The Christian Church organization has turned over the church property to the parties who loaned them money for church improvement, finding it impossible to liquidate. The church felt that this was the thing to do, and thus save foreclosure costs. The parties making the loan have been more than lenient, and had no idea of closing in, but the organization felt that it would be bad business to attempt to keep up the interest. So they did the next best thing—gave the property up so that the loan people could realize to the best advantage. The church is permitted to hold its services in the building for the present without charges. The debt has been increasing rather than diminishing, and this led to the surrender of the lot. The action of the church was voluntee.

COMPLETED CONDENSER HAS A LARGE CAPACITY

Will be Able to Handle 200,000 Pounds of Milk Daily

NEW WORK COMPLETED BY JAN. 1

Building Will be Most Modern Condensery on Pacific Slope

The second unit to the Hillsboro condenser, operated by the Carnation Company, will be completed by Jan. 1, unless there is too much delay over car shortage so as to delay building progress. O. Boen, of Seattle, the construction superintendent, now has a crew of fifty men at work, and the tile and cement walls will be finished within ten or fifteen days, and then concrete laying for the basement floor will start.

The entire structure, the unit built last year, and the one now under construction, will have wall dimensions of 170x210 feet, and when completed the structure will be painted milk white. A new engine room will be installed next Spring, and this too, will get the milk stain, even to the smokestack.

No one realizes what the condensery business has meant to Washington County, and what it has done in the past will be doubled within five years. In fact the company is now building ahead of present business. When the work is completed the plant will be the most modern, although not the largest, on the Pacific coast. It will be able to handle 200,000 pounds of milk daily. Could this supply obtain, at an average of $1.50 per cwt. the year around, it would mean payment to farmers of a million dollars annually. As the product now stands, it is not up to 50 per cent. of this amount. New machinery has been installed, and more is on the way, to reduce the cost of production to the minimum.

Mr. Boen, who is conversant with the Puget Sound milk centers, says Washington County's possibilities are away ahead of that section of the Northwest, and he looks for big business in milk supply within the next few years.

The company is now paying $1.95 for milk—the highest price in the history of the county.

TURKEY SHOOT

Turkeys, geese and chickens to be shot for at the Garden Tracts, west end of Main Street, on Sunday, Dec. 17. Covered stands if it rains. Shells on grounds.

"Hizz Fun Makers," who have been giving entertainments up the valley, opened at the Hillsboro Opera House Monday evening, and will play Hillsboro for several weeks. Visitors are given an entertainment that is mirth-provoking, and the public is invited out to enjoy an evening of laughter.

The Hillsboro Creamery has leased the Pythian Building salesroom, formerly occupied as a grocery and meat market, and the room has been remodeled and partitioned for convenience. The Gillenwater Bros. have been doing a nice business, and the new quarters will give them ample room to expand.

The building occupied by Mr. and Mrs. F. W. Phillips, on Main, near the Crescent Theatre, was partially burned about 5:30 last Saturday evening, the fire catching from the flue, where the stove pipe enters. Mrs. Phillips had just built a fire, and the stove pipe parted from the flue, sparks catching the wall paper. The loss was several hundred dollars, partially covered by insurance. The piano was taken out after it was badly scorched. The insurance will help some, but it will still leave a loss of two or three hundred dollars.
