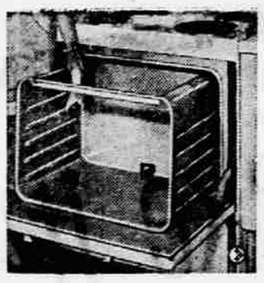
New Electric Range Makes Ideal Present

FUN TO COOK–Holiday dinner is fun to cook on a modern electric range, and Mother will bless its conveniences all year long. This model features automatic rotisserie, meal timer and fast cooking top units.



SLIDES OUT—Lining slides out of this electric range oven for easy, no-stretch cleaning.

TOP BURNER—Pan control maintains top burner of this electric range at temperature selected.

OVEN TIMER–Remote panel of electric range can control oven timer and surface units from any distance.

UNDER SURFACE — Drawer space directly under surface units is possible with shallow drop-in surface range.

COOK TO DESIRE — Roast guard of electric oven automatically cooks meat to desired doneness and holds it.

The lucky lady who receives a modern electric range for Christmas this year doesn't have any idea just how lucky she really is.

Chances are that Christmas morning she'll have visions of a well done Christmas bird or a delectable Christmas dessert when she sees her new range.

But only if she looks ahead to the days and weeks beyond Christmas will mother really appreciate just what her new range can do for her. And if she's too excited to do this for herself, here's how you can explain to her what's in store for her with her new range:

It's clean. The ladies themselves have taken a hand in designing today's ranges. You'll find the ovens are easier to clean, the surface units virtually take care of themselves, and the range top and control panel have all been designed with easy clean-up in mind.

It's fast. Mother will have to test this for herself before she'll really believe it, but today's modern electric range is faster than anyone would have expected just a few short years ago. She'll appreciate this advantage in the busy days ahead when meal times creep up on her and she must turn out a family dinner in a jiffy.

It's automatic. Here's a feature she'll appreciate all year round – whether it's in the winter when she's occupied with club meetings or in the summer when she's out in the garden or down at the beach. The automatic features of her new range will take over her cooking for her and when she returns from the meeting or the beach the family's dinner will be ready for the table.

Obviously, it won't take the lady of the house long to realize just how valuable her new range is going to be to her in terms of convenience, labor-saving and new found freedom.

In short, whatever you want, you'll find in today's ranges. All you have to do is look around and take your choice.

Hood River Man Auto Wreck Victim

Hood River –(UPI)– Daniel O. Breedlove, 25, Hood River grocery store employee, was killed Tuesday when the car in which he was riding went out of control on the Columbia River highway half a mile west of here, crashed over a 30 - foot embankment and struck an exposed concrete sewer conduit.

Police said the driver of the car was Don Williams, 28, also of Hood River. He suffered head and chest injuries and was taken to Hood River Memorial Hospital, where his condition was reported fair.

Investigating officers said the eastbound car apparently went out of control after passing another eastbound car on the icy highway. Breedlove was thrown out of the car and was instantly killed.

Guide Books Are For Housewives

You won't find them in this winter's "best seller" lists but the instruction books which come with Christmas presents will be among the "best read" books in millions of American homes during the holidays.

Mother, aware that the full enjoyment of her new appliances depends on just how well she understands them, will be – or certainly should be – poring over the instruction books which came with the new range, refrigerator or piece of laundry equipment.

Nowadays she'll find that this is a pleasant as well as a rewarding occupation. Appliance manufacturers have redesigned their guide books as well as the appliances themselves. Now the books are handsomely illustrated in color and written in a manner which insures that the homemaker who takes time to read them will get maximum benefit.

Homemaking editors and home economists agree that the consumer can't hope to enjoy her appliance to the fullest unless she reads the instruction book carefully.

If she does she'll learn just how to care for the new product, how to clean it, what to expect from it, short-cuts possible with it, and how to prolong with useful life built into it.

Many Changes in Ranges Are Noted

Today's range is vastly changed from the look-alike cook-stoves of the past. Now there's a color, style and size to fit every taste and every need.

With color growing ever more popular, for instance, appliance manufacturers have produced ranges in gleaming stainless steel and a whole rainbow of attractive shades to fit any decor. Indeed, modern housewives have not only begun using color in the kitchen — they've begun blending one color with another.

As for styles, there are two basic types. The so-called "free-standing" range is the type we've grown accustomed to over the years. The second is the built-in range, with oven and surface burners installed separately at convenient locations.

'CRACKERS HURT 11

Tokyo – (UPI) – Eleven persons were injured Monday when an unidentified man tossed a pack of firecrackers into a crowd of Christmas shoppers in the downtown Daimaru department store.

CRANBERRIES APLENTY

Washington –(UPI)– Food and Drug administration officials said Monday that housewives should have plenty of safe cranberries to grace holiday dinner tables. FDA agents have cleared about 9,364 tons of processed cranberries and 13,827 tons of fresh berries for safe eating since it was disclosed last month that some berries had been contaminated by a weed killer which induced cancer in rats.

France's 1958 steel production, which totaled 14,616,000 metric tons was 3.7 per cent higher than the 1957 total.

MEETING DATE CHANGED

Salem –(UPI)– The meeting of the interagency committee on migratory labor set for Dec. 15 here has been set over to Dec. 22, according to Chairman Frank McKennon. The session will be in the State Agriculture department conference room.

great idea for Christmas giving ...give your family more time for living...

give the FINEST MADE... KitchenAid®
AUTOMATIC DISHWASHER

Why not give Mom back to her family at Christmas time...and all year long? Any dishwashing job is only moments long—in fact, only as long as it takes to load the roll-out, cushion-coated racks. The rest of the job belongs to the big, blue Hobart power wash arm and the sanitized, flowing hot-air drying system. The dishes will be washed clean and dried bright while Mom goes back to her family where she is wanted.

Come in and see our KitchenAid display.
