GALVANIZED

A Steel Windmill and Steel Tower every 3 minutes. Three figures tell the story of the ever-growing, ever-going, everlasting Steel Aermotor. Where one goes others follow, and we "Take the Country."

Are you going to have low the Aermotor Co. in the 4th year of its existence, able to make many times as many windmills as all other makers combined? Are we able to offer the Steel Wind, the Steel Fixed Tower, the Steel Tilting Tower?

Is it worthwhile to be a Solid in which there has been no change for 12 years, and in which there seemed no talent or ability, and none has yet been shown enough to make imitation of our inventions.

Before commencing the manufacture extensive scientific investigation and experiments were made by a skilled mechanical engineer in which over 5,000 dynamometric tests were made on 61 different forms of wheels, propelled by artificial and therefore uniform wind, which settled definitely many questions relating to the proper speed ratio, form, angle, curvature and number of sail wheels, the best form, angle, curvature and number of sail wheels, the resistance of air to motion, obstructions in the wind, such as heavy wooden arms, obstructions before the wheel, as in the stationary mill, and many other observations, though not less important, doubtless. These investigations proved that the power of the best wind wheels could be doubled, and the AERMOTOR daily demonstrates it has been done.

All Twelve Points of the Aermotor Co. that guarantee its goods satisfactory or pays freight both ways, and is the only one in the factory which enables it to furnish the best article at less than the poorest is sold for. For all this we furnish the most perfect bearings ever put in a windmill, and have made an exhaustive revision of the Aermotor and Towers.

If you want a strong, still, Steel Fixed Tower—or if you want an iron tower you don't have to climb—the Steel Tilting Tower, and for Water that runs when all other wind mills stop, pumps you less than wind and lasts ten times as long as the Steel Aermotor; or if you want a Geared Mill, which will run in light winds, grind, saw feed, pump water, turn air, or do any work that does the work of a horse, or a Power Mill, write for copiously illustrated printed matter, showing every conceivable shape of windmill construction and work, to

The Aermotor Pneumatic Water Supply System enables you to supply every part of your house with water without an Elevated Tank.
