An Associated Press telegram says that "Portland, Oregon, has been omitted as a tea-examining port." This is a treasury order. It has been procured at the instance of certain transcontinental railroads, in order to prevent the importation of tea at Portland. Here is a matter for the attention of Oregon's delegation in congress. This act will not bring any increase of admiration at Portland and throughout Oregon for the administration that caused it.—Yesterday's Oregonian.

This is one of the complaints Astoria has to make of Portland's friend, the Great Northern road. Mr. Hill is perfectly willing to send most of the wheat he can gather up on his main line down his branch, the O. R. & N. to Portland, taking good care to charge the producers the same rate of freight he would charge to take it over the summit of the Cascades to Puget sound—but when it comes to importing his Oriental traffic, Seattle is good enough for him. The Oregonian knows the reason why no tea is imported at Portland, and that the treasury order complained of was issued because the government was paying inspectors' salaries at Portland when there wasn't any tea for them to inspect. The Oregonian is behind the scenes in O. R. & N. management; why doesn't it call upon that road to answer why its master, Mr. Hill, doesn't bring Oriental cargoes to Portland? The administration has many sins to answer for no doubt, but the Oregonian is guilty of deliberate prevarication when it attempts to prejudice the minds of the ignoramuses at Portland who take their daily prayers out of its columns by telling them the administration is responsible for the decline of their town. McKinley isn't a director in the O. R. & N.-Great Northern railroad combine now pulling down Portland to build up Seattle, but the Oregonian stands very close to more than one of the manipulators in that plot, and could give some mighty interesting and important information as to their doings if it would.

No wonder stocks are booming. It is not surprising that merchants, bankers and manufacturers are wearing cheerful faces. American products are not only selling well at home, but they are in great demand abroad. When our locomotives were ordered recently by India and by France, English manufacturers opened their eyes very wide, but now that the Great Northern Railroad Company of England has placed an order for twenty locomotives with the Baldwin Company, of Philadelphia, there is consternation among our British competitors. It is such triumphs as this which impart a spirit of buoyance to every department of business. Americans are supplying the world with grain, but they are also successful contestants in an ever-enlarging field of manufacturing. In the same dispatch from London which announces the awarding of the contract for locomotives is the statement that an American company is about to build a bridge over the Atbara river, in the Soudan. Such events as these will fortify the people of this country against depression and lack of confidence. They will help to continue the present era of prosperity and extend it, so that workmen as well as capitalists will feel the benefits of active business. One reason why the contract for locomotives was placed in this country was that the machines could be furnished quicker than in England. The fact is, we are preparing to supply promptly locomotives, bridges, typewriters, bicycles and a great variety of other things to any part of the world, and the demand is constantly increasing. With such a bright outlook, there must be work for everybody who is willing to do it, and ample rewards for persistent industry.

The Kind You Have Always Bought

In Use For Over 30 Years.

THE CENTAUR COMPANY, 77 MURRAY STREET, NEW YORK CITY.

In olden times a leper was stoned out of town; in modern times a sick man is stoned out of all his chances in life by the crowd of busy, hustling men who have no place and no use for him. A man who has bilious turns and tired feelings and frequent "off-days" might as well go out of business. These things are bad enough in the self-disgust and wretchedness they involve if they do not go any further. But you never know what is going to develop in a half-nourished, bile-poisoned constitution. If a man as soon as he feels that he is not getting the forceful strength and energy out of his food that he ought to, will begin taking Dr. Pierce's Golden Medical Discovery, he will soon put himself in the position where he can do a man's work easily and cheerfully.

His appetite will be sharpened; his liver invigorated; his digestion strengthened; an edge put on his whole nutritive organism. Those subtle poisons which debilitate the entire organism and invite consumption and a host of other diseases, will be driven out of the system; and he will gain plenty of pure nourishing red blood, muscle-power and nerve-force. In short he will be a man among men.

There are hundreds of delusive temporary stimulants, "malt extracts," sarsaparillas and compounds, which are more or less "boomed" by merely profit-seeking druggists, but an honest druggist will give you the "Golden Medical Discovery" when you ask for it. If well-informed, he knows that its sales have steadily increased for thirty years and that it is the invention of an educated, authorized physician who has devoted a life-time of active practice and profound study to chronic diseases.

Cleanliness being next to godliness is probably the reason so many persons frequent the Turkish bath on holy week.
