Titles of new movies or novels?

No, just names among Oregon's annual list of the 100 most-dangerous species including mammals, birds, insects, weeds, and micro-organisms.

The list, said Oregon Dept. of Agriculture, is limited to "the worst of the bad actors worthy of focus by all Oregonians."

Besides the previous three names, the list includes Mute Swan, feral swine, toxic cyanobacteria, and European woodwasp. And Silverleaf Nightshade.

The complete list can be found at oregon.gov/ODA/PLANT/oisc_index.html.

The whole problem with the world is that fools and fanatics are always so certain of themselves, but wiser people so full of doubts.
