## **Cattle Market Reports**

Compiled by USDA Market News Service • Oklahoma City-Des Moines-St. Joseph, Mo.-Moses Lake, Wash.

head as indicated NATIONAL FEEDER AND STOCKER CATTLE

(Federal-State Market News) St. Joseph, Mo. June 9

164,300 276,400 269,000 Compared to June 2: Yearling steers and heifers sold steady to 8.00 higher. Steer and heifers calves traded steady to 5.00 higher Feeder steers and heifers in the southeast sold 2.00-5.00 higher. Trade was active on good to

very good demand. The major livestock markets were back in business posting huge gains after being closed last Monday in observance of the Memorial Day holiday. Oklahoma City and Joplin Stockyards saw feeders 5.00-12.00 higher compared to two weeks ago. This was expected as the markets had to play catch up and digest all the

schedule saw heavier receipts than usual as producers are trying to take advantage of the higher market. The CME feeder cattle futures closed Monday in the green at 159.87 for the August contract, fueling buyers to pay more

However, the futures were down the limit on Tuesday closing at 155.37 causing some uneasiness in the cattle industry. There was some evidence that the sharp turn in the futures affected a few cattle markets during the middle

However, most traders shook-off the negative news and continued to purchase yearlings at higher prices as feedlots are trying to keep up with packer demand and keep pen space

Last Friday Ft. Pierre, S.D., hosted the 20th Annual World Livestock Auctioneer Championship contest with almost 12,000 head of cattle on hand. Some of the highlights reported were 86 head of fancy steers weighing 642 lbs. selling for 199.50 cwt. Also over 400 head of steers weighing 670 lbs. averaged 184.07 and 262 head weighing 726 lbs. averaged at

At Tri-State Livestock in McCook, Neb., 300 head of mostly black steers weighing 920 lbs. sold for 158.75 per cwt and in Green City, Mo., 136 head of steers averaging 828 lbs. bring 166.43 cwt.

In the southern plains and southern Midwest, where you see more yearling crossbred cattle with exotic influence, the price margins have narrowed between the medium and large 1 and 1-2 feeders. This is due to the fact that these type of cattle can go anywhere this time of year due to warmer temperatures. Very few sales of slaughter cattle have been reported at the

time of this report as feedlots are holding their A few live sales in Nebraska sold at 136.00 and dressed at 218.00 while in the southern plains trade has been at a standstill. The Choice-Select spread continues to widen posting another record at 30.92 on Friday.

Choice boxed-beef closed Friday 5.97 higher at 251.21 with Select 2.23 higher at 220.29 when compared to last Friday's close. Extreme heat plaqued parts of the Plains and Midwest with temperatures topping in the mid 90s which slowed cattle movement in some areas. Corn planting is mostly complete and hay

cutting is kicking into high gear with plenty of sunshine and no rain in the forecast. Auction volume this week included 52 percent weighing over 600 lbs. and 41 percent heifers. NATIONAL SLAUGHTER CATTLE

(USDA Market News) Oklahoma City, Okla. June 9 Not enough trades in any region to establish

a market trend. Packer demand and seller in-

terest good as CME futures rose at the beginning of the week, but diminished with futures declining at the end of the week. Boxed Beef prices as of Friday afternoon averaged 235.75 up 3.73 from last Friday. The Choice/Select spread is 30.92. Slaughter

cattle on a national basis for negotiated cash trades through Friday afternoon totaled about 44,457 head. Last week's total head count was 114,795 head. MIDWEST DIRECT MARKETS: Live Basis: Steers and Heifers: few 134.00-

Dressed Basis: Steers and Heifers few 216.00-221.00. SOUTH PLAINS DIRECT MARKETS: Live Basis: Steers and Heifers Not estab-

137.00.

SLAUGHTER COWS AND BULLS (Average Yielding Prices) Slaughter cows steady to 1.00-3.00 higher

Slaughter bulls steady to 1.00 higher. Cutter Cow Carcass Cut-Out Value Friday was 179.16 up 0.97 from last Friday NORTHWEST DIRECT CATTLE

(USDA Market News) Moses Lake, Wash. June 9 Last week

Last year 4328 950 Compared to June 2: Feeder steers not well

tested but a firm undertone is noted. Feeder heifers 4.00 higher. Demand continues good for feeder cattle as cattle futures improved early in the week. The feeder supply included 9 percent steers and 91 percent heifers. Near 100 percent of the supply weighed over 600 Prices are FOB weighing point with a 1-4 per-

cent shrink or equivalent and with a 3-8 cent slide on yearlings. Delivered prices include freight, commissions and other expenses. Current sales are up to 14 days delivery. Feeder Steers: Medium and Large 1: Current Delivered Price: 900 lbs. 142.00 lD; July De-

livered Price: 850-900 lbs. 150.00 ID. Aug-Sep

FLUID MILK AND CREAM REVIEW - WEST (USDA Market News) Madison, Wis.

June 8 California farm milk production is currently variable. In some parts of the state, volumes produced are unchanged from last week, whereas in other areas, output is higher due to recent cooler weather. Class 1 fluid demand is lower. The May 4a price (butter/ powder) in California is \$14.43, up 70 cents from the previous month, and \$1.86 higher

from a year ago. This compares to the Federal Order Class IV price of \$14.49 for May. The May 4b price (cheese) is \$15.25, up 95 cents from the previous month, and \$3.88 above a year ago This compares to the Federal Order Class III price for May at \$15.57.

According to some industry contacts, in Arizona, the heat is currently having little impact on milk. Farm milk production took a slight dip this week.

With schools being out, many processors are actively balancing more of their milk. The monsoon season is starting next week Consequently, Arizona will be having torrential rain and dust storms that will more likely

affect their milk output. Class I is moving slower. However, local advertised sales have increased. In New Mexico, farm milk production is steady to slightly

Class I sales have decreased, putting

more pressure on dryers. Inventories are

plentiful, and processing plants are working at full capacity to avoid milk discarding. A few contacts report that some plants are sending milk to calf ranches and ground application of condensed and raw milk. Milk intakes for Class II are stable to slightly increasing as ice cream and frozen dessert

manufacturers increase their orders. Class III interest is flat to lower. A few manufacturers report having repair/maintenance issues that reduced their milk intakes. As the result, system-wide holdovers are high

Pacific Northwest dairy contacts say milk production continues to improve after a hard winter and spring. Some contacts suggest it may be newly lactating cows that have

provided the boost to milk volumes. Warmer

days have improved cow comfort and spring feed is in good supply. With most schools done for the year, milk supplies have shifted to summer consumption patterns.

More milk is available for manufacturing.

Processors say they have plenty of milk

available. Many manufacturers are running

their facilities at or near full capacity. Milk supplies are plentiful for processors in the mountain states of Colorado, Utah and Ida-Manufacturers report no problems getting the milk needed for most processing needs. Milk production is increasing along season-

al patterns and cow comfort is improving across much of the region. Demand for condensed skim is flat in the West. Contacts report that condensed skim is available in the spot market at lower pric-

In addition, it was reported that some processors decided to dry their condensed skim instead of selling it.

Western cream interest continues to be seasonally up for ice cream and frozen dessert makers. With higher temperatures in most part of the West, haulers are taking extra precaution in handling cream, so that they arrive in acceptable conditions.

Cream multiples for all classes range on average from 1.08 to 1.25. However, a few contacts reported multiples in the high 1.30s to low 1.40s. According to the DMN National Retail Report-Dairy for the week of June 2-8 the national weighted average advertised price for one gallon of milk is \$3.34, down \$0.12 from last week, but \$0.90 higher from a year ago. The weighted average regional price in the Southwest is \$2.11, with a price range of \$1.87-2.99

The weighted average regional price in the Northwest is \$2.39, with no price range

According to the NASS Dairy Products report, hard ice cream production in the West region for April 2017 is 16.3 million gallons 7.7 percent lower than a month ago, and 15.5 percent below the previous year.
