NITROGEN in manure often escapes into the air in the form of ammonia. Super phosphate mixed with manure will combine with ammonia thus preventing loss of nitrogen and supply phosphoric acid therefore making the manure a better balanced plant food for most soils. Simplot Red Diamond Super-phosphate can often double fertilizer effectiveness when used in the barn, feed lot or storage pile. Have you considered the value of a 2 or 4% protein content increase in a 5 ton crop of hay or your pasture. This is one of the unseen values received from super-phosphate. Every acre can provide the equivalent of several sacks of protein supplement you might have to purchase. Get your supply of Simplot Red Diamond Superphosphate from your dealer now or let him know what your needs are going to be.
