The peace congress considered the "Dum-dum" bullet at considerable length, and England strongly opposed any restrictions against its use among savage tribes. There are certain cases, however, where its use really seems to be advisable. When dealing with fanatics like the Soudanese, a war of extermination must be carried on, and the Dum-dum bullet seems to be the most effective for placing the enemy hors de combat, and the bullets are also used in the prison of one of our Western states. Nowadays all chief powers have small bore rifles and are liable to become involved in warfare with more or less savage races, as when their colonial possessions are menaced, so that many of them desire to use the most effective bullet possible. This Dum-dum bullet has a hollow in the head, and the nickel sheath ends on a lip at the entrance. The bullet, when it comes in contact with any moist substance, such as the living body, spreads out into a sort of rounded knob, but the nickel cover prevents any flying or separation of the fragments. If the bullet strikes any hard substance, such as wood, it passes through it, cutting a clean hole.

Helen Keller, the deaf, dumb and blind girl, whose education, progressing steadily through many years, has been been the study of psychologists and scientific minds all over the civilized world, has passed a brilliant examination and is about to enter Cambridge. While it is wonderful to see a deaf, dumb and blind girl master all the intricacies of a modern education, and speaks volumes for the ability of her instructors to surmount obstacles well nigh insuperable in teaching her, the question comes up, what is the use of it all to her? In order to do anything succesfully in this world one must have the use of tongue, eyes and ears, and be able to use at least one of the three well. Miss Keller's only way of transmitting her thoughts to the world—and that is all her education can ever amount to, no matter how high she goes in her studies—will continue to be through her typewriting machine.

The officers of the First Washington volunteers have wired Governor Rogers asking the recall of Colonel Wholley. When talked to some time ago regarding Wholley, the governor said he had nothing to do with the matter, as it was entirely in the hands of the war department; that while he made the appointment of Wholley as colonel of the regiment, the department only could recall or remove him from his command.

The American miners in the Atlin district who have filed claims aggregating $10,000,000 against the Canadian government for being deprived of their mining claims by the new law, says the Telegram, will secure their payment about the same time that Canada secures the change of the boundary over into the Pacific Ocean.

Another Arctic exploration party has returned, their faces telling only too truly the sufferings experienced. The Wellman party, it seems, spent the winter just inside the Arctic circle—on Franz Josef Land—and therefore accomplished nothing.

The Dreyfus trial still drags wearily along. As the end approaches it is difficult to see how the unfortunate Jew is to escape conviction, so bitter is the feeling of his persecutors against him.

Is it possible that Dewey is at last forgetting the lesson of greatness and the fact that silence is golden? To be sure, the admiral has a right to talk—or do anything else he wants to.

Oom Paul will have to back down the position he has taken, or his country will belong to England in 1900.

When he gets home, Dewey will decide the fate of the Filipino rebellion, if Otis cannot.

This is the first time on record when August was the coldest month in the year.

Some of the owners, after I have submitted just what they have been asking for, will say they cannot sell for that, while others say for me to submit all cash offers if they come way below what they are asking. Any reasonable or fair offer will have prompt consideration.

The Rev. W. B. Costley, of Stockbridge, Ga., while attending to his pastoral duties at Ellenwood, that state was attacked by cholera morbus. For sale by Marsh & Medler. a

Greatest of All

"Every one in San Antonio, Texas, says that Acker's English Remedy is the greatest thing ever put up for coughs, colds, asthma, bronchitis, croup and consumption. I have been using it over four

years for all forms of throat and lung troubles, and have yet to come across a case where it failed. We have four little ones in our family, and neither my wife nor I have ever lost a night's sleep because of throat troubles among the children. I guess that is more than any other family can say. Acker's English Remedy is just as effective for grown-up people as for the young. It seems to go straight to the place where the trouble lies in the throat and bronchial tubes and lungs. It soothes and heals the irritated tissues, loosens up the phlegm and mucus in the breathing passages, quiets the nerves, invigorates the constitution and stops the coughing. My advice to parents is to always keep a bottle in the house. It will be a constant safeguard against croup." (Signed)
F. G. ZIMMERMAN, San Antonio, Tex.

Sold at 25c., 50c. and $1 a bottle, throughout the United States and Canada; and in England, at 1s. 2d., 2s. 3d., 4s. 6d. If you are not satisfied after buying, return the bottle to your druggist and get your money back.

We authorize the above guarantee.
