A Column About Books

Shoddy, by Dan Brummitt. Chicago. Willett, Clark & Colby.

Shoddy is dead wool-rags—salvage of raw material which is not raw material—a short cut to new cloth. In the case of Bishop Bartelmy Bonafede, of whom "Shoddy" is written, it made him an easy picker up of borrowed and reworked ideas, and put into his heart the perpetual dread of being discovered for other than what he seemed.

The book is a story of the development of a young English boy into a bishop of the Methodist church and the part which his early environment played in unfolding of his character, which, like his work, is shoddy. The book contains some marvelous character studies and a keen and penetrating understanding of Methodism from the country stretches to the more complicated and less frank city pulpits.

The author understands his leading character and still better makes the reader understand him. Two violent contrasts in the book come from the presentation of the two leading women in it, Viola Dimont, calculating, beautiful, far-seeing, who marries Bartelmy Bonafede and makes a bishop of him, and Effie Bailey, demure, sweet, puzzled childhood sweetheart of Bartelmy, who is jilted by him and marries Peter Middleton.

These four are the outstanding characters in the novel, and it is their story and the story of their two children which carry the theme through to a surprising conclusion. The start is slow and difficult, but the action becomes immeasurably speeded up as the story grows.

Gloria Amoris, by Charles Daniels. San Francisco Harr Wagner

Having a strange antipathy for sonnets, it is rather hard for the reviewer to criticize the opening section of Mr. Daniels' book. Some may be good sonnets, and some of them are probably very bad sonnets, but who reads sonnets any more?

The latter part of the book is devoted to "Gloria Amoris" which is written in rather a trying style; "Lyrical Poems" which are rather trite; "Songs" which are much better than the two groups before mentioned; and two long poems which justify the book. These longer poems are "The Tropics: a Caprice," and a medley caled "Merry Party on Capri." The latter reveals a hitherto unguessed sense of humor on the part of the author, with some rather nice bits of verse interspersed with varia-

"Ha! ha! Ha! ha!
For a soldier boy was he!
Ha! ha! ha! ha!
Than to fight he would rather flee!
The corpse of a fly
Was as huge to his eye
As the corpse of a major and three!
As .. we .. were .. drink .. ing
red .. Cap .. ri!"

The Trial of Mary Dugan, by Bayard Beller. New York. Samuel French.

A melodramatic play enacted in the court room is "The Trial of Mary Dugan." The girl is accused of having murdered a man named Rice who was found dead in her rooms. The case seems to be very complete against her; there seems to be only one decision possible from the jury. Mary's defense is baffled at every turn. Then Mary's brother enters the scene. He takes over the defense himself, and suddenly a change in the turn of the trial take place.

The denouement is a surprising one, the action reaching a highly melodramatic climax just before the end. The solution rests upon the simple fact that the murderer used his left hand to stab the man named Rice, and in establishing this fact and its connection with the case, the brother, Jimmy Dugan, provides the audience with many thrills.

The Early Life and Letters of Luther Burbank, by Emma Burbank Beeson. San Francisco. Harr Wagner.

A different slant on the life of the great plant wizard is offered in this volume by his sister, Emma Burbank Beeson, the only surviving member of the family. No effort is made to list the almost unbelievable and almost innumerable achievements of Burbank, but the volume is devoted, instead, to an intimate picture of his early life—with the things he thought and wrote. The book will undoubtedly be a worthy addition to the inevitable literature that shall some day be written about Burbank.

Bang! Bang! by George Ade. Boston. J. H. Sears & Co.

Many years ago—in the late mineties, to be exact—George Ade wrote some stories for the old Chicago Record, tying a handsome raspberry on to the popular Alger tales and such like fictions of the newsboy triumphant. They were absurd yarns, but not much more absurd than the tales they razzed.

At any rate, Horatio Alger, although they say he never got the trick of turning his bright ideas into millions as all of his heroes did, had a vast influence upon national reading and national life, and Ade wasn't just being funny; he was being the most effective of critics, a harpoonist, when he wrote "Bang! Bang!" The illustrations by John T. McCutcheon admirably fit the book.

SPEED BRINGS PROBLEMS

SHOCK ABSORBERS MAKE FAST DRIVING SAFER

The vastly greater speed which many automobile manufacturers have been building into their products during recent years is one of the principal reasons why the shock absorber has attained such importance that it is now standard equipment on a large number of cars, according to Brakel & White, dealer for Delco-Remy Lovejoy hydraulic shock absorbers in Eugene.

"A road irregularity which causes no passenger discomfort at 30 miles per hour results in a terrific jar when that speed is greatly increased, they say. "Of course road surfaces have been improved greatly but at high speeds the slight irregularities which cannot be eliminated from even the best of pavements are magnified to large proportions.

"Another angle which cannot be emphasized too much, is the fact that good shock absorbers provide any fast car with a far greater factor of safety. "If statistics on this point were obtainable, they would show a majority of accidents in which the driver loses control of his car are the direct result of sudden road shock and the resultant severe spring rebound.

"A positive acting rebound device controls the rebound and holds the car on the road thus retaining the traction so necessary to safety."

Supply Funds to Port

LISBON. — (AP) — The Portuguese government has announced it will during the next four years supply the province of Angola with sufficient funds to meet the demand for transfer money in the Angola market. One of the chief difficulties of commerce at Angola, which is in Portuguese West Africa, has been the lack of banking transfer paper. The government under power of a decree, also will regulate money transfers.

POINTERS for PARENTS

from "CHILDREN — THE MAGAZINE FOR PARENTS"

The happier a child is, the better his behavior will be.

• • •

A well-regulated, routine life for a child is essential to his physical and mental welfare.

Regular habits can be formed only if the child learns from experience that he is to do the same thing every day at the same hour.

It is only after the habit has become well established that we can afford to deviate from our charted course.

Even then it is with more or less danger that we introduce exceptions, for with each deviation from the routine come new interests and emotional satisfactions, which in themselves are the driving forces for every new habit. Thus we form the habit of irregularity.

Laziness is a symptom, not a disease. It may have a physical cause; it may have an intellectual basis; it may be an expression of emotional disturbance.

How much iron will be contained in a serving of vegetables depends to a large extend on the method of preparation. It will all be conserved if the vegetables can be served raw, steamed or baked, or cooked in a waterless cooker; little will be lost if the vegetable is boiled in a small amount of water, and the juice used in soups or gravies. One-half to three-fourths of the iron content of vegetables may be lost if the vegetables are cooked in much water and the water discarded.
