JULIAN BYRD - - - - - Manager

Here's to you Mr. Taft.

There's no longer any doubt.

Now, Mr. Harriman, it's your move.

Might just as well have voted for Chafin.

And Georgia! Wouldn't that "jar you?"

Bryan retains his position on the Commoner.

No, Missouri was for Bryan—that's about all though.

We're going to insist on "Boss" Foley to run Bryan's next campaign.

Bryan can get the crowds and enthusiasm, but can't get the votes.

Will there be some other excuse for delaying work on that railroad?

Guess we'll have to trust the banks as formerly—that is those who have money to put in 'em—this particular "we" isn't in that class.

The Ontario Democrat says they have struck a small flow of oil in the experimental well now being sunk in that place. It wasn't safe to mention oil last week but now that the election is over we may all get right into the "oil wagon." Burns hasn't any immediate oil prospects, but we do have prospects for artesian water. The drilling at the Miller Springs, from which we propose to have city water, has materially increased the flow and if they succeed in getting the sand bucket which has been fastened in the well out, they're going to get more water.

President Martin of the Oregon Valley Land Co., whose holdings extend across the southern part of the county, recently entertained the business men of Lakeview at a banquet and outlined the plan of the company to place the land upon the market. He made it quite plain to those present that his company would do great things for the interior and that their plan of distributing the various tracts was equitable. At that time he urged upon the business men of Lakeview the urgent necessity of some sort of a commercial organization for the purpose of advancing the interests of the community in general. This is what is needed in Burns. Our business men should get c'oser together on matters of mutual interest and in that way only can the welfare of this section be advanced. We are all too selfish and seem to be looking only to our own individual interests. The Times-Herald has a suggestion along this line: The Burns Athletic Club has very comfortable quarters and although organized for the particular benefit of our young men, its membership also includes several older ones who went into the organization for the purpose of making a community affair and to broaden its scope, socially and otherwise. There is no reason why every business man of Burns should not belong to this organization and meet at stated intervals to discuss the needs of this section and taking steps to further the interests of the Harney country. Every man in Burns will admit the need of such, yet very few seem willing to take an active part and help push. Think this over and let us have a united set of business men pledged to take an active part in such a move before they sit down to their Thanksgiving turkey.

TAFT IS ELECTED.

The Times-Herald has not attempted to secure the election returns from all the states, as such information that has been received up to going to press has been somewhat mixed and nothing definite has been received from those states announced as doubtful. Judge Taft has carried almost the entire country outside of the solid south with the exception of Colorado, Nevada, Montana and Nebraska. Taft's electorial vote is in the neighborhood of 300.

Some peculiar features of the election are the changes made in state elections. Missouri gave Bryan a good majority and elected a democratic governor. Ohio gave Taft a majority and elected a democratic governor. Indiana went republican on the national ticket and elected a democratic legislature. Some other republican states have elected democratic legislatures which will send democrats to the U. S. Senate where there were republicans before. Joe Cannon of Illinois has been re-elected to congress in spite of the bitter fight put up against him.

Taft has carried every county in Oregon but his majority was not as large as Roosevelt's four years ago.

DON'T HAVE TO WAIT FOR HARRIMAN.

The following communication clipping from the Blue Mt. Eagle shows conclusively that at least one capitalist was not waiting to see whether Taft was elected or not. He knows a good thing and doesn't propose to let a little thing like the election, Harriman, the Sumpter Valley or anything else of an ordinary nature interfere with plans. He's going to build a railroad:

St. Louis, Mo, Oct., 28, 1908.

Editor Blue Mountain Eagle:

Please allow space in your valuable paper to say that a company is now formed in this city for the purpose of constructing and operating a railroad from Silver City, Idaho, via Burns Harney county, Canyon City Grant county, and Pendleton Umatilla county, Oregon to Watersville and Conconulla respectively in the counties of Douglass and Okanogan, Washington. This company, entitled Euphemia Company, will be incorporated under the laws of the state of Washington, with a capital stock of ten million dollars, divided into one hundred thousand shares of one hundred dollars each.

The object of this company is not only to build railroads; but to lay and operate telegraph and telephone lines, layout and build towns, to carry on the business of colonizing, etc.

We hope that the people with and whom we are to labor will lend that degree of interest to the enterprise which its magnificence will warrant. A spirit of willing co-operation, as will bring success out of defeat, light out of darkness, plenty out of poverty and business out of chaos.

The northwest is the coming portion of our country and Euphemia Company is appealing to the citizens along that part of it through which the Euphemia Western railroad will run to be first of many upon the scene.

The company asks a lenient public sympathy and a brotherly helpfulness and we will meet it more than half way.

The company will be an original one, and launches out by dividing up its territory thus: (1) Oregon, Division A; (2) Washington, Division B; (3) Idaho, Division C; Etc. Now the company wants a vice president for Division A, as each division will have one such officer. When we shall have secured such a man we will at once open books of subscription so as to have the output stock subscribed as the laws of Washington require before beginning business.

Any one interested in this matter and wishing to know more about it is cordially invited to write to the president, JOHN THOMAS BOWMAN, 1333 Morgan Street, Saint Louis, Missouri.

Celebrate Their Golden Wedding.

Mr. and Mrs. R. J. McKinnon, old pioneer people of this section, are today celebrating their golden wedding at their home in this city. Both are enjoying good health and do not seem old to their many friends here who have known them so long.

The only feature that could possibly mar the happiness of the occasion is the unavoidable absence of several of the children. Only three of the large family of children are present: R. J. McKinnon Jr., of this city, Mesdames M. E. Clark of Denio and Thos. Cleveland of Nevada, are the only ones present. The many friends of this estimable old couple wish them several more years of happiness on this earth.

James Bary and wife and daughter were in the city Wednesday making yearly proof on their deserts. Mr. Bary is one of the prosperous sheepmen of the desert section and makes his headquarters at Lakeview.

TEACHERS INSTITUTE POSTPONED.

The Times-Herald has received a letter from County School Supt Hamilton stating that the date for the teachers annual institute could not be definitely announced. He had intended holding the institute in this city the last of this month but now has to postpone it as the instructors cannot be here at that time. It is not known at this time when they can be present.

Supt. Hamilton further states that the library books will arrive in a few days and no doubt will be distributed as soon as possible after they are received.

WANT A STAGE LINE.

Mr. C. B. Smith, one of our new and energetic settlers down at Waverly, was in the city yestesday. Mr. Smith states there are now about 65 voters in his neighborhood and since they have a postoffice at Waverly thinks they are entitled to a direct mail route. At present he is carrying the mail on horse back from Harriman but thinks they should have a direct service.

The Times-Herald believes he is right and with the matter properly placed before the authorities at Washington it could be arranged.

Mr. Smith suggests a line to connect with Lawen by way of Waverly, J. F. Mahoh's, Alberson and on south to Winnemucca making close connections along the entire route. This is certainly a desirable proposition as the present round-about way of getting mail to and from the southern part of the county is very unsatisfactory to all concerned.

Mr. Smith informs The Times-Herald that Waverly now has a good store with an exceptionally fine stock of goods conducted by Mr. Brakeman. He has recently purchased the goods of Mr. Stearns at Harriman and moved them to Waverly.

IF YOU CARE FOR STYLE.

If you care for style and lot of people do, it can be had in any Vehicle on our floor. We are prepared for the fall trade. Our stock is at its best. We show a remarkable assortment of Vehicles, including Carriages, Roadwagons, and Buggies, for this season of the year.

Our house is a regular Savings Bank for those who wish to buy.

Call in and make us prove it.

Harney Co. Imp. and Hdwe. Co.

Of the 23,000 homestead entries made during the past 15 months in New Mexico, 20,000 are located in the so-called "dry districts of the territory. The territorial agricultural college and the Santa Fe railroad are establishing many experimental stations in the territory and farmers' institutes are being held at which dry land agriculture is the principal subject of study.

INSPECT OREGON AND IDAHO SHEEP.

With the first of November the bureau of animal industry will commence the annual inspection of the sheep of Oregon and Idaho arrangements for which have just been completed by Dr. S. W. McClure, in charge of the bureau's work in the northwest.

During the coming two months government inspectors will look over every band of sheep in the two states, inspecting carefully in a search for scabies. Eleven men will be employed in the state.

By January 1 their task will be practically completed. November and December are chosen for inspection as during these months the sheep are in their winter feed lots and several bands can often be examined in the course of a day.

There is practically no scab in Oregon, according to the local officials, unless a few isolated cases show up down in the valley, but for the most part the sheep are in very satisfactory condition. Also the Idaho flocks are practically free from the disease, but the inspection soon to be undertaken will make matters doubly sure.—East Oregonian.

SOUND NATURE HABIT.

That which we call fate is a web of our own weaving.

Man becomes a slave to his constantly repeated thoughts and acts. What he at first chooses at last compels.

You can easily snatch a pebble from gravitation's grasp as you can check your thought or act from following the force of habit.

The most unimportant act of life is a stone in the structure of character and destiny.

Habit is second nature. It either increases the efficiency and ease of our work in life, or renders our work more difficult and ineffective.

Practically every achievement of the human race is but the accomplishment of habit.

The habit of industry makes a man a marvel of efficiency, even though he be unlearned.

The habit of cheerfulness—of always looking on the bright side of things—is worth more than a college education.—Berkeley Independent.

WARRANT CALL.

Notice is hereby given that there are sufficient funds in the treasury to pay all outstanding Harney county warrants of class P registered prior to Sept. 1 1908.

Interest ceases from this date.

Harry C. Smith, and Archie McIlowan both of Burns, Oregon. Dennis Dellwo, of Nolin Oregon, Frank O. Jackson, of Burns, Oregon.

WM. FARRE, Register.

The Stag is one of the latest and best additions to the famous Deere Line of Riding Plows. Is light in weight, simple and durable in construction—full of genuine merit, and has shown its mettle and utility in every test it has been put to. It has amply demonstrated by its good work its right to be classed as a strictly up-to-date, high-class farm tool. It is certain to suit the most critical farmer and be a money-maker and a labor-saver for him.

"If It's a Deere—It's Right"

and does its work perfect ease to the operator and team. It is manufactured and sold as a tongueless plow—a tongue not being necessary to best results, but one is supplied at slight cost to those who perfer it that way. The Stag is the simplest riding plow built,—anyone who can hook up a team and drive 'em straight can operate it successfully. It possesses many superior features not found on other plows, and it takes a whole book to illustrate and discribe them. Better write for it today and all the information you want about this superior implement.
