Save Repairs Paint Now

It Costs More to Rot a Building Than to Paint It

A GOOD way to determine how much it costs to rot a building is to find out how much lumber, needed to repair or rebuild, would cost.

You'll find that it costs several times as much as the paint which saves repairs. Paint your buildings when they need it. Rotting property is wasteful and extravagant.

The most economical paint, in the long run, is the best paint. It's easy to apply—saves labor cost. It covers more area per gallon than "cheap" paint.

The best paint serves five or more years longer than "cheap" paint.

The best paint is economical because it is scientific in formula and preparation. It is right.

We've made best paints for 73 years—to meet the weather conditions in the West. They contain the finest materials—PIONEER WHITE LEAD, pure linseed oil, pure zinc, and pure colors—combined in scientifically exact proportions with long-time skill.

Taste is a matter of tobacco quality

State Monopoly of Schools would cost—

In taxes—

Over $1,000,000 a year for operation

Over $3,000,000 for buildings and grounds

THE *first cost* of state monopoly of schools would be something over three million dollars for new buildings and grounds. We would have to pay a yearly tax of over one million dollars for operation in addition to what we are paying now.

They propose that Oregonians pay this bill for "Real Americanism." But it is not Americanism to take away the right of the parent to control the education of the child.

They propose that we pay this bill to have "Compulsory School." But we actually have compulsory school right now under the present law.

Be not deceived. What this burden of added taxes will go for is an experiment in education along communistic lines—the substitution of state monopoly in education for parental guidance. Russia is trying this experiment. Let us profit by her failure. Let us maintain our democracy and save millions of dollars.
