A Steel Windmill and Steel Tower every 3 minutes. ☞ Those figures tell the story of the ever-growing, ever-going, everlasting Steel Aermotor. Where one goes others follow, and we "Take the Country." Though still, as we were unable to make all of the 20,049 Aermotors in '91. Orders thus waited weeks to be filled, but now we have vastly increased our plant and are prepared promptly to press out increased numbers in every desirable portion of the globe.

Are you curious to know how the Aermotor Co. in the ten years of its existence came to make many times as many windmills as all other makers combined? How we came to celebrate the Steel Wheel, the Steel Fixed Tower, the Steel Tilting Tower?

In 1881 we engaged in a field in which there had been no improvement for 40 years, and in which there seemed no future for another 100, and we have put into the shops in place of imitation of our inventions.

In 1882, before commencing the manufacture of another schedule, this investigation and report were made by a civil mechanical engineer, in which over 2,000 dynamometric tests were made on 61 different forms of wheels, propelled by artificial and therefore uniform wind, which settled definitely many questions relating to the proper speed of wheel, the best form, angle, curvature and amount of sail surface, the resistance of air to rotation, obstructions in the wheel, such as heavy wooden arms, obstructions before the wheel, as in the rainless mill, and many other more abstruse, though not less important questions. These investigations proved that the power of the best wind wheels could be doubled, and the AERMOTOR daily demonstrates it has been done.

To the liberal policy of the Aermotor Co., that guarantees its goods satisfactory or pays freight both ways, and to the economies incident to its factory, which enable it to furnish the best article at less than the poorest is sold for, the AERMOTOR owes its success.

We furnish the most perfect bearings ever put in a windmill, and have made an exhaustive revision of the Aermotor and Towers.

If you want a strong, stiff, Steel Fixed Tower—or if you want the tower you don't have to climb—the Steel Tilting Tower, and the Wheel that runs when all others stand still, that gets you less than wood and lasts ten times as long—The Steel Aermotor—or if you want a [illegible] chore, grind, cut feed, pump, water, saw wood, that does the work of a horse at [illegible] rate ($100), write for copiously illustrated printed matter, showing every conceivable phase of windmill construction and work, to
