HI-WAYS TO HEALTH
by ADA R. MAYNE
OREGON DAIRY COUNCIL

If you are not already butter boiling your vegetables, you have a new culinary thrill ahead of you. It isn't really new of course, this butter boiling, but it is novel and appealing idea to those who have cooked one or more vegetables a day, in the same old fashion, for years on end.

Like many other of our so called new methods, this one perhaps dates back to ancient days. For instance, the Chinese never boil their vegetables to death as so many occidentals do, but cook them in a manner similar to butter boiling, just long enough to make them tender.

Butter boiling retains the minerals, vitamins, sugar and color of fresh vegetables, beside preserving their firmness and succulence and imparting to them a rich flavor. Peas, for instance, retain their roundness, rich green coloring and sweetness; carrots are firm, sweet and deep yellow as when raw; squash not only has a finer flavor, but does not require careful draining to remove the usual superfluous water.

Following is the approved method of butter boiling vegetables. No special type of cooking utensil is required.

Preparation of Vegetables

Each vegetable may be prepared for ordinary boiling, carrots cut in rings about one fourth inch thick unless exceptionally young and small, when they may be cooked whole; cauliflower heads broken into flowerets, and cabbage cut fine.

Place prepared vegetable in a colander and rinse thoroughly. Turn dripping into a cold saucepan into which butter (one tbsp. to a lb of vegetables) has been placed. (Don not melt butter. Cover carefully with freshly washed, drenching lettuce leaves, tucking them around the edges of the vegetables to retain the moisture while cooking. Cover the saucepan with a smug fitting cover and put over a very low heat to cook.

Heat and Time of Cooking

When gas heat is used the flame should be turned low as possible without danger of its becoming extinguished: "low heat" should be used on an electric stove and on a wood, coal or gasoline stove the same care should be taken to have the heat as low as is practical.

Cooking time will depend upon the type of vegetable, freshness and atmosphere. In other words, you must make your own time chart. But for the most part vegetables will require the same amount of time as for ordinary boiling. Each vegetable may be tested with a fork the first time it is butter boiled, and when tender the cooking time recorded on an individual chart.

The vegetable should be removed from the stove when tender, seasoned and served hot. If you have been in the habit of cooking vegetables until they are soft enough to fall apart, try shortening the time so that they will be tender, but firm enough to retain their crispness and shape.

Fruits

Caller—And how is your dear little boy? I remember he used to be so fond of apples.

Mother—Yes, he was, but lately he seems to be much more interested in peaches and dates.

Head of the Class

Teacher—Johnny, name and describe the zones.

Johnny—Yes, ma'am. The principal zones is masculine and feminine. The masculine is the temperate and intemperate; the feminine is the frigid and the horrid.

Wombat—I suppose you always let your wife have the last word?

Jawish—Yes, and I'm glad when she comes to it.
