

ELECTRICAL CHIMES AT THE FAIR.

President Roosevelt will Press the Keys Five Thousand Miles Away.

Portland, Dec. 7.—Electrical experts are at work upon an extremely novel feature for the opening exercises of the Lewis & Clark Centennial Exposition on June 1, next. The scheme is to have President Roosevelt, at Washington, touch a few keys and set in motion the chimes in the towers of the Government Building at the Exposition. The chimes, 300 feet above the water will play "My Country 'Tis of Thee." The sound will carry a great distance owing to the fact that the Government Building is located on a peninsula in Guild's Lake, half a mile from the mainland. Arrangements have already been made to have President Roosevelt touch a button that will set in motion the machinery for the

Western World's Fair, and it is thought there will be no difficulty in arranging for the additional feature of the chimes.

Ordinary household accidents have no terrors when there's a bottle of Dr. Thomas' Electric Oil in the medicine chest. Heals burns, cuts, bruises, sprains. Instant relief.

Grip Quickly Knocked Out.

"Some weeks ago during the severe winter weather both my wife and myself contracted severe colds which speedily developed into the worst kind of la grippe with all its miserable symptoms," says Mr. J. S. Egleston of Maple Landing, Ia. "Knees and joints aching, muscles sore, head stopped up, eyes and nose running, with alternate spells of chills and fever. We began using Chamberlain's Cough Remedy, aiding the same with a dose of in

Chamberlain's Stomach and Liver Tablets, and by its liberal use soon completely knocked out the grip." These Tablets promote a healthy action of the bowels, liver and kidneys, which is always beneficial when the system is congested by a cold or attack of the grip. For sale by Geo. A. Harding.

CENTENNIAL NOTES.

The Bridge of Nations at the Lewis & Clark Exposition, which connects the Government Peninsula and the mainland is more than two thousand feet long.

Work on the Government Building at the Lewis & Clark Centennial is progressing rapidly, and the building will be completed by April 1st.

In the experimental gardens, located in the western part of the Lewis & Clark

Exposition grounds, all manner of Western products will be exhibited as they actually grow. This is a new feature in expositions.

The walls of the Forestry Building at the Lewis & Clark Centennial are now in place, and workmen are busy putting on the roof. The building has proved interesting beyond all expectation to early visitors at the Fair grounds.

Jewelers from many western cities have sent orders for Lewis & Clark souvenir gold dollars to be used as Christmas gifts. The coins are being mounted and used as tie and scarf pins, watch charms, brooches, and in many other ways.

Roosevelt avenue, which skirts the shore of the Government Peninsula at the Lewis & Clark Centennial, is the

only road named after a living American.

The shady driveways in Centennial Park at the Lewis & Clark Fair have been named after western states, being known as Idaho, Avenue, Wyoming Avenue, and Montana Avenue.

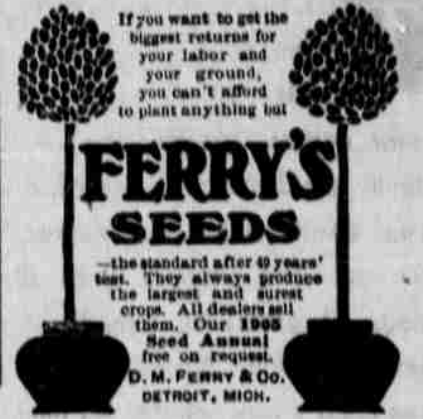

Three water towers, each sixty feet high, will supply water for emergency use at the Lewis & Clark Centennial. The towers will be covered with vines which will completely conceal the wood-work.

The National Association of State Dairy and Food Departments, consisting of about 300 delegates, will hold its next convention at Portland in June, during the Lewis & Clark Centennial.

The bronze statue of Sacajawea, the

Indian heroine, will be located in the center of Columbia court, the central plaza of the Exposition. The statue will face the West.

If you want to get the biggest returns for your labor and your ground, you can't afford to plant anything but

FERRY'S SEEDS
—the standard after 40 years' test. They always produce the largest and surest crops. All dealers sell them. Our 1905 Seed Annual free on request. D. M. FERRY & CO. DETROIT, MICH.
