The Oklahoma Boom.

WASHINGTON, April 10.—No end of trouble is anticipated from the enormous rush of boomers to Oklahoma. There are about 10,000 quarter sections of land and about 100,000 people have made arrangements for invading the promised land the moment the president drops the hat. The most reliable estimate that can be made, puts five claimants to every quarter section. For every quarter section on which a well is situated there will be a dozen claimants, and they will all enter their claims so nearly simultaneously, that, as the only witnesses will be the rival claimants it will be simply impossible to determine who was the first, and hundreds of disputes will have to be settled by an appeal to force. It is expected that the nine-tenths who fail to get land will spread out on the land of the civilized Indians, and nothing short of the whole United States army can get them off. So the boomers will probably get the lands and the government will settle with the Indians.
