# Do We Have to Die?

Thirty-eight years ago in forbidden Tibet, behind the highest mountains in the world, a young Englishman named Edwin J. Dingle found the answer to this question. A great mystic opened his eyes. A great change came over him. He realized the strange power that knowledge gives.

That Power, he says, can transform the life of anyone. Questions, whatever they are, can be answered. The problems of health, death, poverty and wrong, can be solved.

In his own case, he was brought back to splendid health. He acquired wealth too, as well as world-wide professional recognition. Thirty-eight years ago, he was sick as a man could be and live. Once his coffin was bought. Years of almost continuous tropical fevers, broken bones, near blindness, privation and danger had made a human wreck of him, physically and mentally.

He was about to be sent back to England to die, when a strange message came — "They are waiting for you in Tibet." He wants to tell, the whole world what he learned there, under the guidance of the greatest mystic he ever encountered during his 21 years in the Far East. He wants everyone to experience the greater health and the Power which there came to him.

Within ten years, he was able to retire to this country with a fortune. He had been honored by fellowships in the world's leading geographical societies, for his work as a geographer. And today, 38 years later, he is still so athletic, capable of so much work, so young in appearance, it is hard to believe he has lived so long.

As a first step in their progress toward the Power that Knowledge gives, Mr. Dingle wants to send to readers of this paper a 9,000-word treatise. He says the time is here for it to be released to the Western World, and offers to send it, free of cost or obligation, to sincere readers of this notice. For your free copy, address The Institute of Mentalphysics, 213 South Hobart Blvd., Dept. L-261, Los Angeles 4, Calif. Readers are urged to write promptly as only a limited number of the free books have been printed. Adv.

# 23 Years Ago

**Monday, October 18, 1926**—"If it had been an east wind instead of from the south, there would be more loss than just six broken plate glass windows." Such was the observation of J. E. Howie, owner of the Howie Motor Car Co., just across the street from what was once the White Pelican hotel. So intense was the heat during the high point of the fire, that six of his windows cracked.
