DRUG STORE ATTRACTIVE

One of the first things that attracts one's interest when entering the Newlin Drug Store is the large French plate glass facing to the candy counter. Many feet long and about four feet in width, not a flaw can be found in the entire surface. Many have pronounced it as being one of the finest specimens of plate glass that La Grande has.

The new plate glass is only a part of a series of improvements that are being made, however, and after inspecting the glass, the new candy and cigar counters, with marble bases, and the new front, your attention is called to the new linoleum covering the floor. Linoleum covering, ordinarily, is mediocre and not especially noticeable, but this is an exception. The design, plain but artistic, is very attractive.

The candy counter, with its beautiful glass and its marble base, has another feature that deserves mention. A new refrigerating plant, small but complete in every detail, is installed in the base of the counter and serves to keep the contents of the counter always fresh and in the best possible shape.

In speaking of the improvements, Mr. Newlin states: "It has always been my plan to make my place of business as attractive as possible as nothing is too good for my customers."

We will be glad to fill your family recipes and prescriptions as well as to furnish you with all the drugs and toilet articles you may need. You will always have our personal attention at Rexall Drug Store. Sherthorn-Wright. 11-9-tf

A Timely Suggestion.

This is the season of the year when the prudent and careful housewife replenishes her supply of Chamberlain's Cough Remedy. It is almost certain to be needed before the winter is over and the results are much more prompt and satisfactory when it is kept at hand and given as soon as the first symptom appears and before it has become settled in the system. There is no danger in giving it to children as it contains no opium or other harmful drug.—Adv.
