# SOIL RESOURCES ARE SUFFICIENT

## United States Learns to Feed Future Population Through Test

WASHINGTON (AP)—If the population of the United States were to be increased overnight by a hundred million, the soil would not be fertile enough to grow food for them. But there are sufficient data, without of speculation, which go far to indicate that the United States can feed its population.

Luther Burbank, there had expressed the country's food supply now is adequate, because the replenishing of the country with new and improved soil is a certainty. Science will have opportunity to return, in the future, to fertile lands more productive in the production stores.

No one knows what will happen there but we are certain we have the land when better.

"They will adapt," he replied. "If men and land and farming in the future the food product are to keep proportionate, and the extraordinary increase of farm lands will cease.

"Under conditions of agricultural knowledge, farming with increased crop yields on the farms has produced a broad figure to build up land better. The figure and its consequent benefits, is evident in the increasing prices. Our job is not an acre or four of

NEW U. S. SHIP ON THE ARCTIC RUN

The U. S. coast guard cutter "Maryland" shown here, is now on the Alaskan run, carrying supplies and relief, succeeding the vessel "Bear." Inset, Commander E. P. Bartlett of the crew vessel.

Profits without Farmers of the Adjacent countries but at will be, as productive perhaps than, as, when population from grown as future as it is there.

"Necessity has forced foreign trade to produce at a minimum. We farm, and another that stage. There are millions of unfilled acres in the United States that need to be used in some good way.

"Farmers who want to know what their land will most profitably grow under what conditions it will

Under some local farm engineering is said apply to their against experimental station. Government agents will take proper samples and the results then better to farmers under the history of the land and under the previous treatment. Modern methods tend to substitute here rarely represent conditions of the valley field.

"In regards the investigation of agriculture in the face of population expansion, it is necessary to be optimistic and preserve the country of

# HEALTH

### DO NOT "RUN BY" DANGER SIGNALS!

By J. Garland Sherrill, M. D., Louisville, Ky

Member Georgia Medical Inst.

The greatest health insurance is to know your condition and protect yourself against disease and bodily breakdown at its inception.

Whether or not you feel your best, and regardless the sixth thing is to know your condition. Every person over forty, no matter how vigorous or how strong he is in appearance, is starting the trip of a life and will soon start on the downgrade. In other words, his resistance to disease will weaken with the time. The sooner realize he is enough the more serious he should be.

Heart failure, frequently active while the arteries begin to show signs of failing strength. The arteries, actually, are considered important may think he is as vigorous as ever and may exercise the arterial system and a strained heart, strength result, or he may be sudden and violent exertion, starting a heart attack, functioning perfectly, and has some structure and important compromise as a result.

Kidneys in fact—everything, continue use of stimulants, lack of proper exercise—all tends to wear their efficiency. Excessive amounts of meats that pull on the kidneys and on the liver which will be shown by major changes in the urine. These changes are easily detected by a varied laboratory examination, and by proper of note and which considered the development of Bright's disease, page for postponed, for years and perhaps indefinitely.

As a general guide, fatty and sticky substances are more and more prone to damage and therefore are should be used, and more, we expect. Morning pain, before breakfast which indigestion of pill type, pressure under the ribs, swelling of the face, arms and pains about the body, are all danger signals.

The citizens who come out a and signal at danger must expect to great. Individuals are ignoring signals of danger daily, and the some time do not have an immediate result. Instead those warns. Because the change is not immediate is no reason why it is more the low certain.

Do you know your own condition? The larger life insurance companies have recognized the value of examination of their policy holders, and after short, free examinations from time to time, they have found the importance of the individual increased by the knowledge so obtained.

You are carefully urged to consider the advisability of taking stock of your personal condition at least once a year. Do it now. What profit is there in the accumulation of wealth if you are not here to enjoy it, or if your health does not permit you to enjoy it?

### To Licensed Accountants

PARIS — Expert accountants who prove their worth may be licensed for by the government therefore. A preliminary examination, then years experience and a final examination are the requirements for certificates to be issued by the Ministry of Public Instruction. Examination fees have been set requirements for accountants.

It is a good habit to come to the morning paradise which will be thought for the day. A little deed can make all others to come the morning good order. It can control. Unexpected visit also pays on disappointed days, to the downtown.

Our motto: The Safeway makes fruit and vegetables at less for future development can be.

Did you ever go around the C. C. Pratt Lumber and see how orders used order pads seems to be common this La Grande. Those pads you could go down there and see many gallons piled up and behind boxes and Hoobeck and Montgomery Ward but now days Claud C. Pratt is selling paint of a much higher quality at a lower figure. There is only one way we can do it and that is the way we are doing it. At a low margin, big sales, quick turnover and a fully good. Thus: You can pass along the road any direction and see pedestrians at work and can go every and look there where they get their paint and if they don't tell you to Claud C. Pratt Lumber Company's, then I want you to tell them to come here for the best. I will tell you why. 100% pure Minnesota paint could not be 100% pure. It is in a class by itself and is on top of the earth.

This is about all the newspaper we could think of at one time, or in other words, it is for nothing a full bucket of milk, and then kicking it over, but who cares, as long as we just sell the paint.

## Germany Sends U. S. 500,000 Birds Yearly

BERLIN (AP)—Germany, the world's market for canary birds, annually ships about 500,000 of the little feathered warblers to America.

Since the beginning of the 14th century, when these songsters were brought from the Canary Islands, they have been carefully and extensively bred in Germany. Within the last century the "Harzer Roller" in the Harz Mountains have acquired world-wide fame.

Through careful breeding the original green color of the birds has been changed to a bright yellow, while intensive and careful training has markedly enhanced their original marvellous vocal qualities.

The features of the canary bird exhibitions regularly held in Berlin are the "song competitions" at which the birds' vocal abilities are carefully appraised by expert breeders, who have made the surprising discovery that the green birds—resembling in color their wild tropical progenitors—are frequently better singers than their yellow brethren.

Grubs of the carpet beetle are prevalent in some localities in summer. They damage furniture, carpets and clothing in the same way that moths do. They feed on wool, silk, furs and leather articles. Naphthalene flakes or paradichlorobenzene crystals are effective against them if used in the same way as for moth—wrapped up with the articles to be stored, which have first been thoroughly brushed, beaten and cleaned. Containers must be absolutely tight so that no adult beetle can enter and lay eggs. If the trouble has been in the carpets or rugs, fill up cracks in the flooring with putty or patent crack filler, or treat them with gasoline or benzene before the rugs are put back in place.

MOSCOW—Since the state accepted protest for transfer of a student from provincial educational institutions to Moscow is the presence of husband or wife resident in Moscow. Soviet students have taken to contracting sham marriages with Moscow inhabitants, scandinal marriage registry offices here complain.

To make dumplings for a stew, prepare dough as for baking powder biscuits. Roll out about half an inch thick, cut with a small cutter, and cook for 10 minutes on top the boiling stew. The kettle should be kept covered during the entire time the dumplings are cooking.

With Summer Salads Serve Tru Bake SODAS

Western Auto Supply Co.

More than 150 Stores in the West

The World's largest retailers of Auto Supplies . . . Serving the motorist since 1909 with guaranteed Accessories, Tires, Camp Goods and Radio.

A Week of Holiday Specials

Timely Savings for Labor Day and Other Trips

The week ending September 3rd brings big savings to many wise motorists who avail themselves of the remarkable bargains in aids to comfort and convenience shown below.

—SPECIAL TIRE SALE—
of WEAR-WELL CLINCHER CORDS
—for this Week of Bargains

30x3 Cl. Regularly $5.85 — $4.85

30x3½ Cl. Regular Size — $5.45

30x3½ Cl. Full Oversize — $6.55

Our entire Camp Goods stock is reduced in price for this big sale . . . hundreds of items all combining quality and low price to a degree made possible only by "Western Auto's" long experience, knowledge of market conditions and huge purchasing power . . . every item is guaranteed or money
