The day your newspaper cost $1.50!

That was the day it carried no advertisements. That was the same day business dropped off 80%. No one was advertising a clearance sale on fashionable dresses. No one was advertising a new improved vacuum cleaner, or electric shaver, or outboard motor.

The day your newspaper cost $1.50, there was no communication between buyer and seller. For that's exactly what advertising does. Advertising, whether it be a newspaper advertisement, a radio or television commercial, a billboard or a pamphlet at your doorstep, is communication to people to invite them to enjoy a product or service, to go to church, to select a school, or to come to Oregon to live.

Today, advertising keeps you and your family and 175 million other Americans informed of products, services, values and prices. The result is that there are more and better products at lower cost to you.

Your newspaper costs only 5¢ to 10¢. Don't you think *it pays to be advertised at . . .*
