Gentle Reader—Do you know that the FASHION School Desk, is in use at the NEWBERG ACADEMY, where it has given good satisfaction four years. The FASHION Desk was selected at Albany in preference to all others. The FASHION School Desk is in use in the public schools of Portland, where the best that money can buy is indulged in. The FASH-

ION Desk won the laurels at the Salem public school, the contract price being 34 cts. per Desk higher than the price quoted by the Victor agent, and all other competitors were knocked out in the first round. This was the strongest contest in the state, lasting five days between the Victor and FASHION. The wood and iron of the FASHION Desk are united together throughout by the patent T head fastening which has been acknowledged to be the strongest union of wood and iron known—the seat hinge is strong and capable of sustaining an enormous weight. The Desk is finished in a first class manner and has the largest sale of any Desk in the Willamette valley.

One of the BEST "Tel." ever made in the world. Our facilities are unequaled, and to introduce our superior goods we will send FREE to ONE PERSON in each locality, as above. Only those who write to us at once can make sure of the chance. All you have to do in return is to show our goods to those who call—your neighbors and those around you. The beginning of this advertisement shows the small end of the telescope. The following cut gives the appearance of it reduced to

about the fiftieth part of its bulk. It is a grand, double size telescope, as large as is easy to carry. We will also show you how you can make from $5 to $10 a day at least, from the start, without experience. Better write at once. We pay all express charges. Address, H. A GREAT POWER.—More than thirty-two thousand public schools of the United States have each been supplied with a copy of Webster's Unabridged Dictionary. Think what that means. If there is an average of 50 scholars to each school, it means that constantly a million and a half of American youth have the privilege of consulting and studying this great work in the course of their education. Who can estimate the power for intellectual stimulation and development which is thus actively at work all the time? The preeminence of the American people for general accuracy and facility in the use of the English language is not likely to be lost. Well and truly has Noah Webster been called THE SCHOOLMASTER OF THE REPUBLIC.

New Orleans has done in 1889 the largest business for many years. Her manufactures are greater than ever before, and her receipts of cotton have been proportionately large.

Christmas, 1889, will be remembered as a day when ladies in some parts of the north used parasols to shade them from the sun rays while walking. In Jersey it was so warm that the mosquitoes which had been left over tuned up their pipes again.
