Your eyes are your best friends; without them you would be horribly handicaped in life's battles. Yet as a rule we give these best friends the very least attention.

Many believe that in wearing glasses, they must necessarily have weak eyes. This is not the case. Our vision may be excellent but due to the shape of the eye-ball, we obtain that good vision by excessive muscular strain

If we were asked to over strain the other muscles of our body to the same extent that we over strain the eye muscles, we would refuse.

Why do we do this? The most common excuse is. "I don't like to wear Glasses."

We insure our property against loss by fire; our lives we insure against death Why not insure your eyes and conserve your vision by having your eyes properly examined and fitted to the correct glasses.

Dr. Burgess is an EYE SPECIALIST and that means that he gives his entire attention to the eyes. His examinations are made scientifically and are consequently thorough and complete.

Dr. Burgess is not an eye-glass peddler, he does not sell glasses, but he does sell service and knowledge which is second to none. If glasses are not required he will gladly tell you so.
