NOTICE OF PROPOSED DRAIN IN NORTH SALEM.

Notice is hereby given that the common council of the city of Salem, Oregon, by a resolution duly made at an adjourned regular meeting thereof held on the 29th day of December, 1905, deems it expedient and proposes to lay and construct a drain in North Salem, as follows:

One ten inch tile from the east end of Division street in North Salem, westerly along said Division street to Sixth thence westerly along said Division street with two ten inch tile to Commercial street; thence with two ten inch tile northerly along Commercial street to North street; also, commencing in said North Salem at the intersection of Capital and North streets, and running thence westerly along said North street with two ten inch tile to Commercial street and joining said four ten inch tile drains at said intersection of Commercial and North streets into two twelve inch tile drains and continuing said two twelve inch drains westerly along said North street to the Willamette river. Said drains to be so laid and constructed at the expense of the property owners benefited thereby and the cost thereof assessed upon the property directly benefited thereby as prescribed by the charter and the ordinances of said city.

This notice is published ten days by order of the common council, the date of the first publication being the 1st day of January, 1906, and remonstrances against the above named improvement may be filed with the undersigned within ten days after the final publication of this notice.

W. A. MOORES,
City Recorder.

PROPOSALS INVITED

For Supplies for the Oregon State Penitentiary for Period Ending June 30, 1906.

Sealed bids for drugs, dry goods, groceries, shoes, leather and findings, plumbing supplies, hardware, flour, fish, meat, etc., will be received at the office of the superintendent of the Oregon State Penitentiary until January 10, 1906, at 2 o'clock p. m., at which time they will be opened.

A deposit of $200.00 cash or certified check, payable to the superintendent, must accompany each bid for meat and flour, and all other bids must be accompanied by an amount equal to 10 per cent of the amount of the bid.

Samples to accompany all bids where practicable. The right is reserved to reject any and all bids and to accept or reject any portion of a bid. On each envelope should be inscribed the nature of the bid. Goods of Oregon manufacture or production will receive preference, other things being equal. All goods and supplies must be delivered to the penitentiary within 20 days after the contract is awarded.

Schedules of the various lines of goods will be furnished upon application to the superintendent.

Vouchers will be issued for payment on the first of the month following the completion of the contract, and monthly on continuous contracts.

Bidders will take notice that there is no appropriation available for maintenance of the penitentiary, therefore claims for supplies can only be audited by the Secretary of State and certificates of evidence of allowance issued to claimants. As soon as there is an appropriation available warrants will be issued in lieu of the certificates.

Bidders are invited to be present.

C. W. JAMES,
Superintendent Oregon State Penitentiary.

Salem, Oregon, Dec. 12, 1905.

SCHOOL BOARD WILL

The first meeting of the school board for the year and the last to be held in the police court room at the city hall was held last night at the usual time. The next and all future meetings will be held in the room which has been specially provided in the new high school building.

Most of the business last evening was auditing bills for furniture and labor, all of which were ordered paid.

Bids were opened for the purchase of the old Central school buildings, but there were only two. Joseph Albrich bid $1 for the big building and R. R. Ryan & Co. bid $15 for the small one and $25 for the large one. Action on the bids was deferred.

Bids were also opened for the construction of the septic tank at the Yew Park school. Bernardi & Dunsford were the lowest, $1195, with A. L. Fraser $1215 and M. J. Petzel $1260. The bids were taken under advisement.

City Superintendent Powers submitted a report containing many recommendations and suggestions, which was refered to the committee on supplies. Following is the record in full.

"The following is a list of articles and necessary improvements for the new high school building: Bicycle rack and screens in toilets, piano, electric clock and bells for each room shelves for office and vault, lowering hooks in four cloakrooms, blackboards for eight rooms, hose for janitor, telephones, small dictionary stand, small hand bell.

"The superintendent respectfully asks the permission of the committee on supplies to purchase the following articles which are needed for the grades at once; the cost will be about $20: Varnish and brush, lead pencils pens, practice paper, report cards and sand paper.

"Regarding the desks in the assembly room, I beg leave to report that there are in all 258 complete desks that is, desks with seats, twelve desks with no seats, and twelve back seats, giving a seating capacity of 264. There are twenty-three of the large tablet arm settees and seventeen small ones. The small ones should be exchanged for large ones.

"I have also to report that all pieces of physical apparatus were received in good condition, excepting the mercurial barometer, the glass tube to which was broken in transit. I believe that according to the terms of shipment, all articles broken in transit are to be replaced by the shippers free of charge.

"The science teacher is now ready to use the chemical apparatus and reagents, and they should, if possible, be provided for him without delay.

"The floors of the new building are especially hard to clean, and cold water with ordinary mops is ineffective. If allowed to remain in their present condition, they will become harder to clean as time goes on. I am of the opinion that hot water should be provided in the building for the use of the janitor. An ordinary hot water tank, with a coil passing through the furnace, should serve the purpose. The floors of all the halls and rooms of the new building will need to be thoroughly cleaned once a week.

"Unless the board orders otherwise I will place the high school principal in charge of the new building, and will hold him responsible for the condition of both building and grounds. The principal desires to know under what condition the students may be given a room in the building for evening program. Mr. Marlotte has the entire respect and confidence of the student body, and under his management the work of the high school along all lines is progressing very satisfactorily."

Tuxedo Park Club Opening.

North Essington, Pa., Jan. 8.—The Tuxedo Park club, of which Tox O'Rourke is the leading spirit, will formally open its magnificent club house this evening. It is not quite completed in every detail and equipment, but the work is far enough advanced to enable the new club to give an elaborate housewarming. The club has been formed for the purpose of fostering every branch of lawful amateur and professional sport, but especially boxing. In accordance with its program the club will arrange, twice every month, a number of 20-round boxing contests between some of the best boxers of this country. Particular attention will be paid to the physical condition of the contestants, in order that accidents may not occur which would arouse antagonism to the club. The company will operate under a charter granted by the commonwealth of Pennsylvania, to encourage by contests and exhibitions baseball, boxing, footracing, automobile trials and all forms of indoor and outdoor sports. Under its charter the club has not the right to sell or give away liquor on its premises and no form of gambling is to be tolerated. The land upon which the large clubhouse has been built is located at North Essington, Delaware county, Pa., and has been leased for a term of ten years. It runs parallel with the Chester branch of the Philadelphia & Reading railroad. The building includes a large amphitheater, seating 6000 people dressing and locker rooms, and a thoroughly equipped arena. The building is so arranged that it can quickly be turned into a convention hall, exhibition room or auditorium, in which musical festivals can be given.

Habit-forming Medicines.

Whatever may be the fact as to many of the so-called patent medicines containing injurious ingredients as broadly published in some journals of more or less influence, this publicity has certainly been of great benefit in arousing needed attention to this subject. It has, in a considerable measure, resulted in the most intelligent people avoiding such foods and medicines as may be fairly suspected of containing the injurious ingredients complained of. Recognizing this fact some time ago, Dr. Pierce, of Buffalo, N. Y., "took time by the forelock," as it were, and published broadcast all the ingredients of which his popular medicines are composed. Thus he has completely forestalled all harping critics and all opposition that might otherwise be urged against his medicines, because they are now of known composition. Furthermore, from the formula printed on every bottle wrapper, it will be seen that these medicines contain no alcohol or other habit-forming drugs. Neither do they contain any narcotics or injurious agents, their ingredients being purely vegetable, extracted from the roots of medicinal plants found growing in the depths of our American forests and of well recognized curative virtues.

Instead of alcohol, which even in small portions long continued, as in obstinate cases of diseases, becomes highly objectionable from its tendency to produce a craving for stimulants, Dr. Pierce employs chemically pure, triple-refined glycerine, which of itself is a valuable remedy in many cases of chronic diseases, being a superior demulcent, antiseptic, antiferment and supporting nutritive. It enhances the curative action of the Golden Seal root, Stone root, Black Cherrybark and Bloodroot, contained in "Golden Medical Discovery," in all bronchial, throat and lung affections attended with severe coughs. As will be seen from the writings of the eminent Drs. Grover Coe, of New York; Bartholow, of Jefferson Medical College, Phila.; Scudder, of Cincinnati; Ellingwood, of Chicago; Hale, of Chicago, and others, who stand as leaders in their several schools of practice, the foregoing agents are *the very best* ingredients that Dr. Pierce could have chosen to make up his famous "Discovery" for the cure of not only bronchial, throat and lung affections, but also of chronic catarrh in all its various forms wherever located.

Fourth Purdue Corn School.

Lafayette, Ind., Jan. 8.—The fourth annual corn school and exhibition at Purdue university opened today with an unusually large attendance. For the purposes of the exhibition the state has been divided into five sections and premiums are offered in three classes for white, yellow and mixed corn, in each section. There are also sweepstakes provided for each section and the state in general.

For the school an excellent program has been arranged this year. There will be lectures twice every day. An ample corps of assistants has been engaged to assist those engaged in the corn judging, so that every person who desires specific instruction in judging corn will be able to receive it.

There will also be daily lectures on problems in breeding and feeding, as well as daily judging of live stock, including horses, cattle and dogs. Miss Ivy F. Harner, professor of household economics, Purdue university, will give daily lectures and laboratory demonstrations of foods and their preparation. Miss M. M. Mather, a domestic science teacher and Chautauqua lecturer, will assist Miss Harner in giving instruction to the women who will attend. She will also lecture on sanitation and decoration of dwellings, household management, etc. T. Orr, secretary of the American Po association, will give daily lectures poultry. The winter school of culture will begin immediately the close of the corn school, will be on January 13.

Nature's Great Invention

On de banks ob de Amazon, far away, far away,
Whar Dr. Green gits August Flowers to dis day,
Ah picked dese flowers in August in ole Brazil,
An' sho' I'se a Yankee, ah longs to be dar still.

¶August Flower is the only medicine (free from alcoholic stimulants) that has been successful in keeping the entire thirty-two feet of digestive apparatus in a normal condition, and assisting nature's processes of digestion, separation and absorption—for building and re-building—by preventing ALL irregular or unnatural causes which interrupt healthy and perfect natural processes and result in intestinal indigestion, catarrhal affections (causing appendicitis—stoppage of the gall duct), fermentation of unhealthy foods, nervous dyspepsia, headache, constipation and other complaints, such as colic, biliousness, jaundice, etc.
