GOOD WORDS
FOR THE
PAIN-KILLER.

We can confidently recommend the Pain-Killer.—*Toronto Baptist.*

It is the most effectual remedy we know of for Aches, Pains, flesh wounds, &c.—*St. Johns News, P. Q.*

We advise that every family should have so effectual and speedy a Pain-Killer.—*Amherst N. S. Gazette.*

Our own experience is that a bottle of Pain-Killer is the best Physician a traveler can have.—*Hamilton Spectator.*

For both internal and external application have found it of great value.—*Chris. Era.*

A medicine no family should be without.—*Montreal Transcript.*

Could hardly keep house without it.—*Ed. Voice.*

Should be kept in every house, in readiness for sudden attacks of sickness.—*Chris. Progress*

No article ever obtained such unbounded popularity.—*Salem Observer.*

One of the most reliable specifics of the age.—*Old North State.*

Its power is wonderful and unequalled in relieving the most severe pain.—*Burlington Sentinel.*

An indispensable article in the medicine chest.—*N. Y. Examiner.*

It will recommend itself to all who use it.—*Georgia Enterprise.*

Is extensively used and sought after as a really useful medicine.—*Journal, St. John, N. B.*

No medicine has acquired such a reputation; it has real merit.—*Newport Daily News.*

One of the most useful medicines; have used it and dispensed it for the past twenty years.—*Rev. Wm. Ward.*

The most valuable medicine now in use.—*Tenn. Organ.*

It is really a valuable medicine, and used by many physicians.—*Boston Traveler.*

We always keep it where we can put our hands on it in the dark, if need be.—*Rev. C. Hibbard, Burmah.*

One of the few articles that are just what they pretend to be.—*Brunswick Telegraph.*

In my mountain travels no medicine is of so universal application as Pain-Killer.—*Rev. M. H. Bixby, Burmah.*

KNAPP, BURRELL & CO.,

OFFER FOR

The Harvest of 1873,

THE FOLLOWING

FARM IMPLEMENTS AND MACHINES

Dodge's Reaper and Mower—"Ohio" and "Buckeye" patents combined, with Dodge's improvement; two sizes, Nos. 1 and 2, and as *improved* for 1873 is THE BEST Self-Raker in the World. Can be set to *cut higher* than any other Self-Raker. ☞ Send for circular entitled "Twenty Reasons why Farmers should buy the Dodge."

Excelsior Reaper and Mower—The original and BEST Dropper and Hand-Raker, has *high* grain wheels and the new "Adjustment Reel."

McCormick's Reaper and Mower—Hand-Rakers and Self-Rakers, extra strong and durable. *Prices low.*

Burt's Reaper and Mower—Hand-Raker; cuts high or low; strong, and suitable for FLAX as well as grain.

Marsh Harvester—Desirable and economical way of harvesting grain. Binders ride. Many prefer them to Headers or Reapers. Prices REDUCED. ☞ Send for descriptive circular.

Haines' Header or Harvester—With Heslges' improvements and other additions for 1873. Two sizes, ten and twelve feet cut.—Our Headers are made in *Pekin, Illinois*, and are the most approved style and make. Look out for "inferior makes" with *pretended* improvements, that may be offered by California dealers or their agents.

Clipper Mower—Four sizes. Combines MORE *desirable* features than can be found in any other *one* Mower. Nos. 3 and 4 are more particularly recommended for *heavy* work and remote districts, the No. 2 being lighter and not as strong as the *larger* sizes. Descriptive circulars furnished.

Sprague Iron Mower—A model of *simplicity* and *perfection of mechanism*, and is THE *finest geared* machine yet introduced; is *strong* and *durable*, and unquestionably THE BEST *moderate priced* Mower in the market. ☞ Send for a Sprague pamphlet, and examine into the merits of this new Mower, which has created such a stir in the East.

Pitt's Improved "Challenger" Thresher—More improvements and *additions* for 1873, in both Separators and Powers. Want of space forbids enumerating. It is now recognized as THE *leading* Thresher, and stands far ahead of "*Windlist of the Blowers*" in the estimation of the Threshing public. GUARANTEED to separate faster and clean better, without cracking or waste of grain, than any other Thresher known.—Particular attention is called to the "*noiseless* END-SHAKE" SHOE, and *new* improvements in the "Mounted" Powers, etc., etc. Threshmen who have not seen the changes and improvements made in the "Pitt's" Buffalo Thresher during the last two years, will *consult their own interest* by looking at the "HALLENGER" before buying elsewhere. All sizes, from 4 to 12-horse power.

Hall's 'Tornado' Thresher—Similar, but *much superior* to the "Russell" and "Sweepstakes," with a *heavier frame* and *rocker shoe*, and other improvements for 1873. It is a superior Thresher.

Endless Chain Threshers—Wheeler, Melick & Co.'s; two-horse, with special improvements not to be found elsewhere.

Horse Powers—A" sizes and styles, including the *new model Pitts*, both "Mounted" and "Down."

Buckeye Mower, also Reaper and Mower—We are the sole dealers and agents for the sale of the "BUCKEYE" in Washington Territory and West in Idaho. These are "GENUINE," made by Johnson, Miller & Co., the *old inventors and owners* of the Buckeye Patents.

Taylor's Sulky Rake—Superior to any other Rake yet introduced. Very desirable for gleaning wheat fields as well as raking hay. Have had three made expressly "to order," *stronger* and *lighter* than can be found elsewhere.

Revolving Rakes—8 and 10 feet long, also the

Barnes Rake—Nine feet head, mounted on "springs," new tripping device—is much THE BEST Revolving Rake made.

Horse Hay Forks—"Palmer's," "Walker's" Harpoon, also the "Nedin" Harpoon.

Fan Mills—Clarke's "Double Shaker" Picine Mill, the only Mill that will *separate chaff* from Wheat *perfectly*.

Churns—"Blanchard's," the BEST *in the world*—also the Cylinder and the Thermometer.

Wagons—We have both the "PACIFIC" and "BAIN," with "NEW PATTERN," *extra strong and heavy Bolster*. Wheels soaked in "BOILING OIL," and other improvements for 1873. Guaranteed to *run lighter* and *outwear* any other wagon in this market.

ALSO,

Harvesting Tools,	Mill Stones,
Extras for Machines,	Smut Machines,
Sickle Sections,	Steam Engines,
Rubber and Leather Belting,	Planing Machines,
Turbine water wheels	Buggies, Carriages,
	Etc., Etc., Etc.

We import only the BEST articles, and our prices will at all times be as low as the lowest.

☞ Look out for irresponsible "Runners," who are anxious to get rid of "second-rate" Machines.

☞ Liberal terms to the trade. Manufacturers' Descriptive Circulars sent free on application. **KNAPP, BURRELL & Co.**

Portland, Oregon.

RYDER'S
AMERICAN FRUIT - DRYER,

Patented Nov. 12, 1872.

For terms of State, County, Manufacturers', or Farmers' Rights, address J. C. ROUNDS, General Agent for Oregon and Washington Territory, Salem, Oregon. Circulars and samples of Fruit sent to any address on application

The above cut represents the AMERICAN FRUIT DRYER as it is constructed for farmers and for general family use, combining cheapness in first cost, durability, simplicity, and practical utility, in the most perfect manner. It will dry and preserve equally well all kinds of fruits, vegetables, and animal substances, as strawberries, cherries, raspberries, blackberries, gooseberries, currants, grapes apples, peaches, pears, plums, quinces, green corn, peas, beans, sweet and round potatoes, pumpkins, egg plant, tomatoes, hops, beef, fowl, fish, etc., all of which retain their flavor with increased sweetness, and when properly treated with water, are easily restored to their nearest possible natural size and fresh appearance.

Extract from "The Dried Fruit Circular" of E. D. Robinson, New York. "All fruits sell *principally by color* which should be *bright*. Dark qualities rule low and are slow of sale." Fruit dried in the American Fruit Dryer has invariably taken the first premiums wherever exhibited for *color, flavor*, and *general appearance*.

In the AMERICAN DRYER, principles are practically applied in combination with a mechanical arrangement entirely new in the history of fruit dryers, by which a current of dry heated air—automatically created—is made to pass underneath and around the fruit in trays, and then pass off over them, carrying the moisture arising from the fruit out of the machine without interfering with or passing through the trays above. The strongest heat being concentrated upon each tray when it enters the DRYER below, and every time a tray of fresh fruit is pushed in (say every ten minutes), it displaces all the rest one stage further up the inclined flue; when the machine is full the upper tray is taken out, emptied and refilled with fresh fruit and again introduced below, and so on continuously, giving at once rapidity, convenience and absolute security against overheating, burning or scorching.

Having made arrangements to manufacture the AMERICAN DRYER, I am prepared to furnish them at the following prices:

No. 1, 24 inches wide,	12 feet long			$25 00
No. 2, 30 "	14 "			32 50
No. 3, 36 "	16 "			40 00

The above prices do not include the stove. Any common box stove or any kind of a wood stove with a flat top can be used.

No. 1 will dry as fast as two hands can prepare the fruit. No. 3 will give employment to four hands, and is cheaper, will dry faster, and turn out 50 per cent. finer fruit than a dry house.

The American Dryer is so easily manufactured, that it will, in many cases, be cheaper for Farmers and Fruit Growers to buy Farm Rights and make them themselves.

The following are the prices of Farm Rights: No. 1, $10; No. 2, $15; No. 3, $20. Printed plans and directions go with each Right.

Parties with small capital who would like to make the Dryers on Royalty can learn terms by calling on or addressing me at Salem.

Agents wanted to introduce and sell the Dryers and the rights to make and use them.

For further information, show bills, circulars and special terms to agents, address, inclosing stamp,

J. C. ROUNDS.

Salem, Oregon.

A model of the Dryer, and samples of fruit may be seen at the Pioneer Oil Co.'s office, at Salem.
