EDITORIAL NOTES.

It is not often that Satan rebukes sin, and when he does his mercenary designs in the effort usually crop out in as prominent a manner as does his famous hoofs. Perhaps as an example of that kind the introduction of the following resolutions into the cigar makers international association in New York city is a fair sample:

WHEREAS, The practice of cigarette smoking seriously affect the growth of the trade we represent, we are of opinion that it has served to demoralize and injure the youth of our country, undermining their health, impairing their mental faculties and rendering them unfit for any useful purpose; therefore be it

Resolved, That we recommend the passage of a law by the various state legislatures which shall prevent the manufacture and sale of cigarettes.

THE Chinese people are likely to remain for an indefinite period the deluded conservative, semi-civilized bigots of the world. The Chronicle says that the destruction of the Temple of Heaven in Peking may have a disastrous effect upon the project of the liberal Chinese to introduce Western inventions into the empire. The Chinese are an extremely superstitious race, and a visitation of this kind is regarded by them as an evil omen. On the occasion of the recent burning of one of the gates of this building it was generally accepted as a warning that foreign improvements should not be encouraged. In all probability these warnings will be repeated with increased emphasis, and the plans of Li Hung and his intelligent co-operators may receive a long set back.

THE Free Press says that it is an interesting fact to which Mr. Edward Atkinson calls attention, that while the population of the United States during the past ten years has averaged about 4 per cent of the estimated population of the globe, the consumption of iron and steel in this country has averaged 30 per cent of the world's consumption and now exceeds 40 per cent. The consumption of iron steadily increases, notwithstanding the enormous reduction in its way for railway purposes. Both iron and steel are being used more and more widely every day in buildings, bridges and other structural work; and while the American product for 1889 will exceed that of Great Britain, it is not large enough to supply the home demand.

THE sorghum sugar business, which last year was heralded as a success, it appears does not meet the close scrutiny of Secretary Rusk with as favorable a view as it did that of his predecessor. Secretary Rusk says: "I can not say that it has proven a success as yet. The government chemists stationed at the mills are at work to find out ways of improving on the results which we now get, but unless that can be done I am very doubtful where the profit of making sugar from sorghum will come. Three or four of the chemists, however, are still hopeful of favorable results."

THE fourth annual report of Carroll D. Wright, commissioner of labor, which has just been issued, is an interesting addition to existing information and statistics on the subject of labor in America. Not the least important feature of the volume is a chapter devoted to the character of working women. Original investigations were made in many cities, and the commissioner thus sums up his opinion on the whole question. "From all that can be learned, one need not hesitate in asserting that the working women of the country are as honest and as virtuous as any class of our citizens."

PROMINENT among the candidates for the seat in congress made vacant by the death of Sunset Cox, is the opulent Perry Belmont, who resigned from the fiftieth congress to become minister to Spain for three months. Among the other aspirants are Amos J. Cummings, Henry Bischoff, Berry Dougherty and Charles Dana. The wit and genial humor of the redoutable Cox however, will not be brought to the next congress no matter who is his successor.

IT is an acknowledged fact that American built ships, after English designs, surpass the models in all essential particulars, especially in the speed, the quality most sought after. Then why not also demonstrate that American built ships after American models preminently surpass English ships, models, building and all. The fact can without doubt be made apparent to the world, and will be ere long.

THE commissioner of Internal Revenue collected taxes last year upon 2,151,515,300 cigarettes, which is an increase of 388,939,260 over the preceding fiscal year. The number taxed is a pretty good indication of the consumption. The number of cigars taxed during the last fiscal year was 2,867,384,640, an increase of 22,658,990, showing that the consumption of cigarettes is increasing more rapidly than that of cigars.

THE great lake which was said to have been discovered, three or four years ago, on the divide between Labrador and Quebec, and which it was affirmed would usurp the claim of Superior as being the largest fresh water body in the world, has dwindled down to a fish pond only one hundred miles long and from ten to fifteen miles wide. Superior is still the monarch of fresh water lakes.
