A Steel Windmill and Steel Tower every 3 minutes.

☞ These figures tell the story of the ever-growing, ever-going, everlasting Steel Aermoter. Where one goes others follow, and we "Take the Country."

GALVANIZED It is not enough to make pretty goods at a wheel of extraordinary merit. That is signed upon and sold by us as painting. The Steel Aermotor is galvanized after it is made, thus protecting every part of the wheel from rust and decay.

AERMOTOR

The Aermotor Pneumatic Water Supply System enables you to supply every part of your house with water without an Elevated Tank.

though sold, we were unable to make all of the 20,049 Aermotors in '91. Orders often waited 3 weeks to be filled, but now we have vastly increased our plant and are prepared promptly to place our increase in every habitable portion of the globe.

Are you curious to know how the Aermotor Co. in the 4th year of its existence, came to make many times as many windmills as all other makers combined? How we came to originate the Steel Wheel, the Steel Fixed Tower, the Steel Tilting Tower?

1st. We commenced in a field in which there had been no improvement for 22 years, and in which there seemed no talent or ambition, and none has yet been shown except in feeble imitation of our inventions.

2d. Before commencing the manufacture, exhaustive scientific investigation and experiments were made by a skilled mechanical engineer, in which over 5,000 dynamometric tests were made on 41 different forms of wheels, propelled by artificial and therefore uniform wind, which settled definitely many questions relating to the proper speed of wheel, the best form, angle, curvature and amount of sail surface, the resistance of air to rotation, obstructions in the wheel, such as heavy wooden arms, obstructions before the wheel, as in the vane less mill, and many other more abstruse, though not less important questions. These investigations proved that the power of the best wind wheels could be doubled, and the AERMOTOR daily demonstrates it has been done.

3d. To the liberal policy of the Aermotor Co., that guarantees its goods satisfactory or pays freight both ways, and to the continuous output of its factory which enables it to furnish the best article at less than the poorest is sold for. For '92 we furnish the most perfect bearings ever put in a windmill, and have made an exhaustive revision of the Aermotor and Towers.

If you want a strong, still, steel Fixed Tower—or if you want the tower you don't have to climb (the Steel Tilting Tower) and the Wheel that runs when all others stand still, that gets you less than wood and lasts ten times as long (The Steel Aermotor) or if you want a Geared Mill, to run churn, grind, cut feed, pump water, turn grindstone, saw wood, that does the work of 4 horses at less than one-fifth the cost of any other power, write for copiously illustrated printed matter, showing every conceivable style of windmill, energetic and work, to
