MICROBES ON THE HEAD.

Do Not Trouble the Brain, But Destroy the Hair.

The American woman as well as the American man lose both the color and abundance of their natural head covering early. Started off in life with a fine silken brown suit curling well below her waist, it is only the extraordinary woman who at 25 does not find her combings every morning increasing to alarming bulk. Her scalp seems suddenly to fail in fertility, and in a few years just a thin braid is left as a remnant of the once charming shock of curls.

Now, as a matter of fact, it is not age, or ill health, or heredity, or even the grossest neglect that affects the hair as above described.

Perhaps it is not a pleasant bit of news to thin-haired women, but it is true, nevertheless, that the scalp disease which causes hair to fall is a tiny parasite which literally eats away the hair roots. The microscope will reveal this evildoer, who works as vigorously as a weevil in wheat.

Just where he comes from is a matter not yet solved, but his species is rapidly propagated and communicated from head to head by the contact of healthy with diseased hair.

Now, it is an encouraging fact that a head that boasts an exquisitely white, wholesome and immaculately clean scalp, or a scalp under peculiar conditions, whether clean or not, will escape infection when the danger is greatest, just as two persons will drink of contaminated water, one will die of typhoid fever and the other flourish.

These exceptions are the secrets of nature, but the average head will and does readily accept the microbe and suffer. Actual contact with an affected scalp is not necessary for this. It is only necessary to pass an elegant silver-backed brush, seemingly perfectly clean and taken from the toilet table of a most dainty woman, through the hair to accept enough microbes to absolutely impoverish a perfect scalp.

Sleeping one night in the same bed with an infected scalp is also sufficient, or merely resting the head one moment on the back of a stuffed chair a person with falling hair has lately occupied, will communicate the disease almost instantly.

As to the symptoms that follow the acceptance of this tiny depredator, they are too well known to need description. The hair may or may not, without any especial sensation in the scalp, begin to fall from its moorings. A little of the long hair comes at first, then more and more, showing that the microbe is multiplying and extending daily the area of depredation.

Frequently the scalp is sensitive to the touch, or itches violently, though there may be no dandruff to cause the sensation. Vigorous brushing, the ordinary shampoo, applications of the usual tonics or grease are all unavailing in dislodging the microbe, though to a certain extent great cleanliness and rapid application of the brush discourage very active browsing, and will to a certain extent check or modify the destructive course.

It is just here, in the moment of greatest discouragement, that science steps in to the aid of beauty, and shows that the one and only cure for baldness that is falling from the roots is water, massage and air.

Immediately the morning combings begin to show any unusual number of long bright hairs, those precious strands are proof positive that there is a little reaper at the roots, and active measures must be taken to combat him.

If it were possible to wash the head and hair quite clear in clear water and borax, leave it to dry in the sun and wind and permit it to hang free all day, its owner in the open air, in a week the microbe would be eradicated; but for a woman, and especially one who lives in the city, this method is impossible.

Her chance for retaining her hair does, however, rest on the same energy and painstaking care. She must not apply any greasy tonic to the scalp, for this only encourages the microbes' growth, and above all things a soapy shampoo must be avoided.

She can either inaugurate a series of clear water douches for her head or resort to a physician, who will make an examination of her head with a microscope, and give her as exact a description of its condition as a specialist would of her heart and lungs, on sounding and investigating.

He can tell to a hair's width in what portions of the scalp the marauder is at work, and usually, through questions, he can discover where, or how, or when, the infection was received. He cannot, if her case is undertaken, promise to restore a growth where the microbe has cut out the roots of hair and destroyed them, but he can eradicate the enemy, check the falling and redouble the growth in the healthy parts.—Boston Globe.

Butterflies Made to Order.

M. Standfuss, of Zurich, has taken up the old experiments of Weismann on the variations of butterflies produced by temperature acting on the chrysalis. He finds that the chrysalids, according to the temperature to which they are exposed, have given birth to butterflies not of the kind they are derived from, but kinds belonging to countries far from Zurich. Thus, pupæ of the Vanessa urtica, which is common in Switzerland, when kept at a temperature of four to six degrees centigrade, produce the Vanessa polaris, a species proper to Lapland. Others of the same sort kept at 37 to 39 degrees centigrade produce the ichnusa, found only in Sardinia and Corsica. A still higher temperature produced ichnusoides, found sometimes in temperate regions during hot summers. Other chrysalids gave birth to entire new species. The general result is, that cold or heat produces butterflies found in cold or hot countries.—London Globe.

A Mothers Recommendation.

I have used Chamberlain's Cough Remedy for a number of years and have no hesitation in saying that it is the best remedy for coughs, colds and croup I have ever used in family. I have not words to express my confidence in this remedy.—Mrs. J. A. Moore North Branch Mich For sale by all dealers.

MRS. L. S. ADAMS.

Of Galveston, Texas.

"Wine of Cardui is indeed a blessing to tired women. Having suffered for seven years with weakness and bearing-down pains, and having tried several doctors and different remedies with no success, your Wine of Cardui was the only thing which helped me, and eventually cured me. It seemed to build up the weak parts, strengthen the system and correct irregularities."

By "tired women" Mrs. Adams means nervous women who have disordered menses, falling of the womb, ovarian troubles or any of those ailments that women have. You can cure yourself at home with this great women's remedy, Wine of Cardui. Wine of Cardui has cured thousands of cases which doctors have failed to benefit. Why not begin to get well today? All druggists have $1.00 bottles. For any stomach, liver or bowel disorder Thedford's Black-Draught should be used.

Free advice and literature about diseases peculiar to women, sent by mail, The Chattanooga Medicine Co., Chattanooga, Tenn.

WINE OF CARDUI

A Weak Stomach

causes a weak body and invites disease. Kodol Dyspepsia Cure cures and strengthens the stomach, and wards off and overcomes disease.

[illegible] I lost all strength and ran down in weight. All that money could do was done but all hopes of recovery vanished. Hearing of your wonderful Kodol I decided to try it. The first bottle benefitted me, and after taking four bottles I am fully restored to my usual strength weight and health." E. C. Peery.

Have Good Reason.

[illegible]

First, the cosey sitting cars in use are unequaled in the world.

Second, the daily personally conducted tourist car excursions, being especially adapted for ladies travelling alone or with children, affords a comfortable mode of travel at rates within reach of all.

Third, it is the only route between the East and West passing directly through Salt Lake City, or modern Zion.

Fourth, the choice of two distinct routes through the heart of the Rocky Mountains.

Fifth, three fast through trains daily between Ogden and Denver equipped with every modern convenience.

There are many other reasons why this route is the most comfortable and enjoyable for the travelling public.

You can have a great deal on the sublime of through travel, and receive some very beautiful and interesting booklets, by calling on or writing to the undersigned, W. C. Melbride, Gen'l Agent, or M. J. Eccles, Travelling Passenger Agent, 124 Third Street, Portland, Ore.

Saved Her Child's Life.

"In three weeks our chubby little boy was changed by Pneumonia almost to a skeleton," writes Mrs W. Watkins of Pleasant City, O. "A terrible cough set in that, in spite of a good doctors treatment for several weeks, grew worse every day. We then used Dr. King's New Discovery for Consumption, and our darling was soon sound and well. We are sure this grand medicine saved his life." Millions know its the only sure cure for Coughs, Colds and all Lung diseases. Guarantee satisfaction, 50c $1.00. Trial bottles free. E. C. Peery.

Will Make Affidavit

New Lease of Life for an Iowa Postmaster.

Postmaster R. H. Randall, Dunlap, Ia., says: I suffered from indigestion and resulting evils for years. Finally I tried Kodol. I soon knew I had found what I had long looked for. I am better today than in years. Kodol gave me a new lease of life. Anyone can have my affidavit to the truth of this statement." Kodol digests your food. This enables the system to assimilate supplies, strengthening every organ and restoring health.

Kodol Makes You Strong.

Prepared only by E. C. DeWitt & Co., Chicago. The $1. bottle contains 2½ times the 50c. size.

DeWitt's Witch Hazel Salve
For Piles, Burns, Sores.

LEGAL NOTICES

NOTICE FOR PUBLICATION.

United States Land Office,
Oregon City, Oregon, December 22, 1902.

Notice is hereby given that in compliance with the provisions of the act of Congress of June 3, 1878, entitled "An act for the sale of timber lands in the states of California, Oregon, Nevada and Washington Territory," as extended to all the Public Land States by act of August 4, 1892, Ettie J. Spence, of Portland, county of Multnomah, state of Oregon, has this day filed in this office her sworn statement No. 6095, for the purchase of the S. ½ of N. E. ¼ and lots 1 and 2, Sec. 3, and lots 1 and 2, Sec. 10, in Tp. No. 1 S., R. No. 2 E., and will offer proof to show that the land sought is more valuable for its timber or stone than for agricultural purposes, and to establish her claim to said land before the Register and Receiver at this office at Oregon City, Oregon, on Saturday, the 7th day of March, 1903.

She names as witnesses: Edward Burke, Robert Linden and H. R. Burke, of Portland, Oregon, and J. C. Burke, of Molalla, Oregon.

Any and all persons claiming adversely the above described lands are requested to file their claims in this office on or before said 7th day of March, 1903.

CHAS. B. MOORES, Register.

NOTICE OF FINAL SETTLEMENT

Notice is hereby given to whom it may concern that the undersigned executor of the estate of Alice Jane Johnston, deceased, has filed his final account with the Clerk of the County Court for Linn County Oregon, and the Court has fixed the 16th day of February 1903 at the hour of one o'clock P. M. for the hearing of objections if any there be to his final account and for the settlement of said estate.

Dated at Albany, Oregon this 8th day of January A. D. 1903.

D. H. JOHNSTON,
Executor.

Weatherford & Wyatt, Attys.

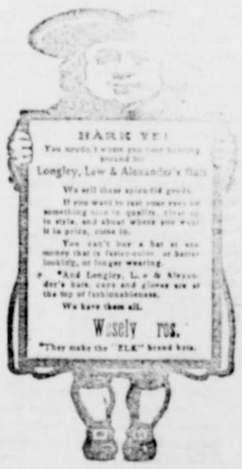
EXECUTOR'S NOTICE.

Notice is hereby given that the undersigned has by order of the County Court of Linn County, Oregon, been appointed executor of the last will and testament of Daniel Brenner, late of said County deceased. All persons having claims against the estate of said deceased are hereby required to present the same, with proper vouchers, to the undersigned at his residence five miles north of Scio, in Linn County, Oregon, within six months from the date of this notice.

Dated January 30, 1903.

W. R. BRENNER,
Executor of the last will and testament of Daniel Brenner, deceased.

Hewitt & Sox,
Attorneys for Executor.



A FEW FARMNOTES

Dairying bring in constant income. The man who sells crops of any kind has to wait until he can market his product once a year. The dairyman has an income nearly or quite 52 weeks in the year.

Damp floors should be avoided in the dairy, as dampness always tends to the development and increase of organic germs.

Plant nut trees. Walnut and butternut make comparatively rapid growth and their wood is valuable.

The nuts even if not salable, are a very rich Winter relish thoroughly enjoyed especially where there are children.

Cut flowers may be kept fresh by adding salt to water.

The man who tries to farm in the same way his father and grandfather farmed is bound to fall behind in the race. The ox team was all right in the first half of the last century, but this is the age of steam and electric locomotion.

Keep the kitchen wolf out if you would have the benefit of its wool quality.

There is no economy in using a cheap substitute for linseed oil in grease. Kerosene is all right for cleaning machinery that is gummed but for lubricating you want something that has some body and will not evaporate the first day.

Jot down the repairs needed as they come to hand or mind. There on the first rainy day they can be attended to. If a new manila rope is bought before using it will be improved soft and pliable.

Buy only what you need at a time. Then when someone wants to buy, the delivery is a complaint never again.

The Best Prescription for Malaria.

Chills and fever is a bottle of Grove's Tasteless Chill tonic. It is simply iron and quinine in a tasteless form. No cure—no pay. Price 50c.

The Easy Pill.

DeWitt's Little Early Risers do not gripe nor weaken the system. They cure billiousness, jaundice, constipation and inactive livers, by arousing the secretion, moving the bowels gently, yet effectually, and giving such tone and strength to the glands of the stomach liver and bowels that the cause of the trouble is removed entirely. The famous little pills exert a decided tonic effect upon the organs involved, and if their use is continued for a few days there will be no return of the trouble. E. C. Peery.

Market Report.

Following is a report of produce in the Scio markets:

Eggs, 25c doz.
Chickens, 10c per lb.
Geese, $6.50 @ $7.50 per doz.
Ducks, $7 @ $8.50 per doz.
Butter, 35c @ 40c per roll
Bacon, 14c lb.
Hams, 15c lb.
Lard, 10c lb.
Potatoes, 40c per bu.

The scratch of a pin may cause the loss of a limb or even death when blood poisoning results from the injury. All danger of this may be avoided however by promptly applying Chamberlain's Pain Balm. It is an antiseptic and quick healing liniment for cuts, bruises and burns. For sale by all dealers.

PROFIT

The matter of feed is of tremendous importance to the farmer. Wrong feeding is loss. Right feeding is profit.

The up-to-date farmer knows what to feed his cows to get the most milk, his pigs to get the most pork, his hens to get the most eggs. Science.

But how about the children? Are they fed according to science, a bone food if bones are soft and undeveloped, a flesh and muscle food if they are thin and weak and a blood food if there is anemia?

Scott's Emulsion is a mixed food; the Cod Liver Oil in it makes flesh, blood and muscle, the Lime and Soda make bone and brain. It is the standard scientific food for delicate children.

Send for free sample.

Be sure that this picture in the form of a label is on the wrapper of every bottle of Emulsion you buy.

CHEMISTS,
409 Pearl St., N. Y.
50c. and $1; all druggists.

CANAL BOATS FOR MANILA.

Barges Shipped from the Erie Canal to Be Used on the Pasig River.

The easy-going native bargemen of Manila boy will experience something like surprise when a few months hence they see towed into their harbor 19 Erie canal boats, sent by the Philippine Transportation company, reports the New York Tribune. For several years these barges have been in use on the Erie canal. Now they have been towed over to the Morrisania works at 149th street and the East river, where they are being carefully pulled apart preparatory to shipping them to the orient. Piece by piece the decks are being pulled up on the pier ready to be stowed away in the holds of huge steamers, there to remain until once more put together in Hong Kong. From there they will be towed across the China sea, down the Luzon coast and into Manila harbor.

Large steamers cannot approach within two miles of the shore in Manila bay. For this reason it has always been necessary to send out steamers and lighters in which the cargoes are transported up the Pasig river to the city. These cargoes are small and clumsy, and are owned by individual natives, who will not work until their supply of cash runs short. The Erie canal boats are capable of holding five or six times more tonnage than any now in use, and the 19 together could put all the vessels of Manila harbor into their holds.

SLIPPERY SIDEWALKS.

Some of the Curious Effects They Produce Upon Unwary Pedestrians.

Slippery sidewalks that have been the rule for the past few mornings have tended to bring out emphatically one of the peculiar sides of human nature. No matter how much the fall injures a man physically, it seems as nothing to the damage to his self-esteem if perchance his misfortune happens to be witnessed by some one else. The first thing the unfortunate does after picking himself up is to look all about him with an idiotic smile on his face but as if he took the whole thing as a joke, but anxious to see if anyone has seen his tumble.

If there happens to be some one near by who has witnessed the fall the smile vanishes and there is a display of temper that is hideous. It is his hat that suffers. It is smashed instead of brushed, as if that hat was responsible for the humiliation, or as if he could get square with it by a "rough-house" sort of brushing. If, however, no one is in sight and no fun is seen at a window, the unfortunate goes his way after a few preliminary limps as if the thing was a matter of course incident that must be taken good-naturedly in common with the other trifling affairs of a lifetime. The result is about the same when a soft, slushy snowball, hurled by a mischievous boy, finds its mark on the broad back of an otherwise dignified person.

A DEADLY TRAP.

Catching a Thief with a Pocket Lined with Fishhooks.

They were discussing the best way to bring a prisoner from the place of his arrest to headquarters at the central office not long ago, says the New York Times, and the collar, cuff, and armholes were instanced as natural expedients, and handcuffs, nippers and pocket bludgeons things as mechanical aids.

"I know," said a detective who had been to Europe and passed some time in the society of London detectives, "how a pickpocket was once separated without his captor seeing his prisoner's face before he got to the headquarters and without anyone getting a hand on him. It happened this way: A detective who was often detailed to gatherings, weddings, the houses of parliament, Westminster abbey, and other public places, often ran across a wiry little man who he discovered had no business where he was seen, and did nothing for a living.

"Coincidental with the man's visits to crowded places were complaints of larcenies of articles that were carried in the pockets of tails of coats, and especially silk handkerchiefs. The detectives suspected the little wiry man, but he evidently had more than one confederate to pass what was stolen so as to by 'clean,' for the officer who was watching him, and who was notified at repeated from his superiors for his negligence in not discovering the pickpocket, had him arrested twice by other officers and 'shaken down' without finding any stolen goods in his possession.

"Strange officers were used to make the arrests in order that the suspected man might not become familiar with the principal detective's face, as he determined to put him 'by hook or by crook.' Now I don't mean this for a pun, but it came out that way. The detective belonged to one of the many fishing clubs that abound in London, and was familiar with tackle.

"Procuring four dozen uncalled hooks of the size and strength used here for blackfish, some fine thread and a needle, he passed an afternoon in turning the tail pockets of an old-fashioned frock coat into a tide-trap. The hooks were ringed and with the needle were sewed bent out just inside the pocket, permitting a hand to enter, but preventing its withdrawal. He knew of a crowd that would be largely attended at the east end of the Strand and made it carefully for it, so that when in his home he was a pleasant-faced old gentleman.

"At the back sale he took care to be as vacuous and unmindful of his surroundings as possible, but mind the presence of the suspect and waited calmly for a bite. It came. There was a tug at his coat and a bitter oath, and he knew that his man's hand was seized by the hooks, and that he would not venture to risk the agony that tearing away forcibly would inflict. So he said quietly: 'If you follow me our surgeon will relieve you,' and attempted to walk to Scotland Yard, half a mile away, the trapped thief following with his hand in the detective's pocket.

In Hong Kong it was by a mere matter of accident that the European authorities learned of the disease, as the natives carefully concealed the spread of the contagion. One Chinese minister in the sanitary board, Lau Wai Chuen proved to be hard-headed. He insisted upon having patients sent from the great native hospital of Jang Wah to the European Hygeia, and then, after examination, to the hulks in the harbor. This was done for a few days. Then the feeling among the Chinese became so bitter that the procedure had to be abandoned. Native members of the sanitary board actually stimulated this hostility to European methods.

Placards were brought to Hong Kong from Canton, which reveal the deadly suspicion of all foreign means of treatment. These placards warned all people not to go to Hong Kong nor to permit their wives and children to go, because they would fall victims to the foreign doctors, who were chopping up all sick persons in order to make medicine out of their eyes and bones. No amount of explanation has yet sufficed to eradicate the desperately simple idea that all foreign doctors are on a still hunt for the eyes of dead Chinese. The people cannot understand that European medicine does not value certain parts of a body for medicine, because their own physicians, who are insanity quacks, insist that by eating certain parts of the bodies of animals one may secure the best qualities of those animals. They cling to this belief, and therefore such absurd stories as those of Christian missionaries killing native children to secure their eyes find ready credence.

This is the country of the individual, where every tub stands on its own bottom and where every man is given the opportunity to make money if he wills, or do anything else he prefers. Our millionaires have won their way in most cases with stout hearts and hard work just as our statesmen, poets and artists have done. Emerson, in one of his rail-driving sentences, said no man should repine for what his soul desired. Let him take it, adds the Louisville Courier-Journal, and pay the price. He can do it in the United States as he can do it in no other country in the world.

Cultivation of the speaking voice has a practical advocate in the manager of the Chicago telephone company. All applicants for position in the central office must henceforth pass a voice test, and such girls as are accepted will undergo a course in vocal training to fit them for the work. On the recognized principle that answers are frequently returned in the pitch of the questioner, low, well-modulated "central" voices may prove catching in all the homes and offices of Chicago.

"There is a man out in the waiting room," said the great man's secretary. "I think he's a bum actor." "Why do you think so?" "He says he's anxious to get an audience."—Philadelphia Press.

Boynton—"Harding tells me he is suffering from an operation." Sawyer—"I hadn't heard of it. Surgical, of course?" Boynton—"No, this was a financial operation. Gibbons borrowed ten dollars of him yesterday."—Boston Times.

Mrs. Mann—"What a man you are, Joseph. You always take the girl's side every time I have any trouble with her." Mr. Grusby—"Well, why shouldn't I? Doesn't she sympathize with me when you and I have words?"—Boston Transcript.

Sue—"Pauline's father is quite a genius." Belle—"In what way?" Sue—"Why, he had a pair of recording scales attached to her hammock. If they registered over 130 he knew Jack had been sharing her seat."—Philadelphia Record.

"Woman," said the Sentimental Person, "is the holiday in the life of man." "Yes," remarked the Coarsely Sarcastic Individual, "and I have noticed that after a man takes that kind of a holiday he has a hustle all the rest of his life."—Baltimore American.

"I wish you and May would become friends again," said the would-be peacemaker. "Well," said Fay, "if she'll make up, I will." "I told her you had said that, and she said: 'The idea! It's easy for her. I never saw her when she wasn't made up.'"—Philadelphia Press.
