STOCK AND WOOL NEWS.

Tendency Among Growers to Turn off Wool Early.

Shearing in what is known as the Sand country down along the Columbia is now finished and shearers are now commencing along the foot hills.

The lambing season is well along. Reports from all over the county show a large percentage of lambs saved.

Contrary to expectations some time ago, the fleeces are a little light, however, there is a slight shrinkage, making better values and the fleeces will bring as much money as the average.

The sheep and wool market remains about stationary. Average light wools are worth about 11 cents, and choice lots will bring a little higher figure.

Growers this season have shown a decided tendency to turn off their fleeces at the market price.

E. J. Burk, representing Judd & Root of Hartford, Conn., came in Saturday evening and will remain during the wool season. There will no scarcity of buyers.

Chas. Hales, of Waitsburg, Wash., an old time resident of Sand Hollow is in the city. Mr. Hales is here for the purpose of buying a train load of 2 year-old wethers.

Light losses in sheep are reported from several districts, supposed to be caused from some poisonous weed on the ranges, but this is not an unusual occurance. Sheepmen who have observed closely are of the opinion that the cold late spring which has retarded the growth of grass, has caused the sheep to eat this weed.

The following sheep sales are reported: W. P. Dutton, 1830 mixed yearlings at $1 87½ per head.

John Q. Wilson, 1760 mixed yearlings at $1 87½ per head.

Mike Marshall, 2000 2-year-old wethers at $2 30 per head.

O. E. Farnsworth, 6000 mixed yearlings at $1 82½ per head.

O. Justus sold a lot and a few others whose names we did not learn.

The above lots were purchased by Montana and California parties.

COMBINATION CATTLE SALE.

10 Registered Herefords Sold in Heppner.

A train load of registered Hereford cattle, which have been making the principal towns of Eastern Oregon, for the purpose of selling, arrived in Heppner, Friday morning of last week. The stock was unloaded at the stock yards at the depot and was kept there for exhibition and for sale until Sunday morning.

It was a combination sale by different Eastern breeders, principally from Missouri, Illinois and Kansas, under the direction of the American Hereford cattle Breeders Association. C. R. Thomas of Kansas City, Mo., secretary of the association, had charge of the sale. Associated with Mr. Thomas were Geo. W. Scott of Belton, Mo., C. A. Stannard of Emporia, Kas., F. F. Gerdge'l of Independence, Mo., and Col. R. E. Edmonson of Kansas City, a prominent live stock auctioneer.

The original lot of cattle consisted of 141 head. Fifty five of the animals were sold before reaching Heppner. They were all bulls, and it was certainly a fine lot of stock.

Ten of the animals were purchased by Morrow county stockmen.

We understand that the price averaged a little better than $100 per head for yearlings and 2 year olds.

Low Rates to the East.

The O. R. & N. Co. has issued circulars announcing following rates to the annual meeting of the National Educational Association to be held at Minneapolis, Minn., July 7-11, 1902:

From Portland, Puget Sound and common points, $42; from Spokane, Pendleton, Lewiston, intermediate and common points, $47, to Minneapolis and return via Spokane and Great Northern railway in both directions, from Pullman and all stations, $41 90; from Moscow $42 85; from Lewiston, $44 35. Stopovers will be allowed in each direction within limit. Usual diverse routes available going and returning, except returning through California.

To annual meeting of Grand Lodge B. P. O. E., to be held at Salt Lake City, Utah, August 12-14. From Portland, $29 60; Hood River, $29 60; The Dalles, $28 50; Heppner, $28 95; Pendleton, $25 20; LaGrande, $23; Union, $22 60; Baker City, $21 60.

Rates Again Reduced.

From all points east. Before you make definite arrangements for that trip east let us quote you rates via the Illinois Central Railroad. Our rates are the lowest to be had, and it will pay you to write us. If you haven't time to communicate with us tell the agent from whom you purchase your ticket that you want to travel by the way of the Illinois Central, and you will never regret the trip.

If any of your relatives or friends in the east are coming west while the low rates are in effect write us about them, and we will see that they get the lowest rates with the best service.

Through tourist cars, personally conducted excursion cars, free reclining chair cars, in fact all the latest conveniences known to modern railroading.

For particulars regarding rates, time, service, stop overs, different connections and routes, etc., etc., call on or address

You Can Lead a Horse
to water but you can't make him drink.
You can't make him eat either. You can stuff food into a thin man's stomach but that doesn't make him use it.
Scott's Emulsion can make him use it. How? By making him hungry, of course. Scott's Emulsion makes a thin body hungry all over. Thought a thin body was naturally hungry didn't you? Well it isn't. A thin body is asleep—not working—gone on a strike. It doesn't try to use it's food.
Scott's Emulsion wakes it up—puts it to work again making new flesh. That's the way to get fat.

WAX FOR PHONOGRAPHS.

Immense Quantities of a South American Product Consumed in Making Cylinders.

In manufacture of phonograph record cylinders there are consumed immense quantities of a peculiar substance called "Ceara wax," which is produced in the form of a fine powder on the leaves of a species of palm, plentiful along certain rivers in the state of Ceara, Brazil. The wax is also employed to give luster to russet boots and to harness, as well as for a polish for hardwood floors. From each tree about six young leaves are gathered with pruning-shears fixed upon a long pole, and this is repeated twice during the season, from September to March, says the Philadelphia Saturday Evening Post.

Generally, it takes from 2,000 to 5,000 leaves to produce enough powder to make 30 pounds of wax. When gathered the leaves are dried in the sun, after which the whitish dust which covers them is brushed off with switches in a tightly-closed room. The dust, being swept up, is boiled for a few minutes, when the wax, gathering at the top, is skimmed off and strained.

When dry the substance is a hard, light yellow wax. The leaves from which it has been obtained are used in the manufacture of hats, matting and brooms, and a valuable fiber is also obtained from them. The seed of the tree resembles a small cocoanut, and affords good food for pigs, and after being ground it serves as an adulterant of roasted coffee.

Beware These Dates.

Rudolf Falb, the eminent European weather prophet, says that there will be several critical days during 1892. These days he divides into three classes according to importance. Those of the most importance are January 24, February 22, March 10, April 8, May 7, June 6, July 5, August 19 and October 31. Those of the least importance are May 22, June 21, July 20, November 30 and December 29.—N. Y. Herald.

Mildred—No. But once I flirted my handkerchief at an express train that was passing with people looking out of the windows.—Chicago Record-Herald.

MADRID AN UNHEALTY CITY.

High Mortality Rate Caused by Neglect of Sanitary Conditions and Food Adulterations.

The unenviable distinction of being in every way the most unhealthy capital in Europe is enjoyed by Madrid. According to statistics published by the municipality there have been 79,374 deaths during the past five years among a population only slightly exceeding half a million. In 1901, the deaths numbered 17,242, and of these 4,064 were of children under 4 years old. This gives a rate of about 33 per 1,000. In the five years period, consumption carried off nearly 10,000 inhabitants, and smallpox and measles 5,000 more. The municipality is just beginning to realize the bearing of these figures, and various decrees have been published for the better enforcement of sanitation. Among other things, it is to be a punishable offense to let an apartment or dwelling before it has been disinfected by the municipal laboratory department. But two of the greatest evils in Madrid are food adulteration, which is virtually unchecked, and overcrowding. The 528,000 inhabitants are herded in 17,000 houses, which gives an average of 31 persons per house.

Indians Must Not Paint.

Close-cropped hair, faces destitute of paint, and the abandonment of the blanket" are the twentieth century styles prescribed for the red men by the commissioner of Indian affairs. It is believed that the order against painting the faces is made because the paint melts and runs into the eyes, producing disease. Something, too, may be said for the "boiled shirt." It is hygienic if ugly. But why not leave the way of wearing the hair to individual taste? To be sure, it may be said in defense of the order that the Indians themselves have made several attempts to set the fashion for short hair, only it was designed for other heads than their own, and has sometimes been enforced by a process which removed something more than the hair.

A DOCTOR'S BAD FLIGHT
"Two years ago, as a result of a bad cold, I lost my voice," writes Dr. M. L. Scarbrough, of Hebron, Ohio, "which began an obstinate cough. Everybody known to me as a practicing physician for 35 years, failed, and I daily grew worse. Being urged to try Dr. King's New Discovery for Consumption, Coughs and Colds, I found quick relief and for last ten days have felt better than for two years." Positively guaranteed for Throat and Lung troubles by Sloan Drug Co. 50c and $1.00. Trial bottles free.

MISS VIRGINIA GRANES
Tells How Hospital Physicians Use and Rely upon Lydia E. Pinkham's Vegetable Compound.
"DEAR MRS. PINKHAM:—Twelve years continuous service at the sick bed in some of our prominent hospitals, as well as at private homes, has given me varied experiences with the diseases of women. I have nursed some

MISS VIRGINIA GRANES

President of Nurses' association, [illegible] most distressing [illegible] and abdominal troubles. I have known Lydia E. Pinkham's Vegetable Compound [illegible] in all the past years. I have recommended your Compound to patients and have never yet had cause to blush for my action.
Four years ago I had a severe attack of grippe, followed by a most distressing cough. I was a patient in a hospital at the time, and some days I was so hoarse I could not speak. I was much prostrated, and was fearful that I would not be able to continue my work. I had taken your Vegetable Compound [illegible] and I began to take it. I am most pleased to state that my cough gave way in a few weeks, my voice became clear and my general health improved. I can now do my work with ease and pleasure. Your Vegetable Compound has proved invaluable to me in my work, and I shall always speak a word for Lydia E. Pinkham's Vegetable Compound whenever I find an opportunity. Miss VIRGINIA GRANES, [illegible] Street, Cambridge, Mass.
Lydia E. Pinkham's Vegetable Compound has stood the test of time, and has cured thousands.
