Ceilings Urged Prevent Waste Farm Products

Clinton P. Anderson, secretary of agriculture, Wednesday urged congress to link the farm price-support program with some system of production controls to ward off wasteful and expensive overproduction.

"Our price policy can be made to serve the long-time interests of both farmers and producers," Anderson told the house agriculture committee as it opened hearings on farm price support. "Or it can lead to waste of our farm production, our money, and our soil. We must choose well."

He said there is no immediate danger of a disastrous break in farm prices.

Willie Goes to School at 23

Everybody's joshing Willie Wells about going back to school. They remember when Willie would hide out in the woodshed—scared to bring his report card home to Pa.

But under the G.I. Bill of Rights, Willie (who has a wife and baby) is getting a free education at the Agricultural College. And Uncle Sam is giving him a fine report: "Deportment, excellent; Progress, above average."

That goes for all those undergraduate veterans. Like Willie, they appreciate an education more than ever now. They're industrious and well-behaved—their favorite beverage is milk, or a temperate glass of beer. For them the "three R's" seem to mean: Responsibility, Resourcefulness, Restraint.

From where I sit, cynical folks who thought veterans wouldn't want to return to school—wouldn't stick to steady habits of work and moderation—have their answer in "undergraduates" like Willie.
