NEW VARIETY OF WHEAT.

What its name is Emblematical of.—The DesMoines *Register*, in noticing a new variety of wheat grown in Polk county, Iowa, called the "Copperhead Wheat," says of it:

Farmers from different sections of the country report that the kind of wheat known as "Copperhead Wheat" stood the wet weather better than any other. Whisps of wheat of this and of the Goose variety, grown in adjoining fields, have been shown us, and while the last named variety was blighted badly, the other had but very few heads in it but were perfect. That it has a very disagreeable name everybody admits, but that it is a hardy, flood proof grain, seems to be proven by the experience of practical men.

The copperhead was the emblem of liberty, adopted by the patriots of the revolution, who fought for and established our Republican form of government. The name was never "disagreeable" to any citizen of the United States, but the tories of 1776 and the radicals of 1869, who are "purps" of the same litter of Imperial despotism. Political copperheadism is like the wheat of that name—it never falls down, mildews nor rots, on account of the destructive influence of radicalism, any more than the wheat of that name does, on account of the disastrous floods which have fallen the present season, for a sign of God's displeasure, on account of the wickedness and corruption of the radical party in endeavoring to convert our republican form of government into a consolidated Imperial despotism, with national bankers and other untaxed bondholders for rulers, and the working men and women for their slaves.—*Keokuk Constitution.*

FEED THE FRUIT TREES—It must be apparent to every reflecting person that the material round about a fruit-tree, which renders important aid in the production of fine fruit of any kind, must necessarily be more or less exhausted after a vine, bush, or tree has produced abundant crops for several successive seasons. For example: A large pear-tree or apple-tree will frequently yield from ten to sixteen bushels of fruit annually. Many trees have produced more than twice these quantities at one crop.

After a few seasons, the material that the roots must be supplied with, in order to develop fruit, will be more or less exhausted. For this reason, fruit begins to fail; and the failure is often attributed to the east wind, or some mysterious atmospheric influence, when, in reality, the *sole* cause is *starvation*, arising from an impoverished soil.

The remedy is to feed the roots of all kinds of fruit-trees with lime, wood-ashes, gypsum, chip-dirt, bones, fishes, and any thing that will renovate an impoverished soil.

It is evident that fruit-trees cannot produce fine fruit out of nothing, or out of such material as may be desirable for some other purpose.—*Hearth and Home.*

A BOY'S COMPOSITION ON ICE.—I like ice. When its cold I like it best. Ice is good for a great many things. It is good to skate on, and its good to make ice cream. I like to skate. Sometimes I lend my skates to Lizzie Jones, and she lets me buckel them on for her. She wears striped stockings, with red white and blue running around them, and her legs look like a stick of candy. Father says ice is good in cobblers. I dont know why it is better in cobblers than any other ways. I suppose I shall be a great deal wiser when I grow up. I like ice cream with plenty of vanilla in it. There's more ice cream in the summer than in the winter, and more ice in winter than in summer—there are heaps of things I don't understand. Mother says if I eat too much ice cream it will make my stomach hurt. I eat all I want to, but I am careful not to eat too much, because mother says not to. When next winter comes Lizzie Jones and I are going to skate some more. There will not be any more winter until summer comes. The seasons are mighty cold in this country. Sometimes winter comes before summer, and sometimes summer comes before winter. Father says I may have a new pair of skates next summer. When I get to be a man, I am going to pour red stuff on the ice, to warm it, before I put it in my mouth, like father does.—*Copperhead.*

—An elderly gentlemen, returning home on Sunday from church, began to extol the merits of the sermon to his son. The following short dialogue tells the story:

"I have heard, Frank," said the old gentleman, one of the most delightful sermons ever delivered before a Christian society. It carried me to the gates of heaven.

"Well, I think, replied Frank, you had better have dodged in, for you will never have such another chance.

A POINT WELL PUT.—We clip this from the San Francisco *Herald:*

One hundred Chinamen will live in a house, the whole of which would be occupied by one white laborer and his family. This is a fact demanding the consideration of those of our citizens who employ their money in building houses for laboring people to live in. These one hundred Chinamen will perform the work of fifty white men; the white men are out of employment; they have been discharged, and their places filled with cheap Chinese laborers. The white laborers must seek employment elsewhere, and their families go with them. Forty-nine houses are unoccupied, and landlords have not yet devised a practicable scheme for collecting rents from tenantless houses. Continue to crowd out the white laborer and fill his place with Chinamen, and not many months will pass away before 'To Let' will embellish the doors and windows of hundreds of dwelling houses within our towns and cities. The result is inevitable.

BILLINGS AND BEES.—The bumble bee is one uv nature's sekrets. They probably have a destiny tew fill, and are probably necessary, if a fellow only knew how. They live apart from the rest of mankind in little circles, numbering about seventy-five or eighty souls. They are born about haying-time, and are different from any bug I know uv; they are the biggest when just born. They resemble some men in this respect. Their principal bizness is making poor honey, but they don't make eny tew sell. Boys often rob them out uv a whole summer's work, but there is one thing about the bumble bee that boys always watch dreadful close, and that is their helm. I had rather not have all the bumble bee honey there iz between here and the city uv Jerusalem, than to have a bumble bee hit me with his helm when he comes round suddin'. They are different from other war vessels; the helm always minds the bumble bee.

—American graveyards yield some curious fragments in the way of epitaphs; but we have never yet met with such a marvelous combination of business and pathos as is contained in the following obituary notice, culled from a Spanish journal:

"This morning our Saviour summoned away the jeweler Siebald Illmaga from his shop to another and a better world. The undersigned, his widow, will weep upon his tomb, as will also his two daughters, Hilda and Emma, the former of whom is married, and the latter is open to an offer. The funeral will take place to-morrow. His disconsolate widow.

"VERONIQUE ILLMAGA.

"P. S.—This bereavement will not interrupt our business, which will be carried on as usual, only our place of business will be removed from No. 3 Tessi de Teisnturiers to No. 4 Rue de Missionaire, as our grasping landlord has raised our rent."

—A couple of Yankee girls put a bull frog into the hired man's bed to see if they could get him to talk. Daniel threw the frog out of the window and never said a word. Soon after he put a bushel of chestnut burs into the girls bed, and about the time he thought they would make the least shadow, Daniel went to their door and rattled the latch furiously. Out went the light and in went the girls, but they didn't stick, though the burs did. Calling them, he begged them to lie quiet, he only wanted to know if they had seen anything of that pesky bullfrog, he'd gin two dollars to find him.

A NEW EDITION of GREENBACKS.—In addition to the new fractional currency the Treasury Department will soon issue new United States notes of the denomination of one dollar. The plates for these notes are now being engraved. The vignette of Chief Justice Chase in the left face of the notes will be taken off and a bust of Washington substituted. This, and changes in the vignettes recently made on the face of the fractional currency, is in accordance with an act of Congress prohibiting the vignettes of persons now living from being on the face of the United States currency.—*N. Y. Herald.*

LAND BUSINESS.—We are indebted to Jacob J. Clark, Esq., Register, for the following list of lands entered at the land office at Olympia, W. T., under the several acts of Congress, during the month of July, 1869: Sold for cash, 2,632-54-100 acres; entered under home stead act, 3,028 87-100 acres; entered under donation act, 802 38-100 acres; declatory statements filed on 600 25-100 acres; entered with military bounty land warrant, 160 acres. Total for July, 7,524 04-100 acres.—*Olympia Transcript.*

—An Irishman just from the sod was eating some old cheese, when he found, to his dismay, that it contained living inhabitants.

"Be jabers," said he, "does your chase in this country have childer?"

WHALES AND MACKEREL.—The Monterey *Democrat* reports whales in large numbers in the Bay of Monterey. Seven were bagged in one week by the whalers in that place. Mackerel have also made their appearance, after an absence of many years.

ASIATIC CHOLERA—THE STRONGEST PROOF OF INTRINSIC MERIT.

DEAR SIR—I ought to have acknowledged, long ago, the box of Pain Killer you had the goodness to send me. Its coming was most providential, I believe hundreds of lives were saved, under God, by it. The Cholera appeared here soon after we received it. We resorted at once to the Pain Killer, using as directed for Cholera. A list was kept of all to whom the Pain Killer was given, and our native assistants assured us that eight out of every ten to whom it was prescribed recovered. It has proved an incalculable blessing to multitudes of poor people throughout all this region. Our native preachers are never willing to go out on their excursions with out a supply of the Pain Killer. It give them favor in the eyes of the people, and access to families by whom, otherwise, they would be very indifferently received.

Believe me, Faithfully Yours,

ROBINSON'S
Celebrated Magic Soap Powders!
Prepared in 6, 12, and 24 lb. Boxes,
READY FOR WASHING!
This is cheaper than Common Soap. It removes Paint, Tar, Pitch and dirt of every description; and which has given such general satisfaction, by proving that your washing can be done with one-half the time and labor of the old mode. Thus labor saved is money made; as wash-boards, machines and hard rubbing to wear out clothes, is entirely dispensed with, and the washing for a dozen persons can be done in two hours. Thus the cost of your washing being three-fourths less than by any other process, as you use no other soap.
These Prepared Powders or Soap have not only proved themselves superior for washing any and all kinds of goods, but proved after one year's use not to injure in the slightest degree any fabric of the finest texture; and, also the finest article for the hands, as it makes them soft and white, as well as your clothes. It also keeps your hands from chapping when exposed to the air.
We defy the world to produce its superior for washing any and all kinds of goods. Our object is to save your time, expense, hard labor, and especially the woman who has to wash.
We take pleasure in announcing a few of the many ladies' names—by their consent—who have used our Prepared Magic Soap Powders, from six months to one year:
