Sagacity of Frogs.

In the manner of depositing of their eggs many species of frogs exhibit remarkable peculiarities. A tree frog, native of Paraguay, makes its nest in a bush overhanging a pond. The lower ends of a number of leaves are drawn together and fixed in that position by a number of empty egg capsules. The eggs are also covered with a shield of empty capsules to protect them from the sun and air. When the eggs are hatched the plug at the bottom appears to fall out and the tadpoles tumble into the water.

His Great Weakness.

"You know," says a magazine story teller, "Dannhauer would gamble his last cent. That was his great weakness. He went home one evening after a bad day. He looked tired. 'Wife,' he said, 'have you got anything to eat?' 'Yes, lots of things,' the wife said. 'Well, cook up every thing you've got—everything.' 'Gracious, are you that hungry?' 'I'm not hungry at all; I'm going to sell the stove.'"

Value of Waste Paper.

It is an interesting fact that waste paper can be so important a commercial factor. In Toronto, Canada, there are 10,000 tons of waste paper collected annually. For these there is received about $100,000. For just the ordinary waste paper the sum of $10 a ton is paid. But for the better grade of waste papers the price has been known to run as high as $40 a ton.

A Greek Joke.

A citizen of Cumae, on a donkey, passed by an orchard, and seeing a branch of a fig tree loaded with delicious fruit he laid hold of it, but the donkey went on, leaving him suspended. Just then the gardener came up and asked him what he did there. The man replied, "I fell off the donkey."—Clouston's "A Book of Noodles."

Author Forgot to Make His Detective a Dope Fiend According to the Formula.

"This detective story will not do," said the magazine editor, handing back the manuscript.

"I'd like to know why," responded the author, with a show of heat. "It has color, atmosphere—all the regular business. The detective can see around a corner or through a wall. He needs no clue save a lock of the murdered man's hair. He is able to read human minds and motives as an ordinary sleuth reads a placard offering $5,000 reward. His deductions are utterly absurd, irrevelant and preposterous, yet crowned with success. What's the matter?"

"Do you state anywhere that he drinks a quart of absinthe neat?"

"No-o."

"Do you have him partaking of hasheesh, opium, morphine or other familiar tid-bits upon which the detective of fiction subsists?"

"I forgot that."

"Where is the admiring friend to whom the detective lays bare the blatant idiocy of his intellectual workings?"

"Left his out, by George!" admitted the author, and vanished with his amateurish effort.—Philadelphia Ledger.

Mr. Arnold and the American Lady.

Matthew Arnold was sitting in his study one morning when the butler showed in an American lady and a small boy. The lady said, "Glad to make your acquaintance, Mr. Arnold. I have often heard of you. No don't trouble to speak, sir: I know how valuable your time is." Then turning to the boy she said: "This is him, Lenny, the leading critic and poet. Somewhat fleshier than we had been led to expect!"—A. C. Benson, in the Atlantic.

Mirrors Used to Reflect Street.

In continental towns one frequently sees a mirror at the side of a window so placed that people in the room may see reflected therein the view up or down the street. In some bygone periods of English street architecture it was customary to buy almost all the windows at least enough to enable the occupants of the houses to look along the streets.—Craftsman.

Women's Secrets

There is one man in the United States who has perhaps heard more women's secrets than any other man or woman in the country. These secrets are not secrets of guilt or shame, but the secrets of suffering, and they have been confided to Dr. R. V. Pierce in the hope and expectation of advice and help. That few of these women have been disappointed in their expectations is proved by the fact that ninety-eight per cent. of all women treated by Dr. Pierce have been absolutely and altogether cured. Such a record would be remarkable if the cases treated were numbered by hundreds only. But when that record applies to the treatment of more than half-a-million women, in a practice of over 40 years, it is phenomenal, and entitles Dr. Pierce to the gratitude accorded him by women, as the first of specialists in the treatment of women's diseases.

Every sick woman may consult Dr. Pierce by letter, absolutely without charge. All replies are mailed, sealed in perfectly plain envelopes, without any printing or advertising whatever, upon them. Write without fear as without fee, to World's Dispensary Medical Association, Dr. R. V. Pierce, Prest., Buffalo, N. Y.

SOUNDED ITS OWN KNELL

Bell Tolled as the Famous Old Campanile of Montauban Fell in Ruins.

The town of Montauban, France, was proud of his bell tower. It was built by a rich citizen in the sixteenth century and named for him the belfry of Lautier, nearly 100 feet tall and 25 feet square; the great bell on its top has called the people to all the important events in the town's history.

Recently it sounded its own death note. The town began to tremble and the vibration of the top was enough to set the bell ringing, warning all those near it to escape. In a few seconds the massive tower was a heap of dust and broken stones.

While not so celebrated as the Campanile of Venice, which met the same fate a few years ago, it was as dear to Montauban, and the town mourns its destruction.

Colonial Meeting Houses in Winter.

In winter the colonial meeting house was a cold place. It may be said that the congregation sat "shivering on the brink" of perdition, if the icy temperature of the house and the terrible doctrines of the sermon are to be taken together. Samuel Sewall notes that there was a "great coughing" in the congregation; that the sacrament bread was frozen hard as pebbles, and pieces of it rattled as they fell in the pewter plates.—Bliss's "Side Glimpses."

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

The Happy Way.

There is always a best way of doing everything, if it be but to boil an egg. Manners are the happy ways of doing things; each one a stroke of genius or of love—now repeated and hardened into usage. They form at least a rich varnish, with which the routine of life is washed and its details adorned. If they are superficial, we are the dewdrops which give such a depth to the morning meadows. Manners are very communicable; men catch them from each other.

In Optimistic Vein.

She was cheerful and always able to communicate her cheerfulness to others. During the nine years we spent in poverty and debt she was always able to reason me out of my despair and find a bright side to the clouds and make me see it. In all that time I never knew her to utter a word of regret concerning our circumstances, nor did I ever know her children to do the like. For she taught them and they drew their fortitude from her.—Mary Twain's tribute to his wife.

WOMAN TELLS STORY OF INTENSE SUFFERING

At the age of about 40 years, I was attacked with hemorrhage of the kidneys or bladder which continued for several years without a check. PILES

"I have suffered with piles for thirty-six years. One year ago last April I began taking Cascarets for constipation. In the course of a week I noticed the piles began to disappear and at the end of six weeks they did not trouble me at all. Cascarets have done wonders for me. I am entirely cured and feel like a new man." George Kryder, Napoleon, O.
