A Steel Windmill Tower every 8 days. Those figures represent the average of the ever-going, ever-growing Steel Aermotor. One goes out and we "Take the next." We are now using the 20 to Aermotor in Wichita, Kansas, which is 30 feet in diameter, and weighs 2,000 lbs. Its variety increases our plant to about 100 acres, and is probably the largest in the world. Are you going to know about the Aermotor Co., its history, and why it makes more windmills than all other makers combined? Then write for our Illustrated Catalogue, which shows the Steel Tower, Sawing Tower, etc.

1st. We commenced business in 1888 with a capital of $1,000 and have increased our capital to $1,000,000 in four years, and have paid in dividends 20 per cent per annum, besides making the improvements and additions to our plant out of our income. Our business has increased over 2,000 fold in the last four years, and we have made and sold more than all other windmill factories in the world combined. Our factory is now running 24 hours per day, and we are still behind our orders, though we have added many new machines to our plant.

Investigations proved that the Aermotor was the best wind wheels could be made, and the AERMOTOR daily demonstrates it has been done.
