A flexible engine for Winter motoring. Your motor will start readily and operate flexibly, in winter, if you use an oil that stays fluid at low temperatures. The battery troubles, worn bearings and scored cylinders, experienced in winter, are simply evidence that the motor is bound with congealed oil and deprived of lubrication. Zerolene Stays Fluid in Winter. Zerolene No. 1, No. 3 and No. 5, which are good cold test oils, move freely in winter with the action of the motor. They give a continuous flow of lubricant of the proper "oiliness" to the pistons, connecting rods and crank-case shaft bearings, and save batteries. For safe cold weather lubrication, consult the Zerolene Chart at garages and service stations. STANDARD OIL COMPANY (California). more power & speed ~ less friction and wear ~ thru Correct Lubrication. The Standard Oil ZEROLENE For Motor Cars.
