MERRILL BEATEN SCORE 5 TO 9

GAME REPLETE WITH BRILLIANT FIELDING STUNTS AND ALMOST FREE FROM ERRORS WAS PLAYED AT MERRILL.

By a score of five to nothing, the Klamath Falls baseball team yesterday defeated the fast bunch of kiddies composing the Merrill high school team at Merrill. Though the score looks somewhat one-sided, all of the Klamath Falls people who journeyed to Merrill, and there was a big bunch of them, say that the youngsters are ball players from the word go, and that they kept things interesting for Olivers layout of sluggers.

Considering the willow artists who went up in front of him, the work of young Blodgett, who twirled for the Merrillites, was very good, and he held the hits down better than was expected. Dewey was behind the bat and played his usual work. Siemens and French were the battery from Klamath Falls, and they worked together in great style. Only one safe bingle was gleaned off the delivery of Siemens.

The local players are loud in their praises of the treatment accorded them by the Merrill team and the people of Merrill, and say that they are good hosts as well as good sportsmen. A return game will be played in this city on May 11.

TROUT LAKE CANAL READY NEXT MONTH

TROUT LAKE, May 29.—Work on the Trout Lake Power & Irrigation Company's ditch will be completed by June 10, when water will be turned in to give the land below Guler irrigation. This ditch is one of the largest in the Valley and will furnish water for many ranchers not now under the ditch. Workmen are engaged in the completion of 800 feet of flume, to carry water from the dam to the canal below. When completed the canal will be about five miles long and will be probably extended later.

The Lost Creek Water Association contemplates improving its ditches and laterals before the dry season begins, by enlarging the main canal and turning all of Lost Creek into it. Lost Creek rises in Skamania County, runs above ground a short distance, then sinks. Where is comes up again it is in Klickitat County, and is utilized by local irrigationists.

The Government gave local people the right to take the water from Lost Creek for irrigation purposes. This canal carries water past Ice Cave, but trouble has been experienced in the past by the water finding its way into caverns en route. This leakage will be prevented by cementing the various fissures and saving come water to be used in the settlement. The water comes a distance of 14 miles, a gravity system being afforded settlers in the valley.

PRODUCTION OF SANSTONE SHOWS A GREAT INCREASE

WASHINGTON,. May. 29.—The value of the production of sandstone increased from $7,594,091 in 1908 to $8,010,454 in 1909, according to figures compiled by Ernest F. Burchard, of the United States Geological Survey. The three greatest producing States were Ohio, $1,639,006; Pennsylvania, $1,637,794; and New York $1,430,830. No other State produced sandstone to the value of half a million dollars. In 1909 both Ohio and Pennsylvania increased their output over that of 1908, but New York's production showed a decrease.
