Haywood's Trial.

The Haywood trial now going on in Boise City, Idaho, is perhaps the most sensational, spectacular and dangerous trial ever occurred in the United States. From its inception it has been a tragedy of strategem, perjury and murder. How it will end, the Devil only knows, for it seems to have been his work from the beginning.

So intense is the feeling and prejudice on both sides, that the press reports on neither side can be believed; nor is there any probability that true evidence can be fixed, where there are so many willing, bitter perjurers ready to swear to anything. Armed men are daily "shouldering" each other to start a row which may break out any time, and when it does start, blood will flow like water. So dagrant that it may affect no other city.

Our country is rapidly being "Russianized" by detectives, a practice deadly to justice, wherein an honest man has no show against a rogue, nor a poor man against a rich man. Things greater than Haywood are on trial in his case.

Federal Inspectors Will Dip Sheep.

EUGENE, Ore., May 18.—The squabble over the enforcement of the new law, which requires the dipping of all sheep every year, has been practically settled with the Lane county farmers who declared that they will not allow an inspector to dip their sheep. E. N. Hutchinson, of the United States Bureau of Animal Industry, was here yesterday, and decided that only those flocks which are diseased should be dipped and that the others would be left alone. Mr. Hutchinson sought to find a man who would accept the appointment of deputy state inspector for Lane county to attend to the work of dipping, but on account of the opposition of the farmers to the new law none will accept. It was decided to send a number of Federal inspectors here to do the work instead.

As To Dipping Sheep.

Some of our flock masters are under the impression that they will have to dip their sheep annually, whether they are diseased or not. We do not so understand the law, as it has a provision exempting sheep that are free from disease, and have not been exposed.

A law that would compel the owners of healthy sheep to dip annually, would be unjust and tyrannical, and perhaps would be set aside, inasmuch as it would impose a penalty where there has been no wrong.

Alfred Miller, our county Sheep Inspector, is an experienced flock master and knows the conditions in this county as well as any man we have. It was under his term as inspector, we understand, that the last trace of scab was eradicated from every flock in the county. We are also reliably informed that there has not been a single instance of a return of the disease since it was stamped out several years ago.

No doubt he will visit every flock in the county and people can rest assured of fair treatment at his hands. We invite him to send the TRIBUNE a note for publication explaining whether or not healthy sheep shall be dipped.

The following article on "Mountain Homesteads" was published in the Port Orford Post, then owned and edited by Hon. J. H. Upton & Son, February 9th, 1882. Senator Dolph took up the matter in Congress and introduced a Bill providing for Mountain Homesteads of 320 acres, providing that such Homesteads should not have more than 40 acres of bottom land. Had he not been defeated for a third term in 1895, he was confident that the measure would be enacted into law. We have never yet met a man, familiar with our western mountains, who opposed the measure; and now when the agitation of land affairs stirs our country, with almost a certainty of legislation by our next Congress,—it is certainly a fitting time for the Press to present the matter for public discussion, and appeal to our Congressmen to take up the matter, if it meets their approbation.

Hon. J. H. Upton, in an able editorial, earnestly endorsed the measure, but the Press of the state was lazily indifferent. We hope there are now fewer moss-grown editors.

MOUNTAIN HOMESTEADS.

Proposition to Increase Homesteads on Mountain Lands to 640 Acres.

Editor POST:—I wish to call your attention—and through you—the attention of the press and people of Oregon to the necessity of so changing our land laws as to give to all bona fide settlers upon mountain land, a larger Homestead, consisting of 640 acres.

All persons know, there are no longer any fine prairie and bottom lands in Oregon, ready for the settlers plow and yielding quick returns for his labor. The same condition exists in California, and in nearly all the other States and Territories.

But there are yet, unclaimed millions of acres of mountain land, covered with brush and timber where good homes and an independent living can be made if the settlers can obtain enough land. Limited, as now, to 160 acres, settlers will not locate upon said land for the simple reason that a living cannot be made on so small a tract; where a portion will always be worthless, and where, at the best, grass will be the crop, and stock-raising the business.

The Coast counties of Oregon and California especially need such a law—perhaps no county affords a finer field for illustrating the subject than Curry county. There are thousands of places in our mountains that would be speedily settled and utilized if larger Homesteads were granted. These lands would be burnt over and sown with meaquite grass and in ten years our stock would be quadrupled in extent and value. I can not illustrate as fully as I would like to, without prolonging my article unduly, but will leave much to be supplied by the reader, as he can easily trace the beneficent effect of such a policy.

Congress has already "subsidized" the settler upon desert land with a liberality that satisfies the rapacious and capacious appetite of the greediest land grabber. This might be used as an "ox-whip" over the tough hides of the average Congressman, to make them pull together, once more, for the good of the people.

I had a talk with Hon. M. C. George on this subject; and he informed me that he had already thought of it, that he would study it up, and that he then thought such a law very much needed.

If the people will canvass the matter among themselves, and in the press, and urge it properly before the Pacific Delegation in Congress, we may obtain the passage of the law.

Some say that we have now the Pre emption law, to which I answer, yes; but the Pre emption law is not friendly to the poor man. But all persons with whom I have conversed on this subject, are universally in favor of granting a Homestead of a full section of such land to all actual settlers.

My notion of the law would be to confine each settler to a square section according to the legal subdivisions; that such claims be surveyed by County Surveyors, who shall proceed like all U. S. Surveyors; that persons now settled on such lands be allowed an additional Homestead of 320 acres of contiguous land; and that proof as to the relative value of such lands for grazing or timber land be required.

CURRENT TOPICS.

Editor TRIBUNE:—Gov. Gooding of Idaho who has of late protested overmuch that the Federation officials should have "fair trial," has finally exposed his hand and very stupidly too. Just at the beginning of the Haywood trial, and at what he deemed the sychological moment, he conducted some carefully selected newspaper reporters into the presence of Harry Orchard, who, doubtless, had already rehearsed his part with Gooding. These reporters sent forth their estimate of Orchard as a Christian and truthful man—this to bolster up his testimony soon to be offered in the pending case. The trial Judge, who of course realized the gross impropriety of the step, was greatly exasperated upon learning the facts.

The fact is apparent that the murder of Steunenberg has been lost sight of in the struggle of the Mine Owner's Association backed by Standard Oil, to destroy the miner's unions of the mountain states.

And another evidence of a conspiracy against the accused was revealed in the smuggling through of an act during the closing nights of the late Legislature of Idaho, giving to the prosecution TEN PEREMPTORY CHALLENGES instead of five as heretofore in selecting a jury. This is a monstrous innovation and lends color to the suspicion that the prosecution has all along had some ulterior motive in staving off the trials though persistently demanded by the defense. The presumption is that they were waiting for the meeting of the legislature, confident that they could secure at its hands this rape of all precedent and practice.

Oregon and California and all other states whose criminal proceedure I am familiar with, give the accused two peremptory challenges to the State's one, this to give a poor and resourceless defendant more nearly a fair show against the powerful state, which can command the services of the best legal talent as also unlimited detective service, as well as witnesses practically from the ends of the earth.

Another bomb exploded by Gooding at what he doubtless deemed the sychological moment, was the story that Moyer had served a year in the Illinois penitentiary, but this improbable story is likely to prove a boomerang, especially in the light of the fact that Gooding says he had been keeping it for a whole year, presumably to be sprung at so late a day in the proceedings that the victim would have no time to refute it. Ransacking penitentiary records accounts in part for the $55,000 paid out already by Idaho for detective service in these cases.

Thomas F. Ryan, owner of the Equitable Life Insurance Co., and partner with August Belmont in city transportation thievery in New York, now looms upon the political horizon as the Democratic candidate for President in 1908. Perhaps it will be just as well, especially since Secretary Root is his right hand man.

IF YOU WANT CASH

For Your Real Estate or Business

I CAN GET IT

No Matter What Your Property is Worth, or in What Town, City, State or Territory it is Located

If I did not have the ability and facilities to sell your property, I certainly could not afford to pay for this advertisement. This "ad" (like all my other "ads") is practically sure to place on my lists a number of new properties, and I am just as sure to sell these properties and make enough money in commissions to pay for the cost of these "ads," and make a good profit besides. That is why I have so large a real estate business today.

Why not put your property among the number that will be sold as a result of these "ads?" I will not only be able to sell it—some time—but will be able to sell it quickly. I am a specialist in quick sales. I have the most complete and up-to-date equipment. I have branch offices throughout the country and a field force of men to find buyers.

I do not handle all lines usually carried by the ordinary real estate agents. I MUST SELL real estate—and lots of it—or go out of business. I can assure you I am not going out of business. On the contrary, I expect to find, at the close of the year, that I have sold twice as many properties as I did the past year, but it will be necessary for me to "list" more properties. I want to list YOURS and SELL it. It doesn't matter whether you have a farm, a home without any land, or a business; it doesn't matter what it is worth, or where it is located. If you will fill out the blank letter of inquiry below and mail it to me today, I will tell you how and why I can quickly convert the property into cash, and will give you a complete plan

and terms of handling it. The information I will give you will be of great value to you, even if you should decide not to sell. You had better write today before you forget it.

If you want to buy any kind of a Farm, House or Business, in any part of the country, tell me your requirements. I will guarantee to fill them promptly and satisfactorily.
