Mr. Alexander remarked that when he came to Central Point there wasn't a lawn in the town and that a couple of cows would be parked in the yard to act as lawnmowers.

Vaccination

Since small-pox is prevalent in the valley, high school and grade school students were given an opportunity, Tuesday morning to be vaccinated for the nominal sum of ten cents apiece

Vaccination was argued "pro" and "con" among the students. Vaccinationists proudly displayed their honorable wounds and anti-vaccinationists stood around with smug expressions on their faces and predicted dire results.

All in all, the ordeal was quite gory. Several weaker souls succumbed and passed entirely out of the picture. Fans and water were plied vigorously and these unfortunates revived and went staggering weakly about, trying to convince themselves that they were all in one piece.

The doctor said the victims could be expected to take to their beds in about six or seven days. Said victims are scanning their incisions and waiting eagerly for the first signs of a collapse.

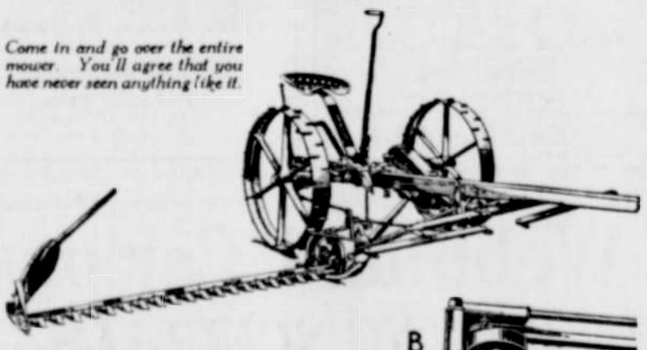
McCormick-Deering Mowers Have Always Been Good
and the
No. 7 Enclosed Gear Mower Is the Best Yet

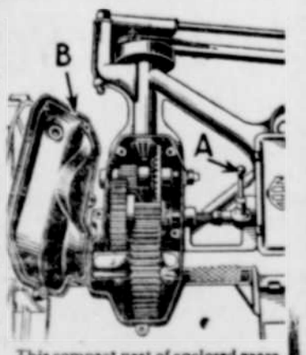
Come in and go over the entire mower. You'll agree that you have never seen anything like it.



WE are anxious to have all our friends see the new McCormick-Deering No. 7 Enclosed-Gear Mower. We think it is one of the finest pieces of farm equipment we have ever sold!

For example: The entire operating mechanism, including drive gears, differential, and countershafts, is assembled compactly in an oil-tight gear housing and runs in a bath of oil. There are four high-grade roller bearings. Operation is so smooth and noiseless that you can scarcely hear the light hum of the sickle!

Special oil seals at the ends of the main axle and fly-wheel shaft, and the oil-tight gear box prevent leakage and protect all working parts against the entrance of dirt and other abrasive materials. Floating action of cutter bar provides ample play without disturbing knife registration.



This compact nest of enclosed gears runs in a bath of oil—a full gallon. The cover, B, makes the gear case dust-proof and oil-tight. Clutch is thrown in and out by lever, A.
