POPULATION MAY DOUBLE
WASHINGTON (UPI) — The earth's population may more than double between now and the year 2,000 and reach the staggering total of six billion persons, a private research organization said today. The Population Research Bureau said the current rate of population growth is 1.7 per cent, enough to produce a population of 5,700,000,000 by the end of the century. This would double the present count of about 2,850,000,000.
