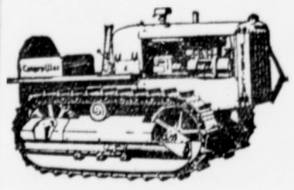
Tractor Balance *effects the bank balance*



"Caterpillar" track-type Diesel Tractors are enabling hundreds of Northwest farmers to farm at lower costs than would be possible with any other form of power. An acre of good plowing, for example, on a gallon of low cost Diesel fuel. That's average performance for a "Caterpillar."

One reason for plus economy and plus performance is BALANCE . . . . the correct balance between engine and traction . . . the proper distribution of weight. Watch a "Caterpillar" on the hills or soft soil . . . watch others and you'll see the difference.
