While citizens of Dayton were celebrating on the evening of the Fourth, shooting bombs, rockets, Roman candles, fire crackers, etc., some one, at intervals, fired off sticks of giant powder, each shot making things quake. The last one was fired off at the outside edge of sidewalk just in front of Thos. Hall's hardware store. The concussion broke 12 large window glass in front part of store, 6 of the glass were 36x46. The damage done was in the neighborhood of $25.

Portland is discussing the filling of gulches in that city, instead of building and maintaining expensive bridges across them. It has been suggested that Yamhill county, which, perhaps, pays out more money for building and maintaining bridges than any other county in Oregon, would profit, and be much better off financially and otherwise, were well and properly made culverts placed in many of the gulches, and the gulches then properly filled up. This would be permanent improvement, and besides would add much to the appearance of highways by making them more on a level and dispensing with unsightly bridges. Probably, if the attention of the county court was called to this matter by road supervisors there would be something done in filling gulches instead of building bridges.
