LUXURIES AND TRAVEL MUST PAY SHARE OF AMERICA'S WAR BILL

Further Differences Between Senate and House Measures Pointed Out.

EXCISE TAX UPON MOTORS

Annual Tax Imposed on Automobile and Motor Boats by Senate Bill's Provisions.

(NOTE—In a previous dispatch dealing with the pending revenue bill, analysis has been made of differences between the bill passed by the house and the one reported by the senate committee on finance. Because of the loss of estimated revenue from distilled liquors, resulting from the food administration bill, Chairman Simmons of the senate finance committee has withdrawn the revenue bill from the senate, so it may be further revised to make up the loss of revenue from whiskey and brandy. He estimates the total additional revenue required on this account at $620,000,000, made up as follows: Present tax on distilled spirits, $210,000,000; additional tax proposed to be levied, $210,000,000; appropriation required to take over liquor in bond, $200,000,000.)

Washington, July 13.—(WASHINGTON BUREAU OF THE JOURNAL)—Radical changes have been made by the senate finance committee in rewriting the public utility and manufacturer's provisions of the pending revenue bill, the senate bill showing numerous eliminations and reductions in the taxes proposed.

Previous dispatches in this series have told of the changes made by the senate revisers in the income tax, excess profits, beverage and tobacco taxes. Of particular interest are the two titles of the bill next in order, one dealing with public utilities and transportation, the other with annual excise taxes on articles in common use, yet rated as luxuries, such as automobiles not employed in business, motor craft, toilet articles and patent medicines.

Public Utilities Clauses

First will be pointed out the differences in house and senate draft in Title V, covering public utilities and transportation.

The house bill placed a tax of 6 per cent an express charges. The senate bill makes the tax one cent on each 25 cents.

The house bill taxes passenger fares, rail or water, 10 per cent of the cost of each ticket; the senate changes this to 5 per cent. Exactly the same differences are made as to seats, berths and staterooms. The house bill allows exemption for commutation tickets for trips less than 30 miles or costing up to 25 cents; the senate bill extends the exemptions to 40 miles and to 35 cents.

The senate bill strikes out a proposed tax of 5 per cent on electric light, electric power for domestic purposes, and telephone service.

Insurance Taxes Cut Out

The senate bill also strikes out all taxes proposed by the house bill on life, marine, inland, fire and casualty insurance.

The senate bill retains house provisions for a 3 per cent tax on freight transported by rail or water, the senate adding a like tax on motor truck freight when in competition with railroads or waterways.

The senate bill retains the house section for a 5 per cent tax on oil carried by pipe line and five cents on telegraph and telephone messages costing over 15 cents.

The senate bill has made over Title VI, which was known as the war manufacturers tax in the house, and has renamed it the war excise tax.

Taxes On Automobiles

Under this head, the house bill imposed a tax of 5 per cent of the sales price on automobiles, motorcycles and bicycles, and tires. The senate bill substitutes an annual excise tax to be paid by the owner on automobiles and motorcycles not used exclusively for business. For motorcycles, $2.50; autos originally selling for not over $500, $5; costing from $500 to $750, $7.50; costing $750 to $1000, $10; for each additional $500 in cost price, $5 The same schedule applies to new machines, when purchased.

The senate bill strikes out the proposed taxes upon musical instruments and records, moving picture films, jewelry and chewing gum.

Motor Boats Taxed

The house bill levied 5 per cent of sale price on motor boats and other pleasure craft when sold by the maker or importer. The senate bill substitutes an annual excise tax, as in the case of automobiles, based upon the size of the boat, ranging from 50 cents to $2 for each foot of dimension, with a flat tax of $5 for motorboats of not over five net tons.

The senate bill reduces from 5 to 2 per cent the tax to be paid by manufacturers, importers or producers of accessories for games, such as baseball bats and balls, footballs, tennis, golf and billiard balls, fishing rods and reels, dice and games. The senate bill adds children's toys and games to the list of articles to bear this tax.

Like reduction from 5 to 2 per cent is made by the senate measure on perfumes and toilet articles and patent medicines. The senate bill also adds a 2 per cent tax on the original sale price of cameras.

Finally, under this title, the senate bill eliminates all taxes which the house contemplated should be paid by retail dealers on their stocks in hand, held for the purpose of sale, thus lifting a large load from the mind of the retailer, if the senate provision prevails.

Medical Society Will Hear Chicago Talker

Dr. A. B. Kanavel, professor of surgery of Northwestern university medical school, Chicago, will lecture before the City and County Medical society Monday evening at the Portland hotel. His topic will be "Infections of the Hand," a subject on which he is an authority.

Because a big percentage of accidents involve injuries to the hands, the state industrial accident commission has taken a good deal of interest in this lecture.

Warning Signals Are Necessary

Salem, Or., July 13.—The public service commission is sending to all cities and towns and county courts a letter calling attention to chapter 429, laws of 1917, which requires every city, town or county to place and maintain warning signs on every street and highway where the same crosses a railroad at grade.

Date Set for Rate Hearings in Oregon

The Oregon public service commission has announced the dates of four hearings on the 15 per cent increase in freight rates of four small railroads, which have refused to withdraw their applications for the increase on the ground that their business has not increased in the same proportion as their expenses.

The hearings are scheduled as follows: July 17, at Baker, for the Sumpter valley road; July 23, at Hood River, for the Mount Hood road; July 24, at The Dalles, for the Great Southern; August 1, at Cottage Grove, for the Oregon & Southwestern.

ALASKA'S SCHOOLS MAKING PROGRESS; GOVERNMENT AIDING

City Schools Standardized and System Is Declared Efficient.

Alaska's educational needs are being taken care of in commendable manner, according to L. D. Henderson, territorial commissioner of education, who, with his wife, is attending the Portland N. E. A. convention.

Mr. Henderson said: "There are 3500 students in the schools for white pupils in the Alaska territory. We have eight high schools. Native Indians and Esquimos are being educated, also. There are 11 schools in incorporated cities and 35 in outside towns. Fairbanks will have a fine agricultural college, plans for which are now under way. Federal aid in project is a factor which will assure its success.

"All of our city schools are standardized and in general efficiency the schools are up to the high mark of excellence of many of the big eastern cities. Juneau is now erecting a $75,000 school building. It will be provided with modern conveniences and domestic science and manual training courses will be taught in the school. W. T. Loff of Seattle is head of the government schools for the natives."

Mr. Henderson will soon start on a tour of inspection of the schools of the district of Alaska. Before taking up his present work he was for three years superintendent of the schools at Juneau. He also was formerly connected with the Idaho educational system.

There are five Alaskan delegates at the Portland convention. Among these is A. M. Matthews, superintendent-elect of Juneau. Mrs. Matthews is also a convention guest.

Berliners Discard Shoes, Save Leather

Berlin, Via London, July 13.—(U. P.)—Berlin's bank clerks set an example today in self sacrifice. To aid the movement in the economy of leather, the clerks discarded their shoes. Scores of barefooted individuals were seen on the principal streets, gingerly stepping along and saving their tender feet as much as possible.

Berlin's shoe stores are now selling wooden sandals, the only leather being in the toe guards.

Woman Shoots Paramour

Great Falls, Mont., July 13.—(I. N. S.)—Because she says he "quit" her, Grace Vale early today shot and probably fatally wounded Robert Climton, her paramour. The shooting occurred in an attorney's office where the pair had gone to settle their differences through court action. Five shots hit Climton.

Ashland Man Is Head of Pharmacists

Oregon Association in Convention at Seaside Adopts Resolutions Relative to Legislation Now Pending.

Seaside, Or., July 13.—W. Hall McNair of Ashland, was elected president of the Oregon Pharmaceutical association at the annual convention being held in this city. Other officers chosen are: H. F. Brandon, Portland, first vice president; E. A. Robinson, Portland, second vice president; J. C. Perry, Salem, third vice president; A. W. Allen, secretary, and B. F. Jones, both of Portland, treasurer.

E. A. Robinson, Portland; A. E. Crosby, The Dalles, and D. O. Woodworth, Albany, were recommended for appointment as members of the state board of pharmacy.

The convention closes today. There have been entertainment features galore, both for the men and women of the party.

Resolution have been adopted indorsing the Stephens bill to do away with cut-rate prices and opposing house bill No. 4280, intended to raise the tax on drugs at the expense of the druggists.

Every Housewife Must Do Her Share in This World War

To help give the Allies enough wheat—you must serve one meal a day without white bread—you should eat meat but one meal a day. Your sugar should be cut down at least one-fourth. These are little things to do for your country, but it will take effort on your part to change your daily habits. Study these lists—you will see that the prices are based on what the goods cost—not on what it would cost to replace them now—and you will be able to serve good meals—you will be able to save both money and food—and above all—it will give you the chance to do your bit in winning the war.
