THE TIMES-HERALD is proud of being recognized by the democratic convention of this county and appreciates the encouraging words of the committee on resolutions. It has ever been ready to do its part in the cause of democracy and in fact anything that tends to the building up of the country. THE TIMES-HERALD has always enjoyed the confidence of the party whose principles it espouses. It has never went begging politically or otherwise for support, and does not believe in trying to run down other institutions in order to build itself up. A paper that cannot be relied upon has no influence for good or evil. A paper that changes its politics as often as the moon changes is not considered to be a very stable article and the people will not consider anything appearing in its columns very seriously. THE TIMES-HERALD can always be relied upon in all things of importance to the citizens of Harney county. The peoples party has leased a column of our paper to express their feelings, politically or otherwise, granting us the right to reply at all times if we so desire to any article published in their column. This we hope is not considered by the peoples party any disgrace to it, and if the party is satisfied we consider ourselves honored in having the confidence of the party believing that party to be convinced of the fact, that THE TIMES-HERALD will treat its members with courtesy, fairness and respect.

Fusion Platform.

United in a common cause for the sacred purpose of preserving the principles of government by the whole people, in fact as well as in name, resting and maintaining equality, under that government, of all classes, we, the people's democratic and silver republican parties of the state of Oregon, waiving all minor difference, and uniting for the purpose of carrying out the great underlying principles upon which we are all agreed, do make and present to the people of this state the following declaration of principles and to the carrying out of which we solemnly pledge each and every candidate upon our united ticket:

First—We demand the free and unrestricted coinage of silver and gold at the present legal ratio of 16 to 1, without waiting for the consent of foreign nations; and we are unalterably opposed to the present republican administration in demanding the retirement of greenbacks, and the turning over of the money-making power of the government to the national banks, as presented by the bill drawn by the republican secretary of the treasury, and indorsed by President McKinley; and we especially denounce the avowed attempt by said bill to fasten the country irrevocably and forever upon the gold standard.

We demand a national money, safe and sound, issued by the general government only, without the intervention of banks of issue, to be a full legal tender for all debts, public and private; also a just, equitable and efficient means of distribution direct to the people that the law shall dictate shall be the government.

We demand that the volume of circulating medium be specially increased to an amount sufficient to meet the demands of the business and population of this country, and to restore the just level of prices of labor and production.

We favor such legislation as will prevent for the future the demonetization of any kind of legal-tender money by private contract.

We demand the government, in payment of its obligations, shall use its option as to the kind of lawful money in which they are to be paid, and we denounce the present and previous administrations for surrendering this option to the holders of government obligations.

We demand that there shall be no further issue of United States interest-bearing bonds.

We demand that postal savings banks be established by the government for the safe deposit of the savings of the people and facilitate exchange.

We demand the election of United States senators by direct vote of the people.

We demand the initiative and referendum system of law-making in its optional form, local, state and national, and the submission by congress of all important national questions for an advisory vote of the people, until such time as the national constitution shall have been amended so as to provide for direct legislation.

We condemn as dangerous and unjust the surrender, in all departments of the government, to the influence of trusts, corporations and aggregations of wealth generally; and the packing of the highest courts of the land with corporation lawyers, too ready to do the will of their late employers, and to set aside valid and wholesome laws passed by the legislative departments of the states and government, upon flimsy pretexts, at the behests of such institutions.

We are opposed to government by injunction.

In state matters, we demand:

A simple and well guarded registration law.

A more equitable mode of appointing judges of election.

Such laws as regulate the operation of trusts for whole and all of the year in the waters within the jurisdiction of the state.

We denounce and condemn the corrupt and extravagant republican legislative assemblies, and charge that the republican party, in its greediness for the spoils of office, has become divided into warring factions, so that it is incapable of government as exemplified by the condition existing in the office of the state treasurer, there being at this time more than $50,000 therein wrung from the people by the process of taxation, while state warrants are stamped "Not paid for want of funds."

We demand that all district and county officers be placed upon salaries commensurate with the duties to be performed by them.

Inasmuch as railroad and other corporate property is not bearing its proportion of taxation, we demand that such property shall bear its just and equal share of the expenses of government.
