Another Solid Carload!

Friday Rubenstein's received their 4th Solid Carload of 1937 Westinghouse Refrigerators

Reports from 9 home proving kitchens show Westinghouse mantains real safety zone temperature ... while mechanism operates less than 2 hours out of 12 ... uses an average of only 2-3 kilowatt hours of electric current daily which means in Eugene (on 1 3-10c rate) 1c per day or 26c per month.

In homes like yours BETTER FOOD PROTECTION

Kitchen-proved

"Keeps food fresher ... for a longer time"—say Proving Kitchen Hostesses of their Westinghouse Refrigerators. And these statements are backed by PROOF — the proof of *dollar and cents savings* as a result of lower temperatures and better food protection.

Average weekly savings, on food alone, run $1.75 per family. Half of this is due to buying in *quantity* at week-end "special" prices, the other half due to greater use of leftovers.

Remember ... these are *first-hand FACTS*, from homes like your own. But, come in ... get all the facts! See how the Kitchen-proved Westinghouse does more things better, at less cost!

Here's added proof! U. S. PUBLIC WORKS ADMINISTRATION BUYS 16,697 WESTINGHOUSE REFRIGERATORS ... FOR LOWEST 10-YEAR COST THEY CAME TO...
