Stock Market Pushes Near 15-Year Mark

NEW YORK, April 9—(AP)—The stock market pushed to within a shade of its 15-year peak of February 2 today with industrial shares leading the advance.

The Associated Press 60-stock average climbed .8 of a point to 80.3, where it was just .1 of a point below the February top. Industrial and utility components of the average broke through their highs of two months ago.

Bullish sentiment which brokers said was based on anticipation of new government price adjustments and further relaxation of controls in machinery and equipment industries took hold from the start.

Motors, steels, and retail stores, along with building, air transport and oil shares, were leaders in the upturn. Rails were aided by announced plans to seek freight rate increases. Stock split-ups helped individual stocks.

Transfers of 1,710,000 shares compared with 1,250,000 Monday. Of 1031 issues registering, the second broadest market since late February, 625 advanced and 248 declined.

Rye Continues At Record High

CHICAGO, April 9.—(AP)—May rye marked up another 26-year high in grain futures trading today when it advanced the permissible 5 cent limit and finished at $2.37⅞.

Moderate commission house demand uncovered light offerings, after an easy start, and when a mid-morning advance of 5 cents at Minneapolis was marked up, short covering came into the market and despite some profit cashing the advance was steady.

Deferred oats, the only other contracts not at ceiling prices, were easy at the start and did not climb to above yesterday's close until near the finish when some aggressive buying came into the pit.

At the finish wheat, corn and barley were unchanged at ceiling prices, oats were unchanged to ½ higher than yesterday's close, May 83, and rye was unchanged to 5 cents higher, May $2.37⅞.

DENMARK HAS MEAT

WASHINGTON, April 9.—(AP)—Cold storage warehouses in Denmark are well stocked with meat and hungry Europeans would like to buy, but UNRRA said today that other commodities have a higher priority on available shipping space.
