From this meeting two groups derived; The Afternoon Group to meet the second Monday of each month; and The Evening Group which meets the second Tuesday of the month.

September 11th and 12th opened the fall meetings with a morning coffee session held by The Afternoon Group at the home of Mrs. Richard David.

Death Took 371 School-Agers On Hiways In 1949

Three hundred and seventy-one school age pedestrians were struck down on Oregon streets and highways last year, according to figures compiled by the office of Earl T. Newbry, Secretary of State.

Newbry said the increase in school enrollments this year could mean an even higher toll unless offset by increased alertness on the part of motorists. He reminded drivers that the speed limit at school zones and at school crossings is 20 miles an hour, in effect at recess times as well as when children are going to and from schools.

Also pointed out was the fact that Oregon law grants the right of way to pedestrians when in crosswalks, whether marked or not.

Children, estimated at 100,000 strong, are riding school buses in all sections of the state. By the end of school next spring, aggregate school bus travel will reach ten million miles.

The safety of the young passengers, the state traffic safety division points out, depends in large measure on how well other drivers observe the necessary caution when encountering a school bus.

Oregon law requires all vehicles to come to a complete stop when approaching or overtaking a school bus stopped to load or unload passengers. The law further states that vehicles may not proceed "if and so long as any children are leaving the bus or crossing the roadway".

Violations of this law brought 250 arrests by state police during the 1949-50 school year, the division said.
