Decay of the Teeth

Arises from various causes, but principally it may be attributed to early neglect or the indiscriminate use of tooth powders and pastes, which give a momentary whiteness to the teeth while they corrode the enamel. The timely use of that delicate aromatic tooth wash, Fragrant SOZODONT, will speedily arrest the progress of decay, harden the gums, and impart a delightful fragrance to the breath. It removes those ravages which people sustain in their teeth the from use of sweet and acid articles.
