Mr. Bremner, who is going into business at Skaguay, took with him tools and horse shoes. The usual crowd was at the wharf yesterday to bid their friends farewell.

We have been informed that in the latter part of this month Dr. Janson expects his brother Herr Orne Kratz Janson on a short visit. Herr Janson has recently arrived from Germany, where he completed his studies on the violin. He spent four years there, studying under the supervision of the greatest masters of that country. One year in Berlin under the great Hollandish violinist, Brahm Eldering, and three years in Dresden under Kapelmeister Wolfermann and Rapaldi, eGrmany's second Joachim. During his short stay in Astoria he will give a concert, assisted by Mrs. Dr. Janson and Mrs. Olsen. The date of the concert has not been settled yet, but full particulars will be given later on. Herr Janson is for the present in Seattle with his brother recuperating after his years of toil. On his tour out to the coast he gave several concerts in the leading citels of the middle states, Chicago, Minneapolis and St. Paul, reaping laurels wherever he played and receiving the best of criticisms. In the near future Herr Janson is contemplating a tour through the coast states, playing in the leading cities, thus hoping to gain the recognition which he feels that he deserves. His concert in Astoria promises to be one of the best ever given in this city, an opportunity which the music loving people should take advantage of.

Astoria, Oregon.

Continue sale at Astoria for next few days if necessary to give everybody a chance to take advantage of our final sale there. W. W. KIMBALL Co.

Six sales is the record of our sales yesterday, and more will follow today, at this rate I shall soon leave you and with this sale goes your last chance to get a first-class piano or organ from the manufacturers. L. V. MOORE.

NOT DEAD BUT SLEEPING.

I was told when I came to Astoria that the town was dead and that I could not hope to do any business this trip as no one had a dollar,

Astoria is not dead, but sleeping and the people have suddenly awakened to the full realization that we are doing what we have announced through the press, and nat you can save $100 to $300 on a piano and $25 to $50 on an organ, and that this will be their last chance of buying a first-class instrument from a reliable manufacturer at home at manufacturer's prices.

We find money is plenty and every body is now in the deal. Six sales is the record for Monday and we refused two spot cash sales because the prices offered were not in keeping with the quality of the goods.

Quality considered no retail dealer or agent can come within $100 to $200 of the special prices we are now offering.

All goods priced on a cash basis; easy payments at 8 per cent interest. Old pianos and organs taken in part payment for new ones. Our assortment is limited, call early and make your selection, while it is yet time.

OUR RANGERS BEST ON EARTH

NO HORSES IN THE WORLD CAN EQUAL THEIR ENDURANCE.

Report of Dr. W. A. Bruett of Bureau of Animal Industry—Interesting Details of Life on the Plains.

Chicago, Sept. 6.—"No horses in the world except the range horses of our western states, for military purposes, and I think the trip just finished by my cowboy friends here proves my assertion."

The foregoing remark was made by Dr. William A. Bruett, special commissioner of the bureau of animal industry of the department of agriculture. He was at his home in this city and with him were two stalwart, sunburned young men, William and Bert Gabriel.

"These young men," continued Dr. Bruett, "have just demonstrated that the bronchos and range horses of our plains can cover a distance of 2400 miles in 90 days and subsist on grass and water along the route, without grain, and, more important still, from a military point of view, without being shod. I can say without fear of contradiction that no other horses in the world could have made the trip under the circumstances.

"The route beginning at Sheridan, Wyo., and ending at Galena, this state, covered all kinds of country, turf, sand, rock, clay and mud. When they entered the last 100 miles the horses were in as good condition in every way as when they started from Wyoming but from Dubuque to Waterloo, Iowa, the road along the Mississippi was either over jagged rocks or throught deep mud. The heels and frogs of the horses feet were so badly bruised that, although they could have completed the distance to Chicago, I telegraphed the men to let the noble little animals stop at Galena. Had the horses been shod at Sioux City, as I telegraphed, knowing the roads over which they would have to travel to reach Chicago, the horses would have reached here in first-class condition on Saturday. The telegram failed to reach the men and they brought the horses through under my original instructions. As a test of the endurance of the western horse, I am sure the department of agriculture will be more than satisfied with the result, as it demonstrates the animal is all that has been claimed. As I said before, no other horses in the world could have made such a trip under such conditions. I believe it will change the opinions of foreign governments, who have felt that our range horses were too light for military purposes. It is a fact not known, as I have said before, that the range horse has in his veins the blood of the thoroughbred and the standard bred Percheron, Clydesdale, Hambletonian and other famous strains. Stallions of these classes have been sent to the ranches, and the result is an increase in the size and quality of the horse. Range horses, as they are called in distinction from bronchos, range in weight from 950 to 1150 pounds. The bronchos, which are of Spanish origin and have no improved blood in them, weigh from 750 to 900 pounds.

"We believe the performance of these two horses which have just come from Wyoming will influence the German and English army agents and exporters for domestic purposes to try our western horses."

FORD CONVICTED.

Seattle, Sept. 6.—A special to the Post-Intelligencer from Everett, announces the conviction, by a committee of the Puget Sound Methodist conference, of the Rev. W. Ford., formerly pastor of a church in this city, on a charge of adultery with his servant girl. Ford has been expelled from the church by a vote of 12 to 1.

THE WORLD'S WHEAT.

Serious May be Experienced Without Good Management.

London, Sept. 6.—Mark Lane Express says that correspondents of English business firms state that the crop will amount

The Astria-Hungary crop is stated to be 17,000,000 quarters. This adds greatly to the gravity of the situation. America's crop is reckoned by careful judges to be 55,500,000 quarters, or 11,000,000 quarters improvement to offset the decline of 8,000,000 quarters in Russia and from 6,000,000 to 10,000,000 quarters in France.

All the figures point, therefore to a deficiency in the world of about 14,000,000 quarters. Should the demand be actually as large as this, the store of old wheat will be used up and a crisis of great seriousness will only be prevented by general good prospects for the spring of 1898.
