New Plan Instituted To Curb Drunk Driving

Hartford, Conn.—(U.P.)—A new plan to curb drunken driving which is believed to be the first of its kind in the nation is being tried by the State of Connecticut.

HELICOPTER DOES IT

Wallingford, Conn. — (U.P.) — School Superintendent William H. Curtis couldn't find a suitable site for a new school planned by the town. Neither could the superintendent in nearby North Haven. The two pooled their resources, hired a helicopter and took to the air. They soon had a bird's eye view of several likely school locations.

Television Tube Breakage Dangerous

Schenectady, N. Y.—(U.P.)—General Electric Co. scientists warn that the greatest danger in handling picture tubes of television receivers lies in accidental breakage.

The tubes, they explain, contain a vacuum and the pressure of the outside air may cause an "implosion," meaning an inward instead of outward explosion. Fragments of glass flying at high speed may cause serious injury to the person handling the tube.

The GE scientists advise wearing gloves and a protective facial mask in handling picture tubes.
